## INTRODUCTION

**More questions than answers**

## CHAPTER ONE

**The Intersection of Meaning and Syntax in Music**

1.1. Making sense of Musical Meaning............................................................................................. 6  
1.2. Making sense of Musical Syntax................................................................................................. 15  
1.3. Intuition and Semantic Intention............................................................................................... 19  
1.4. The Value of Semiotics............................................................................................................. 23

## CHAPTER TWO

**Encoding, Communication and Semiosis**

2.1. Encoding...................................................................................................................................... 26  
2.2. Communication............................................................................................................................ 26  
2.3. Semiosis and Encoding............................................................................................................... 30  
2.4. Musical Semiotics and the Role of Codes............................................................................... 36

## CHAPTER THREE

**Eloquence and Musical Codes**

3.1. Semantic and Syntactical Categories......................................................................................... 42  
3.2. Content versus Expression.......................................................................................................... 43  
3.3. Rhetoric and **Affekt**................................................................................................................ 48  
3.4. Musical Topics............................................................................................................................. 63  
3.5. Structural usage of Topics.......................................................................................................... 81  
3.6. Problems encountered in Topical Semiosis............................................................................. 87
CHAPTER FOUR
Tonal Language, Speech-tone Melody and the Ngqoko Women

4.1. The Evolutionary Origins of Signification ........................................... 95
4.2. Tonal Languages and Music ............................................................. 99
4.3. Xhosa Music and Speech-tone Melodies ........................................ 103
4.4. Codes and Overtones: the Music of the Ngqoko Women ............ 110

CHAPTER FIVE
Signifying Musically

5.1. Gestural Interpretation ................................................................. 118
5.2. Artistic Cognition and the Intonation Process ............................. 123
5.3. Role of the Right and Left Brain-hemispheres ............................. 137

CHAPTER SIX
The Temporal Syntax of Experience

6.1. Musical Syntax as Time ................................................................. 143
6.2. The Nature of Musical Temporality .............................................. 146
6.3. Musical Temporality as Syntax .................................................... 154
6.4. Intoning the Temporal Sphere .................................................... 166

CONCLUSION
To Glimpse the Emperor’s Clothes

Compact Disc of Ngqoko Music
ABSTRACT

This research-report presents a theoretical exploration of musical encoding which has its basis in general semiotic theory. By examining what this reveals about the problematic and mysterious issue of music’s meaning, I argue that the most visceral and direct form of it is found in the manner in which the composer shapes a certain kind of temporal experience (*erlebnis*) which is engendered by the music itself. This reveals that sensations of goal-directed movement, closure, tension and release are shaped in a phenomenological way against a background of continuity that is established by metrical cyclicity and phrasal periodisation. As a result, the interpretation of certain kinds of accumulative structural effects generated by the gestural (rhythmic and melodic/harmonic) inflections of the temporal and intonational planes become meaningful in a rhetorical, affective (*affekten*) and topical sense. A study of Ngqoko (Xhosa) overtone-music, as a case study into African indigenous music (as opposed to the examples cited of Western art music), shows that an intensification of the relationships between pitch and rhythm that exist in speech-tone results in the formation of melody and a culturally embedded vocabulary of intonations. I argue that this resultant edifice exists in the music of most cultures and that this ultimately serves as the basis of musical encoding. Therefore musical meaning develops in ways that are completely intrinsic to music.

**Key Concepts:** *affekt*, encoding, gesture theory, intonation, musical codes, music and language, Ngqoko Women’s Ensemble, overtone-singing, pre-linguistic speech, rhetoric, semantics, semiotics, speech-tone, speech-tone melody, temporal theory, topical theory, throat-singing, Xhosa music.
Acknowledgements and Declaration

I would like to thank the following people for their supportive assistance in bringing this project to completion.

**Prof. Jeanne Zaidel-Rudolph:** Your unwavering encouragement, faith, commitment, insightful contributions and ongoing support has shaped the quality of this research report.

**Prof. Hendrik Hofmeyr:** You helped me to understand that I walk a suitable path.

**Prof. J. H Potgieter:** Our many philosophical conversations about the nature of music and its masterwork steered my research towards this topic.

**Mr. Etienne Viviers:** Your proofreading and subsequent suggestions helped to address numerous inconsistencies in the presentation of the overall argument.

**Ms. Nikki Richard:** Your proofreading assistance is highly appreciated.

**National Research Foundation (NRF):** I wish to express my gratitude for the financial assistance (research grants) towards my studies and the opportunity to participate in the Ngqoko project.

**My family:** Your constant support, encouragement and willingness to listen to my arguments and agonies assisted me in reaching the completion stage.

I hereby declare that this Research Report is my own original work.
