Design Considerations for Digital Image Libraries

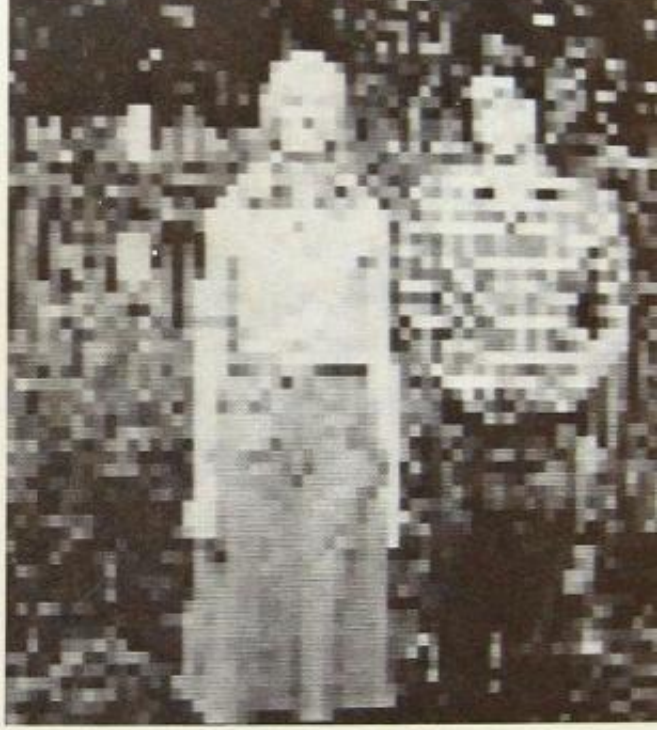

Professor Anthony Maeder
School of Computing, Engineering & Mathematics,
University of Western Sydney, Sydney, Australia
a.maeder@uws.edu.au

Outline

University of Western Sydney
Bringing knowledge to life

- Issues in constructing digitized photographic collections
- Design criteria based on image characteristics and usage
- Modelling information content using importance maps
- Apply modelling to Morija Museum and Archives example

