

ADENOMATOID ODONTOGENIC TUMOUR – INDUCTIVE TUMOUR OR HAMARTOMA WITH METAPLASTIC MINERALISATION?

List of Corrections:

The following corrections have been undertaken in accordance with the examiners' recommendations.

1. A new paragraph has been added on page 63 confirming that the investigative techniques which we have used cannot confirm Shear's induced stroma theory nor our suggestion of an 'edge' artefact and that we have by no means rejected Shear's theory at this stage but that further studies are planned.
