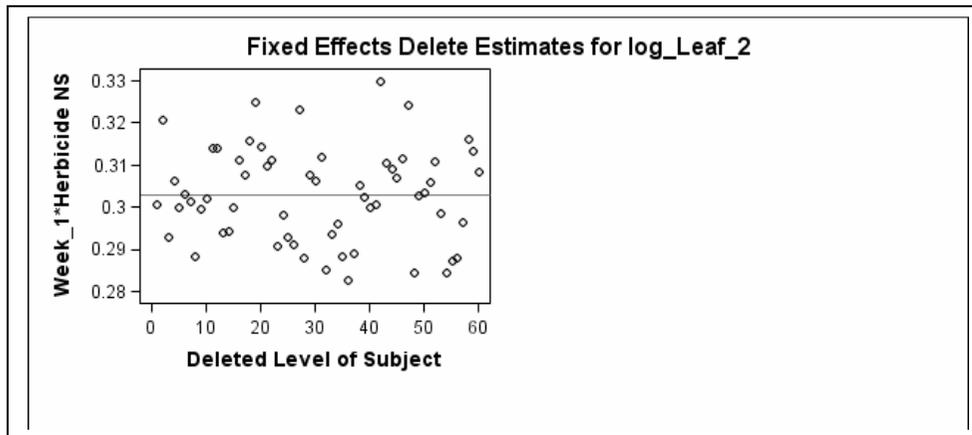

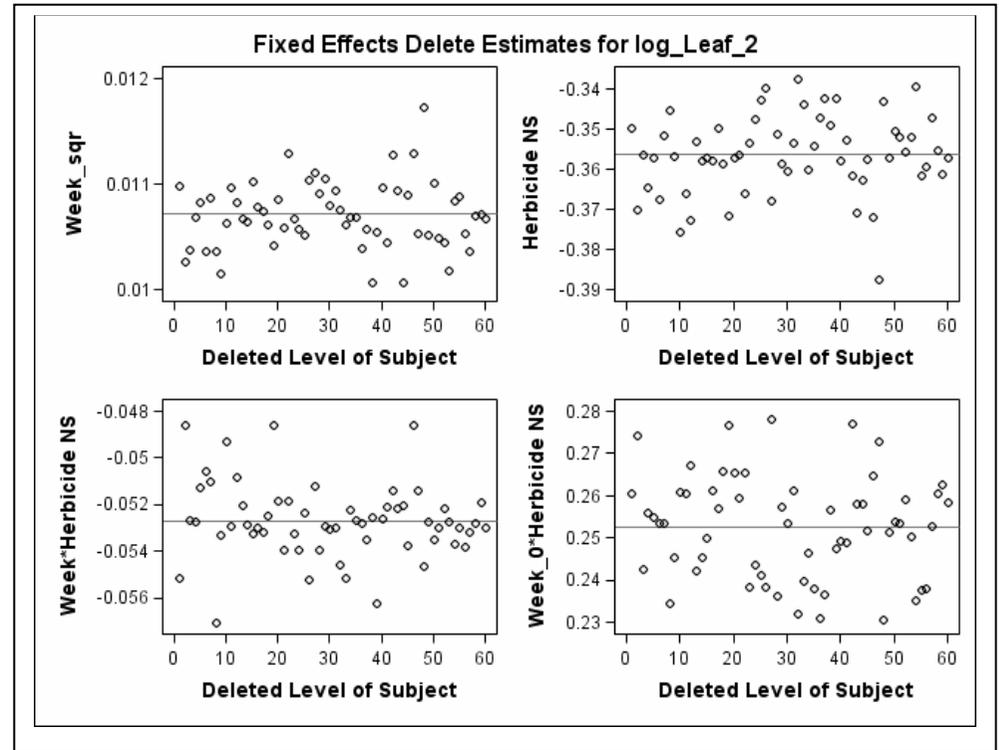

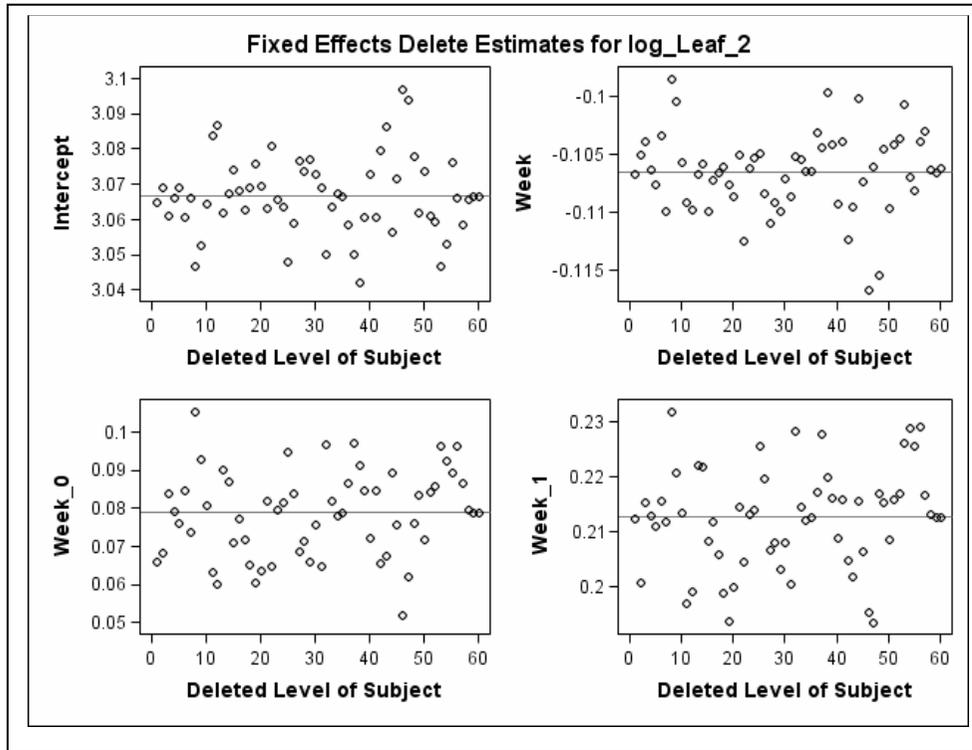

Fig. B2.1: Estimates of fixed parameters obtained after the removal of each data point for the quadratic model with no random effects and  $\omega_i = UN$ .

Model = random effects model with  $\omega_i = \text{ARH}(1)$  and  $\Sigma = \text{UN}$