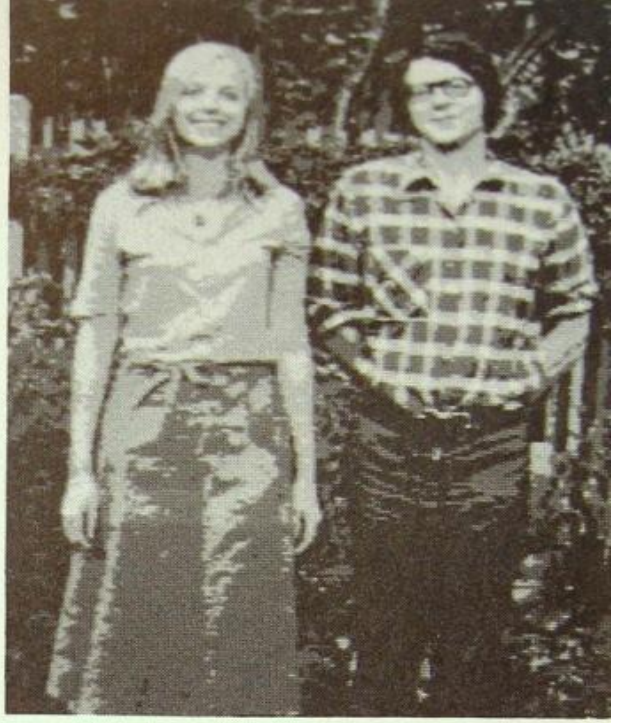

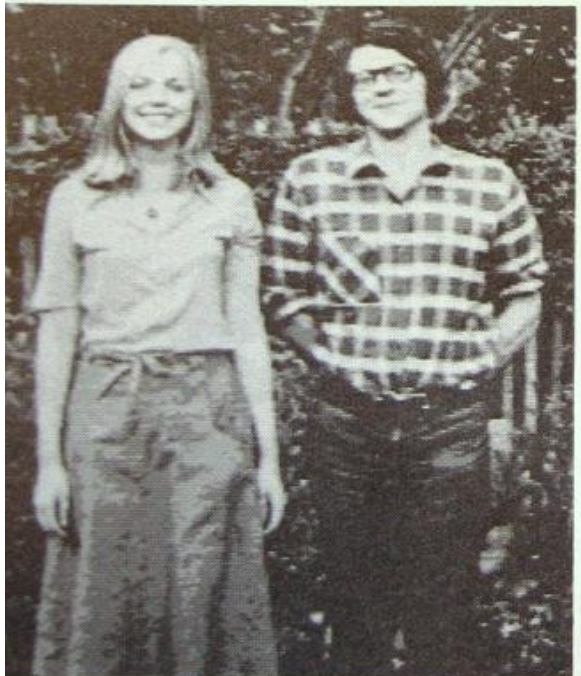

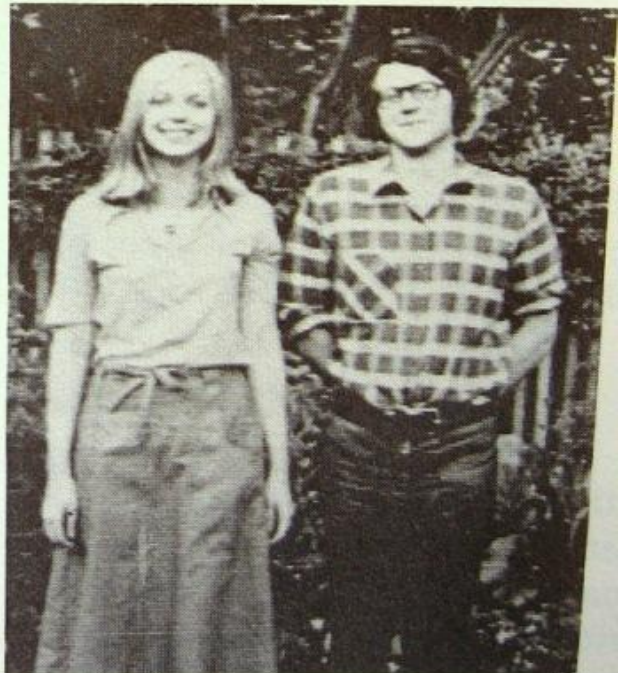

(b)

(d)

Issues

University of Western Sydney
Bringing knowledge to life

- Emphasis on “fixed choice” for physical image properties
- Variety of usage and viewer situations and purposes
- Control of access efficiency and scalability (eg mobile)

