LIST OF FIGURES

Fig. 3.1 Location of auricular organ projection areas of stomach, gall bladder and kidneys 14

Fig. 3.2 Skin impedance versus measurement frequency (at 5 Vpp) 16

Fig. 3.3 Skin impedance versus applied voltage (peak to peak) at 50 Hz 17

Fig.3.4 Example of reversible skin resistance ‘breakthrough’ under constant voltage stimulation 18

Fig. 3.5 Skin resistance versus voltage after the ‘breakthrough effect’ 19

Fig. 4.1 OED examination by means of prototype OED device ‘Diagnostronics’ 22

Fig. 5.1 Location of auricular organ projection areas of oesophagus, stomach, gall bladder, pancreas, colon, kidneys, urinary bladder and prostate 27
