NT^a: nucleotide sequence; AA: amino acid sequence

Figure 4.5 Partial nucleotide and amino acid sequences of SHV-1 and SHV-5 depicting the point mutations at amino acid positions 238 and 240.

Nucleotide mutations are underlined in red and the resulting amino acid change underlined in blue.

^a Amino acid residues are numbered according to the numbering system of Ambler *et al.*, (1981).

A, alanine; C, cysteine; D, aspartic acid; E, glutamic acid; F, phenylalanine; G, glycine; H, histidine; I, isoleucine; K, lysine; L, leucine; M, methionine; N, asparagine; P, proline; Q, glutamine; R, arginine; S, serine; T, threonine; V, valine; W, tryptophan.
