

## ACKNOWLEDGEMENTS

My heartfelt gratitude goes to all the people whose support was invaluable. Jonathan van Niekerk the supervisor of this research gave me texts to read. Most importantly he encouraged me to endeavor to be as original in my work as much as I could. Jane Castle you have been a great inspiration in my life. You made learning fun. Because of you I was able to tread a path in which a few I have known dared to, only to realize that it is only fear of the unknown that stops us from exploring further. Sarah Key thanks for the motivational words. Emmanuel Sibanda thanks for giving me the space and opportunity to complete my studies.
