

Ameliorative experiences

Corona peer group discussion	
Stanza	text
3	The last one I think he was checking to see if you know, if you can use equations...
18	I like ones that were easy and straightforward and also difficult ones... is that challenge my level of thinking.
21	Without maths, I don't see you going any further... I seriously don't.
	But one thing they can really help with is logical thinking.
Corona focus group discussion	
9	But I think it's basically logical thinking, you know like it makes you think like a lot, and just you know...
13	... like it helps you to think in a logical way... it tests you on your abilities to think fast in the required time and to answer the question and how well you understood the question.
15	... when you calculate height and those things we use, like the things that we really like use in our everyday lives, but maths they put it in a much more different way
17	... like you can use them to calculate anything, that's why like I think you really, really need maths... it's just a logical thinking about things you really need, but word problems like they really help us a lot, they really help us a lot.
44	... and how you can actually use like maths in order to solve it...
Duskhaven peer group discussion	
	... but anyway why do we have to use, have to have these questions?
21	I think in the future we won't use it, maybe I going to...
	I think you going to use it... later...
	You going to be a maths teacher you going to use it...

Duskhaven peer group discussion

21	... for instance... when we're at the tuchshop,... you have to calculate it, interpret it and then, umm, put numbers into it, pull out the numbers into that question and then word it out.
22	... [word problems] is helping us to see that maths is everywhere...
25	They are not the same because we use it in a different way.
29	I think we won't use it [word problems], umm... seriously, because in the future...
32	Sometimes I find it quite difficult because we all, we different so... the, the careers that we are going to choose are different. So they can't give us things that we don't like or we didn't like to choose.

Manumission focus group discussion

26	Like sometimes like they give you word problems just to see if, what you can, what you can come up with.
31	So that if they get the word problems they are able to solve them and... and they going to get them right
32	... You are balanced between two things, like between learning English and you learn numbers at the same time.
33	... I was meaning that the word problems are used to help learners when they grow up...