Resolving Issues

University of Western Sydney
Bringing knowledge to life

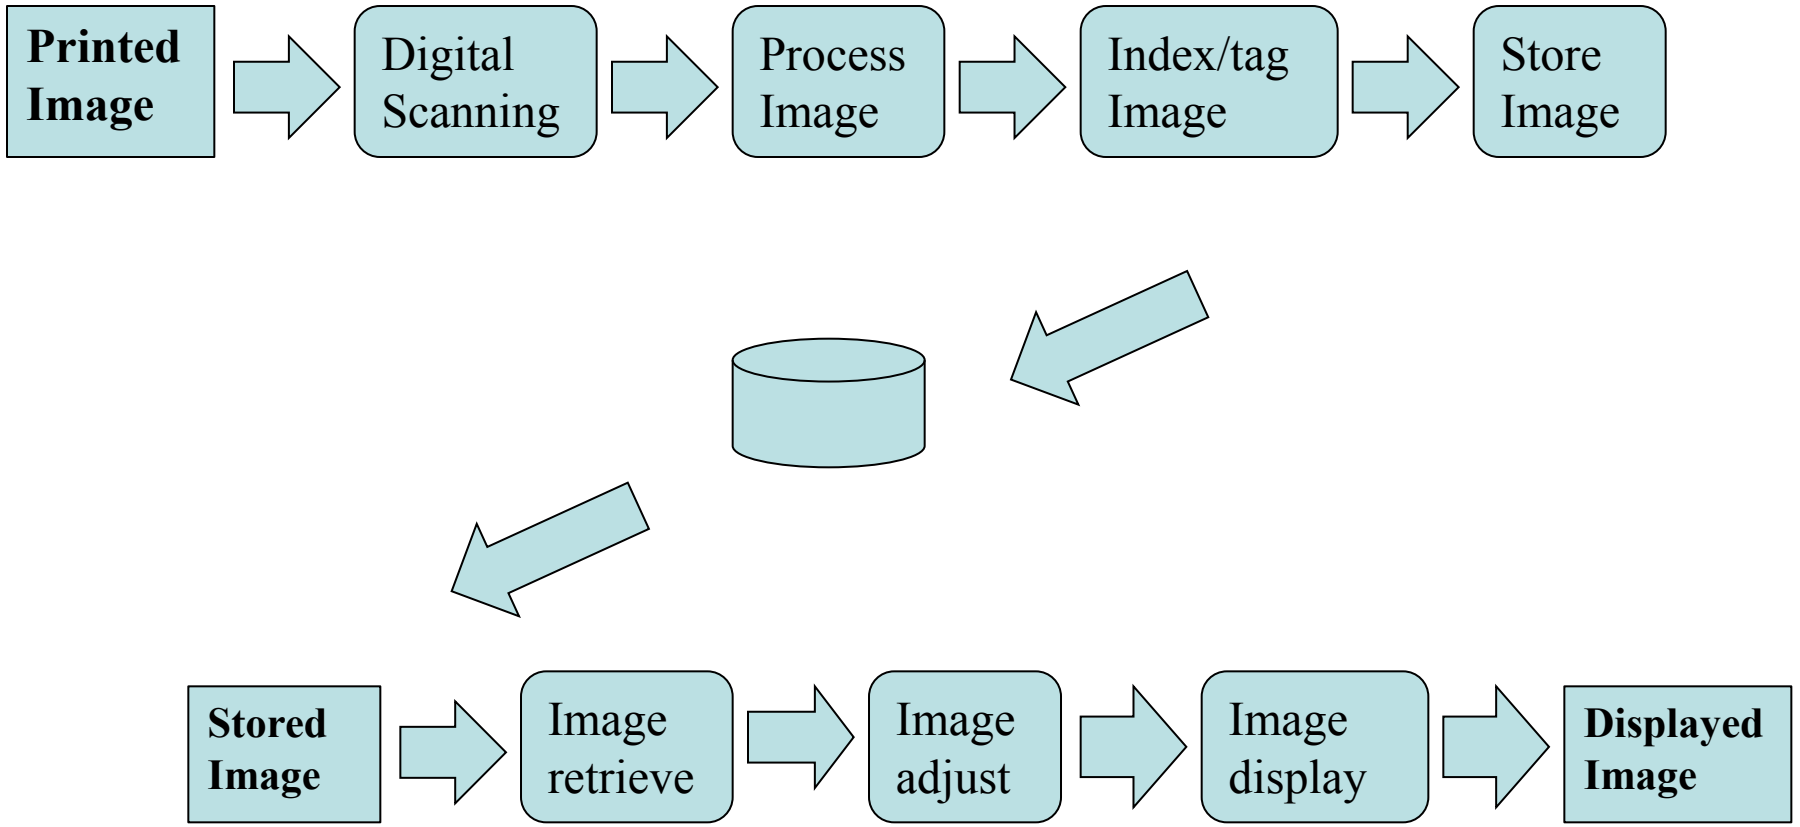

- Vary image physical properties according to content
- Tune library implementation to suit usage/viewer needs
- Provide hierarchy of library content representation

