

ACKNOWLEDGEMENTS

First and foremost, I would like to thank the Lord Almighty for giving me this opportunity to conduct my research. I would also like to convey my sincere gratitude to the following people who have made this research possible.

- My supervisor, Dr Edmarie Pretorius, for her support, expertise and patience.
- My loving husband, Mapwesera Munlo, for his encouragement, love, support and for believing in me.
- My loving parents, Gen (RTD) and Mrs. Mponela, for their love, support and belief in me.
- The participants, for making themselves available and for their patience and interest in my study.
- To my darling daughter, Mowe, Keorapetse, for being a source of inspiration to me.
- To my nanny, Mphatso Chavula, for working extra hours to take care of my baby.
- To all my sisters, brothers and friends for their support and encouragement.

DECLARATION

I hereby declare that this research report is my own unaided work, and that I gave full acknowledgement to the sources that I used.

ABSTRACT

It is well known that the human immunodeficiency virus (HIV) and acquired immunodeficiency syndrome (AIDS) have affected millions of people throughout the world and continues to affect people on a day to day basis. In Africa, sub-Saharan Africa is the most affected. Malawi, one of the poorest countries in sub-Saharan Africa is no exception to the growing trend and severity in HIV prevalence (Kalipeni& Ghosh, 2006). Like many countries in Africa, cultural practices in Malawi have been criticised as contributing to the spread of HIV and AIDS (Mwale, 2008). In recent years it has been recognised that in order to understand the spread of HIV and AIDS it is imperative to address the economic, social, cultural and political issues that lead to the contraction and spread of the virus. Hence there is a growing realisation that more effective prevention strategies in response to HIV and AIDS should focus on traditional, cultural, medical and political beliefs and practices as well as perceptions of individual risk to HIV and AIDS (Lwanda, 2005). The proposed research seeks to explore the perceptions of Malawians in the role and implications that cultural practices play in promoting HIV infections in Malawi. A sample of 17 people representing both genders from three tribes, namely the Yao, Tumbuka and Chewa participated in the study. Participants were purposively selected on their knowledge of cultural practices and in their being members of the tribe that was investigated. The research study was qualitative and a case study research design was applied. Data was analysed using thematic content analysis. The findings were therefore organised according to themes.

The findings were that a number of cultural practices of the Tumbukas, Chewas and Yaos play a role in HIV and AIDS infections. Some of the cultural practices that were identified included wife inheritance, polygamy, initiation ceremonies, the practice of *fisi* (hyena), the practice of *kulowafumbi* (wiping of dust) and traditional marriages. The study found that cultural practices accompanied by lack of education, poverty, gender inequalities, lack of condom use and peer pressure among the youth promotes risky behavior that often leads to HIV transmission and prevents behavioural change. It was identified that it would be beneficial to educate elders of the community and influential people about HIV so that they could teach community members about the link between HIV and AIDS and cultural practice, and to find alternative ways to ensure that the cultural practice is safer, such as encouraging

people to test before they practice wife inheritance. This study hopefully has the potential of contributing to knowledge and awareness in the fields of social development and social work on the role that cultural practice plays in promoting risky behaviour, which leads to contracting HIV infection among the Chewa, Tumbuka and Yao tribes. These findings could be useful in the creation of cultural-specific intervention programmes that are aimed at curbing HIV infection in Malawi and in many African countries where similar cultural practices are practiced.

Key words: Culture, Cultural practices, HIV and AIDS, Poverty and Gender inequality.

TABLE OF CONTENTS

Acknowledgements	I
Declaration	Ii
Abstract	Iii
Table of contents	V
 CHAPTER ONE: INTRODUCTION	
1.1 Overview of the study	1
1.2 Statement of the problem and rationale for the study	2
1.3 Research questions	3
1.4 Aim and objectives of the study	4
1.5 Brief overview of research approach	4
1.6 Significance of study	5
1.7 Limitations and delimitations of the study	5
1.8 Definition of key terms	7
1.9 Organisation of research report	8
 CHAPTER TWO: LITERATURE REVIEW AND THEORETICAL FRAMEWORK	
2.1 Introduction	9
2.2 Defining HIV and AIDS	9
2.3 The transmission of HIV	10
2.4 Prevalence of HIV and AIDS in the World	10
2.5 HIV and AIDS in Malawi	13
2.6 Factors contributing to the spread of HIV and AIDS in Malawi	14

