Appendix No. 23.

TRANSVAAL NATIVE LABOUR RETURN.

1903.

Number of able bodied men between the ages of 18 and 45.	Number available for service beyond District of residence.	Required within District.	Estimate of number actually at work beyond District during year ended 30th June.	Remarks.
114,828	52,901	61,927	69,427	The number of Natives estimated to have been at work during the year ended 30th June is in excess of what would appear to be the normal available supply. This may be explained by the fact that the conditions following the conclusion of the war were exceptional.

NOTE.—(1) Statistics of total labour employed on Mines and Works as shown in above Return are compiled up to and including 24th July, 1903, and include all Districts.—Johannesburg, Krugersdorp, Boksburg, Germiston, Springs, Heidelberg, Klerksdorp and Vereeniging. Mortality statistics as above shew all deaths during period 1st November, 1902, to 30th June, 1903, but do not include Heidelberg, Klerksdorp, and Vereeniging. For purposes of comparison it is not considered that the Return is materially affected by their non-inclusion.

NOTE.—(2) The above comparison would appear to demonstrate that while Natives coming from Cape Colony and those belonging to this Colony are the healthiest, the Portuguese are practically the only Natives whose death rate is abnormal—in their case it is excessive.
