Abstract

This study set out to investigate school-based support teams' experiences of the support that they provide within their schools. School-based support teams have a key role in providing support to teachers and learners through consultation on classroom strategies, case management, referrals and decisions regarding resources within the school with the aim of identifying and addressing barriers to learning. This research specifically explores School-based support teams' experiences of providing support in order to gain an understanding of the role that these teams play in schools. Data for this study was collected by conducting focus group interviews with 25 school-based support team members from 5 government primary schools in the Johannesburg East District. In addition, the head of each participating school-based support team completed a questionnaire. The data collected resulted in the generation of four main themes relating to school-based support teams' experiences of providing support within their schools. These were: the functionality of school-based support teams specifically with regards to providing support within their schools, as well as the responsibilities and structure of school-based support teams; access to specialist support, and the District Based Support Team as well as parental involvement; collaboration and the benefits of collaboration; and finally the functionality of the District Based Support Team focussing on school infrastructure, and the involvement of District Based Support Teams.

Key words: School-based support team, District Based Support Teams, collaborative consultation, inclusive education, education support, learning support, schools, institution-level support teams (ILSTs)

Acknowledgements

I would like to express my sincere thanks to:

- To my creator and saviour, the Almighty God, for his love and guidance. To Him be the glory.
- I would like to express my gratitude to Dr Zaytoon Amod for her sincere interest in this research. Her supervision, guidance, support and insight have been invaluable.
- I am grateful to the principals and school-based support teams who sacrificed their time to partake in this research. Without their input this study would not have been possible.
- To my parents, Marion and Mervyn Gaffney, for their unwavering support and encouragement throughout this process.
- To my family for their care and support that has allowed me to overcome many challenges.
- To my fiancé, David, for his love, patience, encouragement and on-going support.
- To my friends and colleagues for their advice and support during this process.

GLOSSARY OF TERMS

The following is a list of terms and definitions used for the purposes of this research study:

Barriers to learning: these refer to intrinsic and extrinsic factors that prevent optimal learning or that lessen the extent to which learners can benefit from education.

District-based support team: this refers to an integrated professional team provided at a district level. Participants in this team include education support providers employed by the Department of Education and other relevant experts from various community structures and other government departments in the area. The key function of the district-based support team is to assist educational institutions, which include early childhood learning centres, schools, adult learning centres, colleges and higher institutions of learning, to identify barriers to learning and support learners in accessing the curriculum.

Inclusive education system: this is an education system adopted by the South African government that promotes the full development of all learners, irrespective of race, class, disability, religion, culture, sexual preference, learning style and language. It is a system that intentionally strives to facilitate a learning atmosphere of mutual acceptance and respect.

School-based support team (SBST): previously referred to as institutional-level support teams in Education White Paper 6, this is a team based at the school and composed of selected teachers/educators whose main function is to identify and address barriers to learning. To be effective in its role, the school-based support team needs ongoing support from the district-based support team.

3.1. Aims and Research Questions	15
3.2. Context of the Study	15
3.3. Research Design	15

3.4. Sample	16
3.5. Instruments	17
3.5.1. Focus-group interview with School-based Support Teams	18
3.5.2. Head of School-based Support Team questionnaire	18
3.6. Triangulation	18
3.7. Procedure	18
3.8. Data Analysis	19
3.9. Ethical Considerations	21
3.10. Researcher Reflexivity	22
Chapter 4: Results	23
4.1. Research Findings	23
4.1.1. The Functionality of the School-based Support Team	24
4.1.2. Support	26
4.1.3. Collaboration	29
4.1.4. Functionality of the district-based support team	31
4.2. Conclusion	32
Chapter 5: Discussion	33
5.1. Research Question 1: How does a sample of school-based support teams in the Johannesburg East District view their role and function in providing support to their schools?	33
5.2. Research Question 2: What are school-based support teams' perceptions and experiences of providing support to their schools?	34
5.3. Research Question 3: Do the school-based support teams use a specific model or approach in providing support to their schools?	34

5.4. Research Question 4: What are the school-based support teams' perceptions and experiences of the ideal support system/s they would like to have in place?	35
5.5. Research Question 5: What are the school-based support teams' experiences of collaborating with parents/caregivers, district-based support teams and relevant service providers (such as health and welfare professionals, psychologists and learning support professionals) in providing support?	35
5.6. Research Question 6: What alternative support structures are available at their schools?	36
5.7. Research Question 7: What do the school-based support teams view as their successes and challenges?	36
5.8. Practical Implications of the Study	37
5.9. Limitations of the Study	38
5.10. Suggestions for Further Research	39
5.11. Summary and Conclusion	40
