MAGNITUDE JUDGMENT TASK

Instructions

Now we will do a cardsorting task. (Place pile of cards in front of the subject). On each of these cards there are two numbers—one on the left and one on the right. If the bigger number (bigger in magnitude not physical size e.g. 52 is bigger than 49) is on the righthand/lefthand side of the card, place the card face upwards on your right/left. You may use either hand or both to do the sorting. Please work as quickly and accurately as possible. The top card is blank, so don't wonder why there are no numbers on it when you turn it over. You may put this card where you wish. I will nod my head when you are to begin sorting.

PROSE INPUT condition - Please put on the headphones and signal to me when you hear the noise coming through them. Watch me for the signal to begin sorting.

NO INPUT condition - Please put on the headphones and watch me for the signal to begin - there will be no noise coming through the headphones.

ARTICULATORY SUPPRESSION condition - Please start saying "bla bla bla" over and over, and continue saying "bla" throughout the task. Watch me for the signal to begin. (Allow the subject to say "bla" for approximately 1 - 2 minutes before giving the signal to begin).

NO SUPPRESSION condition - READY? ...(nod head).

We will now do the same thing with this pile of cards. (Present the alternate set of cards, with the appropriate alternate interference condition instructions. Repeat until all four trials have been completed).
