Abstract

The study investigated the facilitation strategies that three Life Science teachers use to implement learner-centred teaching and learning within the context of the National Curriculum Statement (NCS). The following research questions guided the study:

- How do FET Life Science teachers interpret and understand their role as facilitators in the classroom?
- What facilitation strategies do three Life Science teachers use to implement learner-centred approaches to teaching and learning?

The descriptors of constructivist teaching behaviours used by Brook and Brooks (1993) were used to frame the study. The case study methodology was adopted for the study. Interviews and classroom observation were used as the sources of data. Research questions, commonsense, personal experience, literature reviewed and the theoretical and conceptual framework of the study were used to formulate initial categories to guide data analysis. The interpretive model of analyzing data was adopted.

The three teachers have a similar understanding of facilitation but emphasize different aspects. One of the teachers indicated that learners must be given a chance to practise, and shifts learning from the teacher to the learner's needs and skills, while the other two teachers describe facilitation as learner-centred or teacher-centred, but do not elaborate to show their understanding of facilitation.

The interview shows that the teachers have a good theoretical background of their roles as facilitators in teaching and learning. Teachers viewed their role as facilitator as planning their lessons, engaging learners in the learning process, asking learners appropriate questions, listening and giving feedback, providing directions, and motivating the learners. The challenge is on the implementation of their roles in the classroom situation due to some contextual factors.
Declaration

I declare that apart from the assistance acknowledged, this research report, titled

THE FACILITATION STRATEGIES USED BY THREE LIFE SCIENCE TEACHERS TO IMPLEMENT LEARNER-CENTRED TEACHING AND LEARNING

is my own unaided work. All sources that I have used or quoted have been acknowledged by means of complete citation and referencing. This research report is being submitted in partial fulfillment of the requirements for the degree Master of Science in Science Education at the University of the Witwatersrand, Johannesburg. It has not been previously submitted for any degree or examination at any other university.

Acknowledgement

I acknowledge the following people who assisted in ensuring that this study materializes in this format; I unreservedly thank my supervisor Megan Doidge for the unwavering support and advice she showed and gave from the initial stages of this study up to this product. Ms L.T Mabungu the principal of Minerva High who approved my study leave. Dr. T. Lelliott, who through the National Research Foundation (NRF) supported this study financially. The support and motivation I got from my so called ‘community’ made up of Mbatha, Rabelani and Rasithithi was instrumental. However I also thank my family, Girly, Carol and Collen for their support through out my studies.

### Chapter 1: Research Questions, Aim and Rationale  

1.1. Introduction  
1.2. Context  
1.3. Background of the study  
1.4. Rationale  
1.5. Purpose of the study  
1.6. Scope  
1.7. Limitation of the study  
1.8. Programme of study  
1.9. Conclusion

### Chapter 2: Literature Review and Theoretical Framework  

2.1. Introduction  
2.2. Understanding of facilitation  
2.3. The benefits of facilitation  
2.4. Teachers as facilitators  
2.5. Theoretical framework  
   2.5.1. Descriptors of constructivist teaching  
   2.5.2. Levels of learner-centredness  
2.6. Review of Literature  
   2.6.1. Learner-centred teaching and learning  
   2.6.2. Inadequate training of teachers
The facilitation strategies used by three life science teachers to implement learner-centred teaching and learning

2.7. Conclusion 21

Chapter 3: Research, Design and Methodology 22

3.1. Introduction 22
3.2. Research methodology 22
3.3. Research paradigm 24
3.4. Qualitative research 24
3.5. Case study methodology 24
3.6. Sampling 26
   3.6.1. Pilot sample 26
   3.6.2. Main sample 27
3.7. The school context 28
3.8. Research methods 28
   3.8.1. Lesson observations 28
   3.8.2. Interviews 30
3.9. Research instrument 31
   3.9.1. Observation guide 31
   3.9.2. Interview schedule 32
   3.9.3. Audio-recording of the interview 33
3.10. Data analysis using the interpretive model 34
3.11. Validity and reliability 35
3.12. Ethics 36
3.13. Conclusion 37

Chapter 4: Data Analysis, Results and Discussion 38

4.1. Overview of the chapter 38
4.2. Data collection 38
4.3. Data analysis 40
4.4. Interpretive model 41
4.5. Results and discussion 41
   4.5.1. The interpretation and understanding of FET Life Science teachers of their role as facilitators in the classroom 42
   4.5.2. The facilitation strategies that three FET Life Science teachers used to implement learner-centred teaching and learning 48
4.6. Conclusion 60
Chapter 5: Summary, Recommendations and Conclusions 61

5.1. Introduction 61
5.2. Overview of the research topic 61
5.3. Findings 62

5.3.1. Life Science teachers' interpretation and understanding of their role as facilitators in the classroom. 62
5.3.2. The facilitation strategies used by three FET Life Science teachers when implementing learner-centred approaches to teaching and learning 63

5.4. Recommendations 67
5.5. Reflection on the research process 68
5.6. Suggestions for future research 68
5.7. Conclusion 70
