Appendix I: Data Log for all three weeks

(A): Week one of experimentation

Note: In "Status" field
'1' Means the appliance is found switched ON
'0' Means the appliance is found switched OFF

Assumption: For the proof of concept purposes a refrigerator was used. Refrigerator's power consumption was 600 Watts**.** This means, the refrigerator used 0.6 kWh if, it was switched ON for 60 minutes. Since we knew how much power the refrigerator was consuming therefore, we used following data to find out the number of minutes it was switched ON and calculated kWh based on this information.

User_ ID	Date_Time	Ip_Address	Status
1	2010/12/06 6:20	192.168.1.235	1