Digital Image Library Design

University of Western Sydney

DIL Management - Usage Stages

University of Western Sydney
Bringing knowledge to life

- **Input/Scan:** spatial resolution, greyscale/colour gamut
- **Processing:** noise, blur, contrast, crop, warp
- **Storage:** compression, purpose, content, multiple
- **Display/Print:** map to screen/page size and characteristics

DIL Data - Perceptual Factors

University of Western Sydney
Bringing knowledge to life

- **Spatial:** pixel density, spacing, aspect ratio, shape, size
- **Intensity:** pixel brightness, contrast, colour values, gamut
- **Quality:** visual appearance, sharpness, clarity, aliasing
- **Information:** visual content density, localization, spread

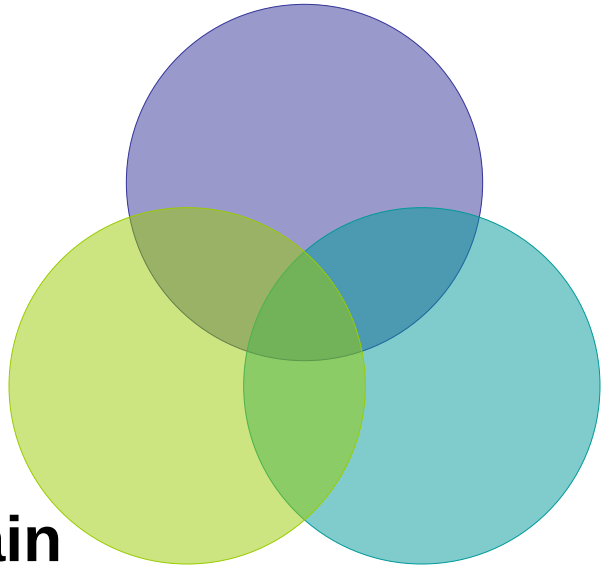

Human Visual Perception

University of Western Sydney
Bringing knowledge to life

1 Sensations in Eyes

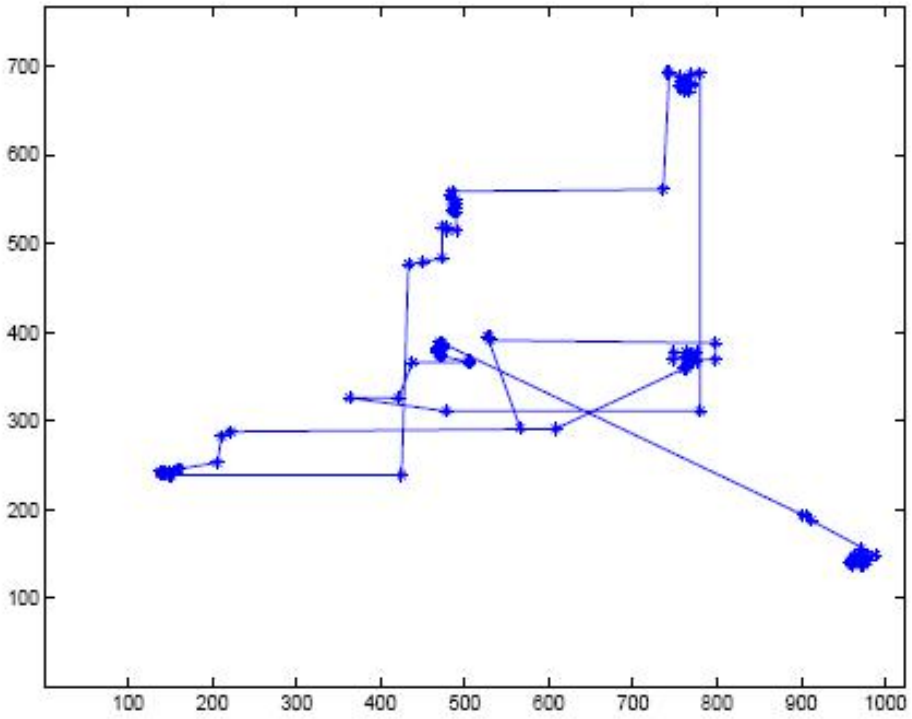

2 Processing in Brain

3 Models in Mind

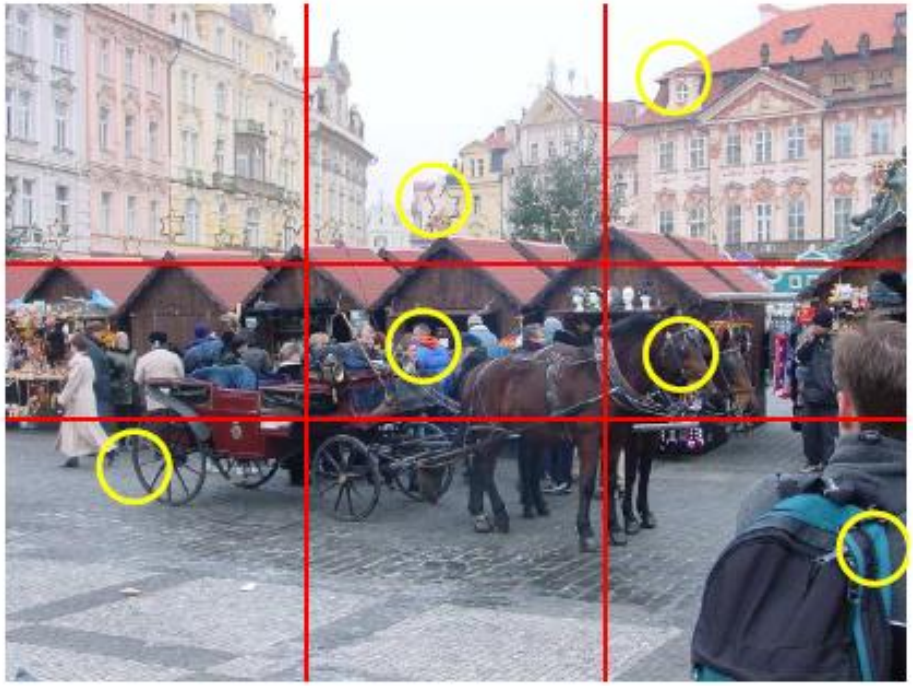

Eye tracking

University of Western Sydney
Bringing knowledge to life

(a)

(b)

Successive eye positions and saccades. Positions of fixation of gaze.

Image Content "Importance"

