Supervisor: Elaine Harcombe

A RESEARCH REPORT SUBMITTED TO THE FACULTY OF PSYCHOLOGY, UNIVERSITY OF THE WITWATERSRAND, IN PARTIAL FULFILMENT OF THE REQUIREMENTS FOR THE DEGREE OF MASTER OF EDUCATION (EDUCATIONAL PSYCHOLOGY)

JOHANNESBURG, 2008
DECLARATION

I hereby declare that this research report is my own unaided work. It has been submitted for the degree Masters of Education (Educational Psychology) at the University of the Witwatersrand Johannesburg. It has not been submitted for any degree or examination at any other university.

ACKNOWLEDGMENTS

I wish to express my sincere appreciation to:

My supervisor, Elaine Harcombe, who has been beside me every step of the way; from my Honours training all the way through to the completion of this report. Your passion is an inspiration to me. Thank you for your guidance in directing me on what is to become a life long journey.

My parents and family. Mom and Babbo, thank you for allowing me the opportunity to dream. Your belief in my talents has encouraged me to always give my heart in everything I do. I truly love you.

Paul, my fiancée, your support has been immeasurable. This year has proven to be a difficult journey with both of us studying. Thank you for sticking by me every step of the way and for believing in me. Your amazing support is testament to the completion of this report. I love you always.

My fellow “colleagues”, and friends, we did this together. I thank you for your support, good cries and intellectual debates. I truly have made lifelong friends and hope to work with you in the future.

Monica Beling. Thank you for your commitment to the completion of this project. Working with you has been a pleasure.

Above all:

I would like to thank, the Lord Jesus for blessing me in abundance. For planting the seed to allow me to follow my dreams, I offer up this work to you.
ABSTRACT

The current democratic climate in South Africa, along with current educational reform has called for a re-consideration of assessment and intervention procedures in the education and psychology context. Historical procedures of assessment and intervention programmes have been seen to be culturally biased, unfair, and unethical to children. These methods have been further regarded as too simplistic. A call for an approach to assessing and supporting children, which takes into consideration many factors of the child’s environment, has been placed. This study aimed to investigate the effectiveness of the constructivist ecosystemic approach to assessment and intervention used with a case study, Matthew, who was assessed and supported in this approach prior to the onset of this study. A constructivist, ecosystemic assessment process, The Initial Assessment and Consultation (IAC) was used in understanding the child’s development. Such an assessment process called for an ecosystemic intervention programme, including, learning support through the application of the Cognitive Approach to Literacy Instruction (CATLI) as well as play therapy for the child and parent counselling for the parents.

Methods of qualitative data collection were used, such as surveys completed by all the participants and extant data, such as learning support exams, lesson plans and a journal as well as counselling process notes. Thematic content analysis was employed to analyse the data. The findings of this study suggest that a holistic constructivist ecosystemic approach to assessment and interventions is a viable process in understanding and supporting an underachieving anxious child. However, it is acknowledged that a considerable body of research needs to be achieved before this finding can be considered conclusive. In addition, certain constraints to using this approach were acknowledged, such as time and expertise.