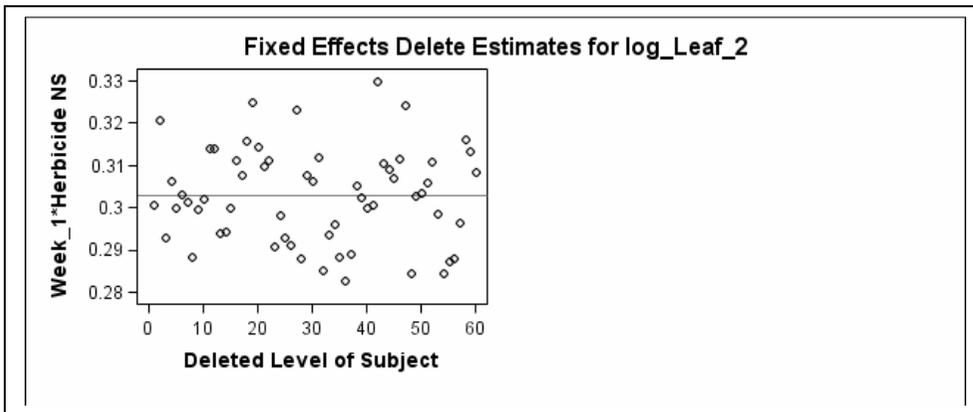

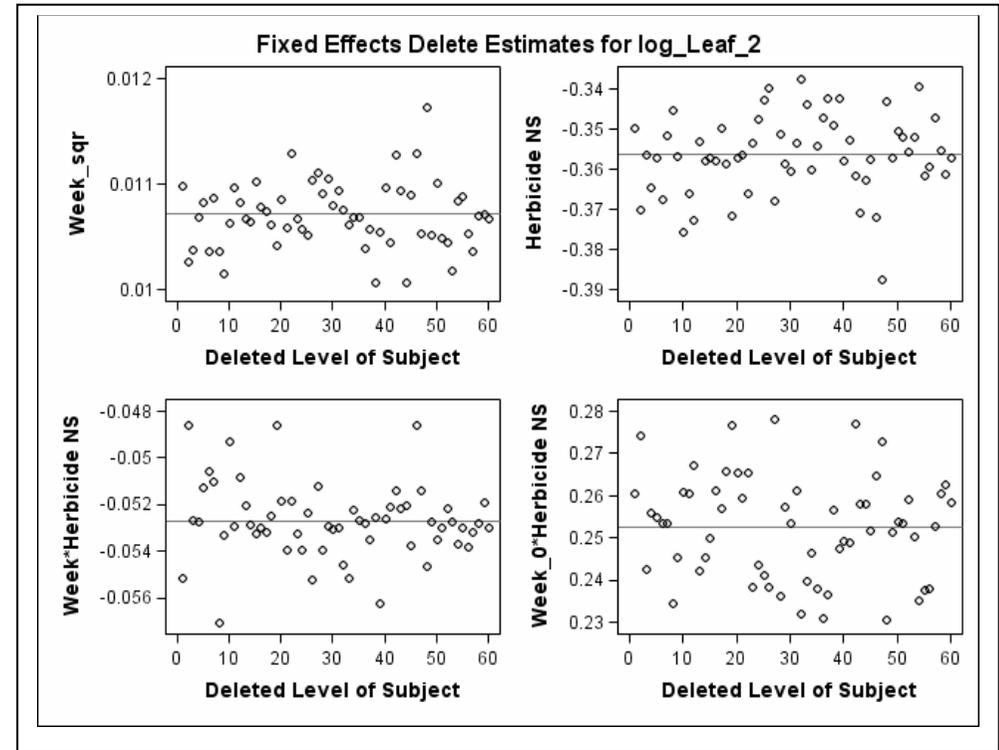

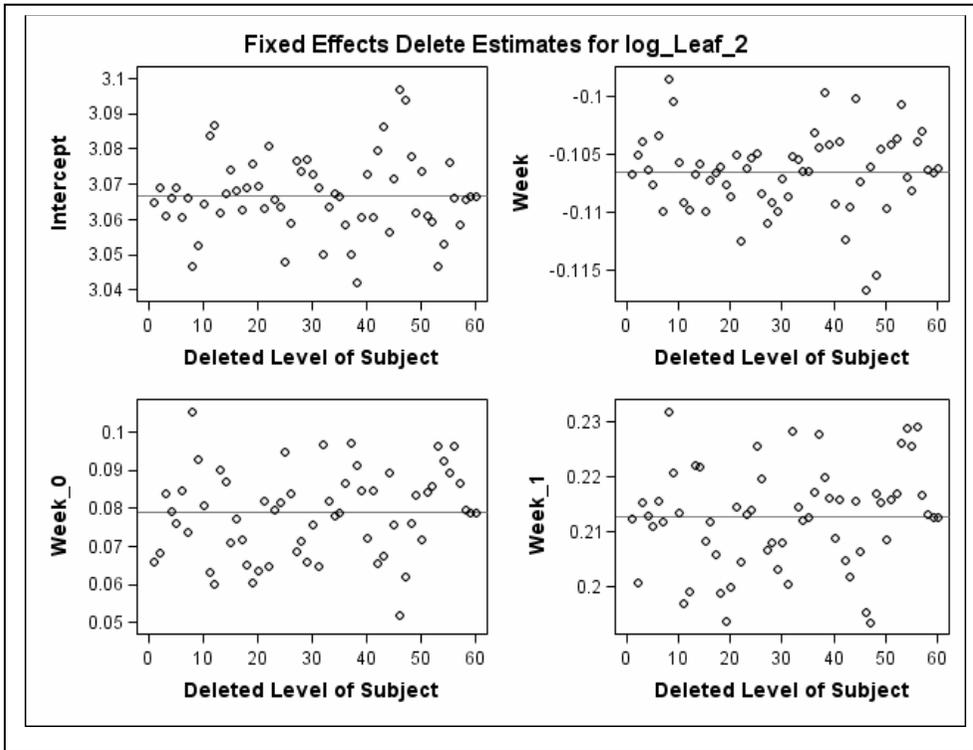

Fig. B2.2: Estimates of fixed parameters obtained after the removal of each data point for the quadratic model with random intercept and slope and  $\omega_i = \text{ARH}(1)$  and  $\Sigma = \text{UN}$ .

Model = random effects model with  $\omega_i = \text{AR}(1)$  and  $\Sigma = \text{UN}$
