

Acknowledgments:

I would like to thank the following people for their assistance and guidance towards the completion of this thesis, Dr M. Rautenbach from Stellenbosch University for her assistance, guidance and use of her lab, Prof E. Dabbs for his advice and assistance as well as the use of lab protocols, Dr D. Lindsay for the provision of bacterial strains, students from my lab and Youtaro Shibayama for his advice and lastly Dr S.I. Durbach for his supervision for majority of the duration of this project. I would also like to thank the NRF for their funding towards the completion of this project.
