

LIST OF TABLES

Table 2.1: cDNA Synthesis Cocktail.....	53
Table 2.2: PCR Cocktail	54
Table 2.3: Ligation.....	56
Table 2.4: Restriction Digestion Setup	60
Table 2.5: DIG Labeling Reaction Mix	62
Table 2.6: Dilutions for Estimation of the Synthesized Probe Concentration.....	64
Table 2.7: Primers used for RT-Light Cyclor PCR.....	78
Table 3.1: Summary of DWNN labelling results showing intensity of labelling in the different cell types and whether nuclear or cytoplasmic.	113
Table 3.2: Summary of Bcl-2 labelling results showing intensity of labelling in the different cell types and whether nuclear or cytoplasmic.	114
Table 3.3: The results of an ANOVA statistical test	120
Table 3.4: The results of Kruskal-Wallis statistical test	120
Table 3.5: Summary of apoptotis labelling results showing intensity of labelling in the different cell types and whether nuclear or cytoplasmic.	125
Table 3.6: Summary of ki67 labelling results showing intensity of labelling in the different cell types and whether nuclear or cytoplasmic.	129