University of Western Sydney
Bringing knowledge to life

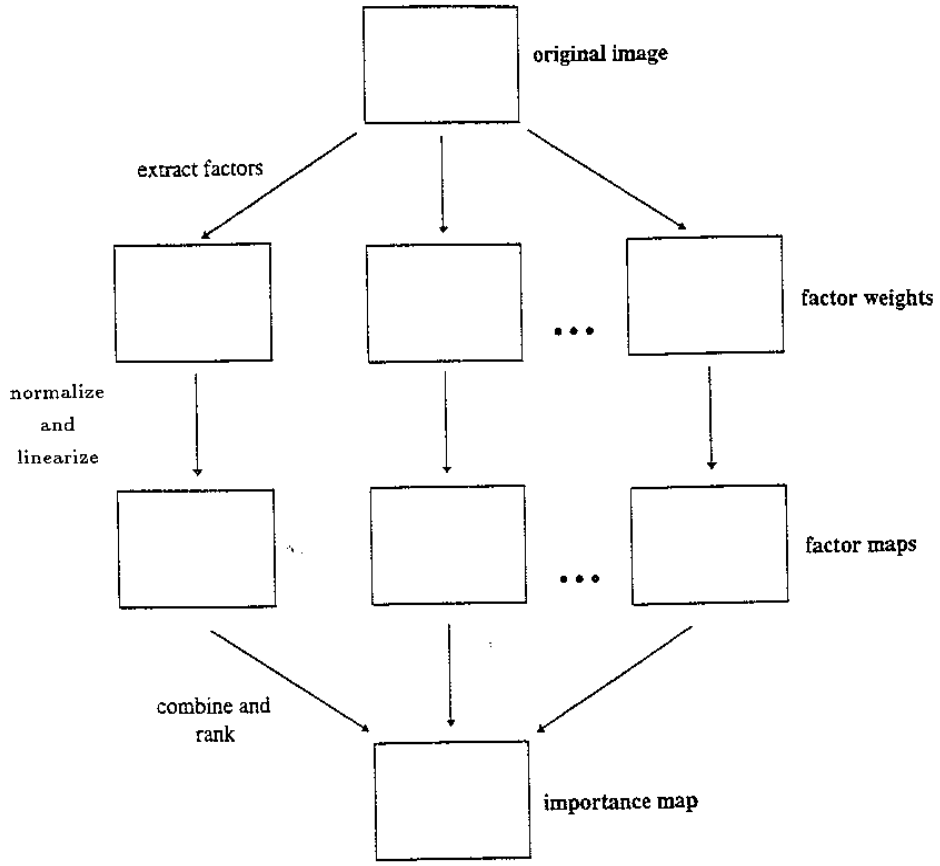

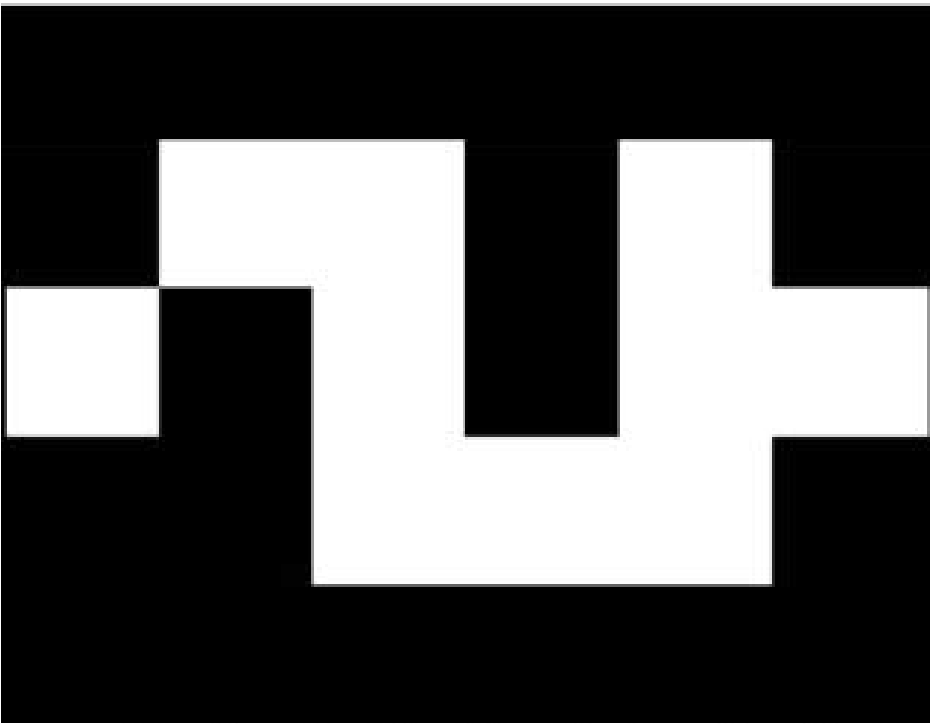

