

Fig. 2.19: (a) Enlargement of a 1:25 000 aerial photograph of a fold (labelled 2 in Fig. 2.10) in the outer northern parts of the collar of the Vredefort Dome (Central Rand Group) (locations 358-363, see Appendix No. 6) immediately east of the main road from Parys to Potchefstroom (R 53). (b) and (c) Poles to the bedding and the great circles are given as lower hemisphere equal area stereographic projections (Schmidt net) for the eastern limb (b) and western limb (c), and (d) for the constructed fold axial plane (bold circle).