2.7 Condoms as HIV prevention Strategy	17
2.8 Beliefs about illness	17
2.9 Cultural Practices	18
2.9.1 Polygamy	18
2.9.2 Wife inheritance	19
2.9.3 Hyena (<i>Fisi</i>)	19
2.9.4 Replacement of a deceased's wife	20
2.9.5 Bonus Wife	20
2.9.6 Offering a girl-child as payment for debt	20
2.9.7 Marriage by Proxy	21
2.9.8 Sexual cleansing	21
2.10 Cultural practices associated with Rites of Passage	22
2.10.1 Girls initiation ceremonies	22
2.10.2 Boys initiation ceremonies	25
2.10.3 Dry sex	26
2.11 Theories about Health behavior	26
2.12 Summary	27

CHAPTER THREE: RESEARCH METHODOLOGY

3.1 Introduction	29
3.2 Research approach and design	29
3.3 Sampling procedure	31
3.4 Research tool	32
3.5 Pre-testing of the research tool	32
3.6 Data collection	33
3.7 Data analysis	33

3.8 Trustworthiness and rigour	33
3.9 Ethical Considerations	35

CHAPTER FOUR: PRESENTATION AND ANALYSIS OF FINDINGS

4.1 Introduction	38
4.2 Demographic profile of participants	38
4.3 Findings from Tumbuka group	40
4.3.1 Tumbuka Group in context	40
4.3.2 Significant cultural practices that contribute to HIV and AIDS infections	41
4.3.2.1 Wife inheritance (<i>Kuhara</i>)	41
4.3.2.2 Polygamy	45
4.3.2.3 Traditional marriages	46
4.3.2.4 Initiation ceremonies	48
4.3.2.5 Bride Price (<i>Lobola</i>)	50
4.3.2.6 Culture, Christianity and Education	53
4.3.2.7 High Prevalence Rate in Malawi	53
4.3.2.8 Awareness of the link between HIV and AIDS and Cultural Practice	58
4.3.2.9 Witchcraft	60
4.3.2.10 Programmes that link to culture	62
4.3.2.11 How culture can be used as a way of reducing HIV infection	64
4.3.2.12 Intervention that can be used to curb the HIV transmission	65
4.3.2.13 Summary	66
4.4 Findings from the Yao Group	67
4.4.1 The Yao group in context	67
4.4.2 Significant cultural practices that contribute to HIV and AIDS infections	67
4.4.2.1 Initiation ceremonies	68

4.4.2.2 Believes about significant cultural practices that may contribute to the High Prevalence rate in Malawi	72
4.4.2.3 Awareness of the linkage between significant cultural practice and HIV and AIDS	74
4.4.2.4 Preventitave Programmes that focus on the link between significant cultural practices and HIV and AIDS	76
4.4.2.5 How significant cultural practice can be used to reduce HIV infection	77
4.4.2.6 Summary	78
4.5 Findings from the Chewa Group	78
4.5.1 The Chewa group in context	78
4.5.2 Significant cultural practices	79
4.5.2.1 Initiation for women (<i>Chinamwali</i>)	79
4.5.2.2 Initiation for men (<i>Chinamwali cha a muna</i>)	80
4.5.2.3 The practice of <i>Fisi</i> (Hyena)	82
4.5.2.4 The reason for high HIV infection in Malawi	84
4.5.2.5 Awareness about the link between HIV and AIDS and Cultural practices	86
4.5.2.6 Programmes that exist on HIV and AIDS and Cultural Practices	88
4.5.2.7 How culture can be used as intervention to reduce HIV infections	89
4.5.2.8 What can be done to reduce infection in Malawi	89
4.5.2.9 Christianity and culture	90
4.5.3 Summary	91

CHAPTER FIVE: MAJOR FINDINGS, CONCLUSIONS AND RECOMMENDATIONS

5.1 Introduction	92
5.2 Summary of main findings	92
5.3 Main findings in relation to the secondary objectives	93
5.4 Conclusion	101

5.5 Recommendations	103
5.5.1 Recommendations in terms of education	103
5.5.2 Recommendations on intervention programmes	105
5.5.3 Recommendations on policy	107
5.5.4 Recommendations on future studies	108
5.6 Concluding Comment	109