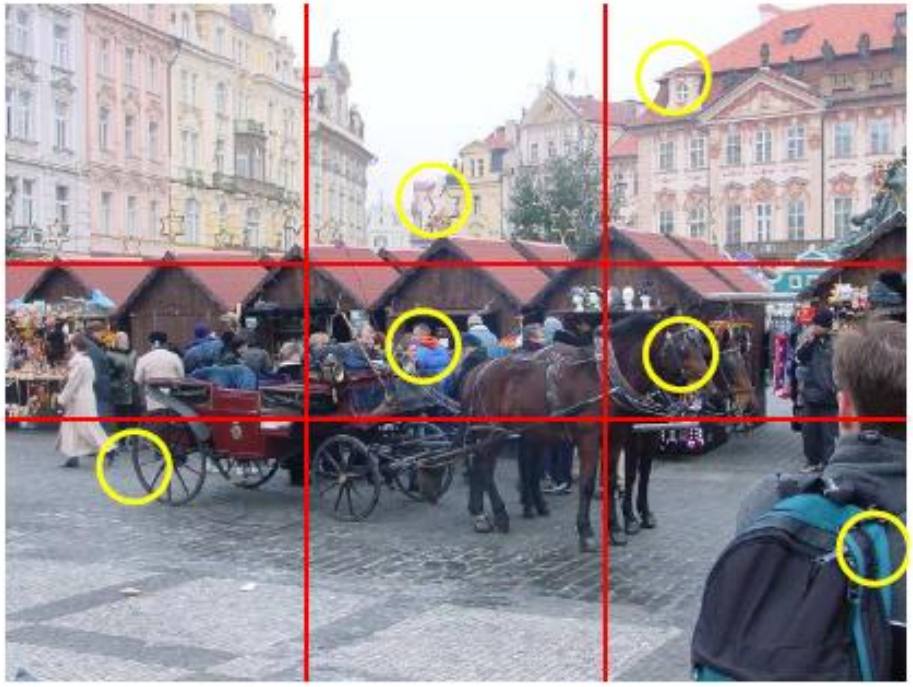

Fig. 2. Constructing an importance map.

Importance Mapping

University of Western Sydney
Bringing knowledge to life

(a)

