The requirements for Masters of Arts in

Social Development
DECLARATION

I, Thomas Maluleke, hereby declare that this submission is my own original work and the assistance which I have received is detailed in the Acknowledgements of this report. To the best of my knowledge and belief, it contains no material which has been accepted for the award of any other degree or diploma at any other University or other institute of higher learning, except where due acknowledgement has been made in the text. I am responsible for the research study and the conclusions reached.

ACKNOWLEDGEMENTS

First and foremost, I would like to give a special thanks to the almighty God for giving the ability to conduct this research study. Secondly I would like to extend my gratitude to the teachers and parents/primary care-givers who were involved in this research study. Your willingness to help is highly appreciated. Without you there wouldn’t be this research report.

I would like to give a special thanks to my wife (S.C.Maluleke) for allowing me to steal our family time to focus on my research study. Your support and understanding have not gone unnoticed.

To my children, Nsuku and Excellent, for their understanding and constantly reminding me of my school work.

Lastly, to my supervisor Mrs Priscilla Gerrand, thanks for supervising, guiding, mentoring and inspiring me throughout the research study. Your patience, understanding and support were amazing. Our encouragement is highly appreciated.
ABSTRACT

Education is a key component of empowerment and has a significant impact on the economic and social development in any country. People who have intellectual disabilities are usually marginalized because they are considered limited in their abilities to contribute to the enhancement of the social and economic development in a country.

The purpose of the research study was to explore the perceptions of teachers and primary care-givers regarding strategies for empowering children with intellectual disabilities. The research design was qualitative in nature and a phenomenological methodology was adopted. Purposive sampling was used to recruit research participants from two primary schools for children with special needs in Katlehong on the East Rand. The sample size was twenty research participants; ten teachers and ten primary care-givers. The data gathered was analysed using Thematic Content Analysis.

Results indicated that both teachers and primary care-givers are experiencing challenges empowering these children. Teachers require support, equipment and training to develop skills needed to address the educational needs. Primary care-givers need to be educated regarding how to support the educational programmes presented to their children, and encouraged to become personally involved in the educational lives of their children.

The conclusion reached is that teachers’ efforts to empower children with intellectual disabilities are being obstructed due to many factors. Their voices need to be heard by the Department of Education on what strategies they perceive as being effective to empower children with intellectual disabilities. The primary care-givers need to gain a better understanding of concept ‘intellectual disability’ so that they can stimulate and support efforts made by the school to empower them.

2.13. Theoretical framework 25
2.14. Summary of the chapter 27

3. Chapter 3: Research Design and Methodology 28

3.1. Introduction 28

3.2. Methodology 28

3.3. Research study aims and objectives 29

3.4. Primary aim of the research study 29

3.5. Secondary objectives 29

3.6. Research tools 30
3.7. Research questions

3.7.1. Questions for teachers

3.7.2. Questions for primary care-givers

3.8. Study population and sampling setting

3.8.1. Research population and population procedures

3.9. Data collection methods

3.9.1. Research tools

3.9.2. Semi-structured interview schedules

3.10. Data analysis

3.11. Anticipated value of the study

3.12. Ethical considerations

4. Chapter 4: Presentation and discussion of findings

4.1. Introduction

4.2. Demographic profile of the research participants

4.3.1. Knowledge and Understanding regarding the nature of intellectual disability

4.3.1. Understanding different types of intellectual disability

4.3.1.2. Understanding the causes of intellectual disabilities

4.3.2. Primary care-givers do not detect intellectual disabilities

4.3.2.1. Gender affects responses when learning of the disability
4.4. Teachers’ initial responses of shock and anxiety eased through appropriate training

4.5. No scope for growth once a child is no longer of School going age

4.6. Challenges faced by teachers

4.6.1. Teacher-to-learner ratio is inadequate

4.6.2. Children with intellectual disabilities project their anger regarding stigmatization onto teachers

4.6.3. Teachers need training and equipment to meet these Childrens needs

4.6.4. Lack of co-Operation between teachers and primary Care-givers

4.6.5. No support from the Department of education

4.6.6. Teachers need assistance to fulfil the role of a teacher

4.7. Challenges faced by primary care-givers

4.7.1. Demands in terms of time and lack of support

4.7.2. Not enough money to meet their needs

4.7.3. Managing aggressive behaviour is difficult

4.7.4. Difficult to protect children with intellectual disability

4.8. The empowering role of education from the perspective of
Primary care-givers

4.8.1. Primary care-givers do not have a good understanding of their role as far as empowerment through education is concerned 64

4.8.2. Teachers think self-care is essential to build resilience 65

4.8.3. The need for multi-disciplinary approach exists 66

5. Conclusion 70

5. Chapter 5: Main findings and recommendations 71

5.1. Summary of main findings 71

5.2. Primary care-givers lack of understanding of intellectual disability 71

5.3. The needs and challenges of teachers of children with intellectual disability regarding the empowerment of children through education 73

5.4. The needs and challenges of primary care-givers of Children with intellectual disability regarding the empowerment of children through education 75

5.5. Recommendations 76
5.5.1. Skills development for teachers 76
5.5.2. Provision of adequate resources 76
5.5.3. Transport and school uniforms 77
5.5.4. Parental involvement 77
5.5.5. Suitable school curriculum 78
5.5.6. Protective workshops 78