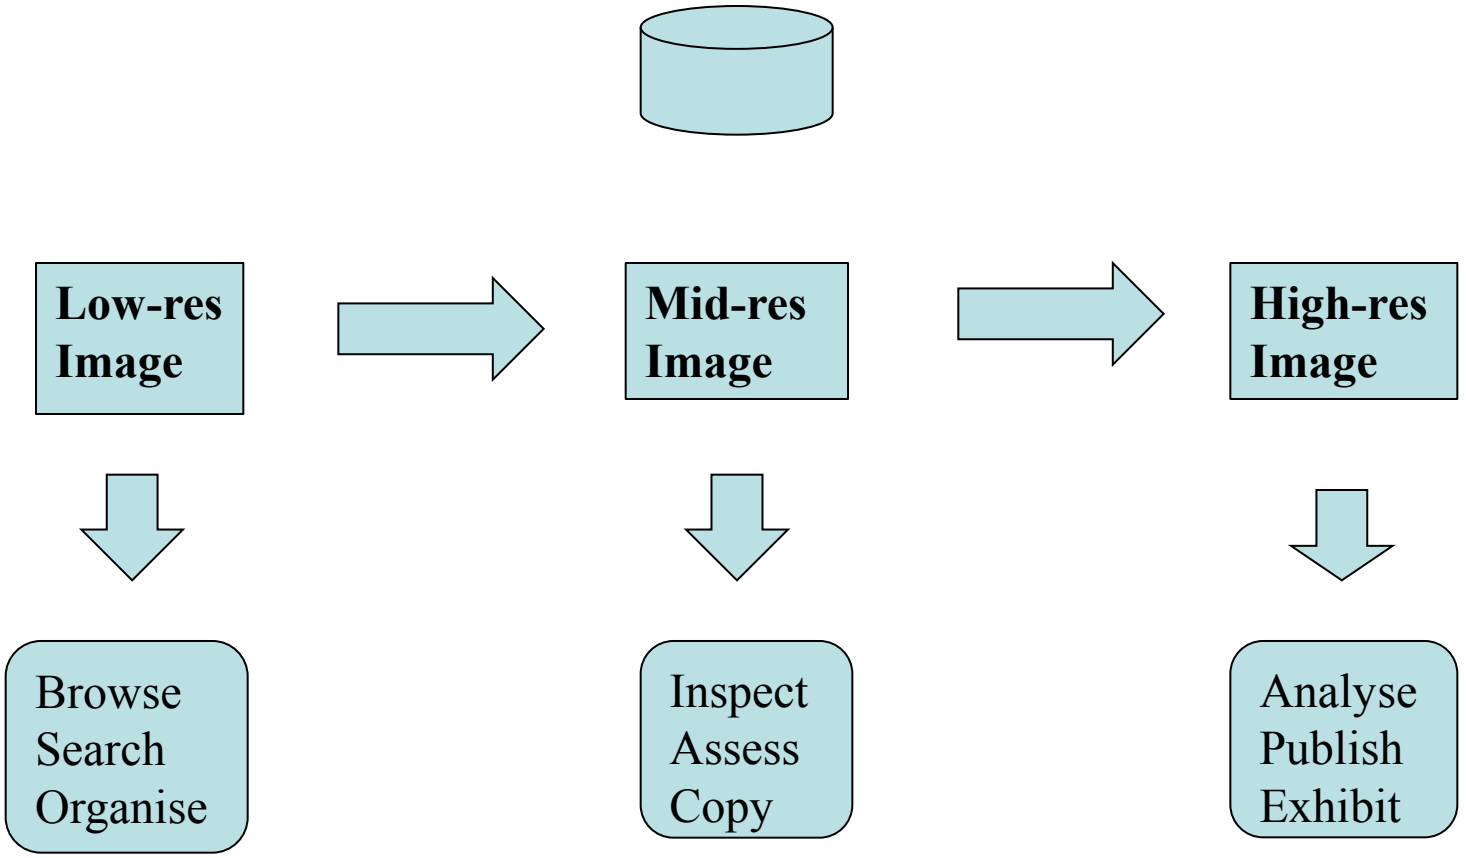

(b)

Locations of high importance.

Positions of fixation of gaze.

DIL Hierarchy – Image Versions

University of Western Sydney
Bringing knowledge to life

Morija Mission

University of Western Sydney
Bringing knowledge to life

Morija Museum and Archives

University of Western Sydney
Bringing knowledge to life

MMA User Group Needs

University of Western Sydney
Bringing knowledge to life

- **Citizens and Tourists:** curiosity and browsing
- **School Students:** education and awareness
- **Scholars and Researchers:** content analysis
- **Sponsors and Agencies:** aggregation and publicity

MMA Collections

University of Western Sydney
Bringing knowledge to life

- **Missionary history**: buildings, people, scenery
- **Sotho culture**: clothing, household, hunting
- **Geological items**: dinosaur bones, fossils, samples
- **Other materials**: maps, drawings, rock paintings

University of Western Sydney

Bringing knowledge to life

Example: Missionary History

University of Western Sydney
Bringing knowledge to life

- Prints range from 3x4 inch to 6x8 inch monochrome
- Digitize on flatbed scanner 400dpi x 8bpp (4-5MB raw)
- Reduce in software to 200dpi and 100dpi JPEG versions

Example: Missionary History

University of Western Sydney
Bringing knowledge to life

- Store with text and tags in Microsoft Access database
- Browsing software “eMuse” to retrieve thumbnails first
- Screen quality versions obtained by clickthrough
- Reproduction quality versions held for access on request

Conclusion

University of Western Sydney
Bringing knowledge to life

- The project is still in an “investigation” phase
- The design principles have been useful for decisions
- Applicability needs to be tested on some other cases
