APPENDIX TWO

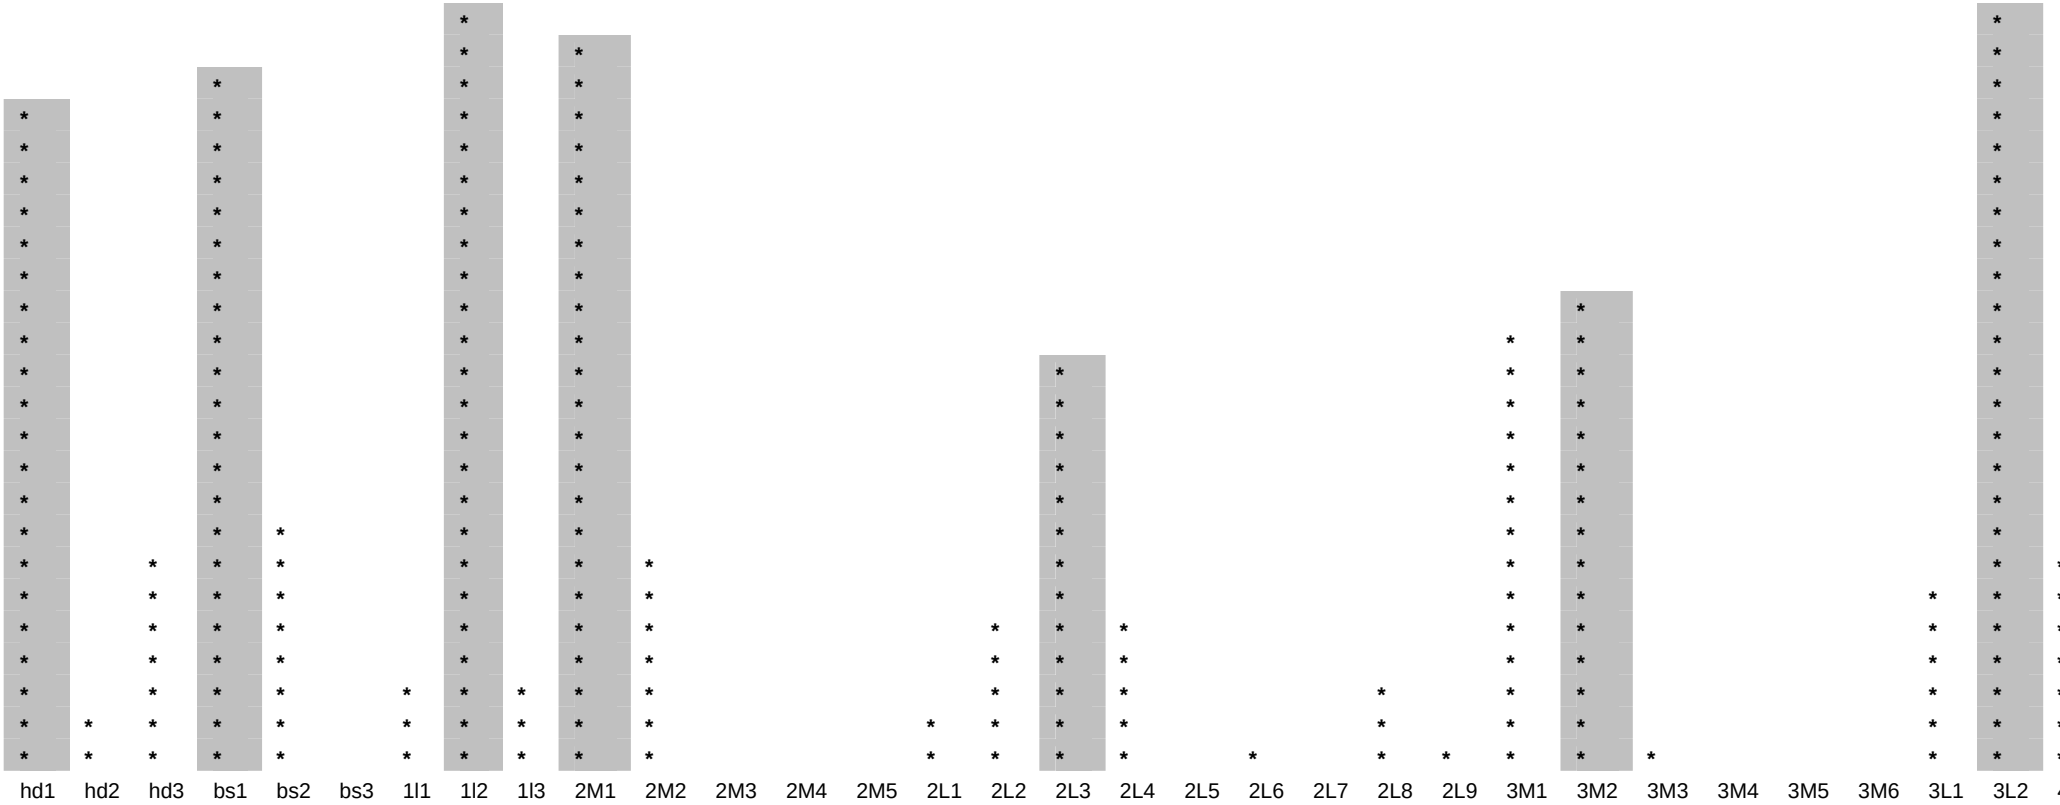

Figure A5.1: Histogram of the frequency of variation in the Sotho female subgroup. Shaded areas represent the common condition in each bone.

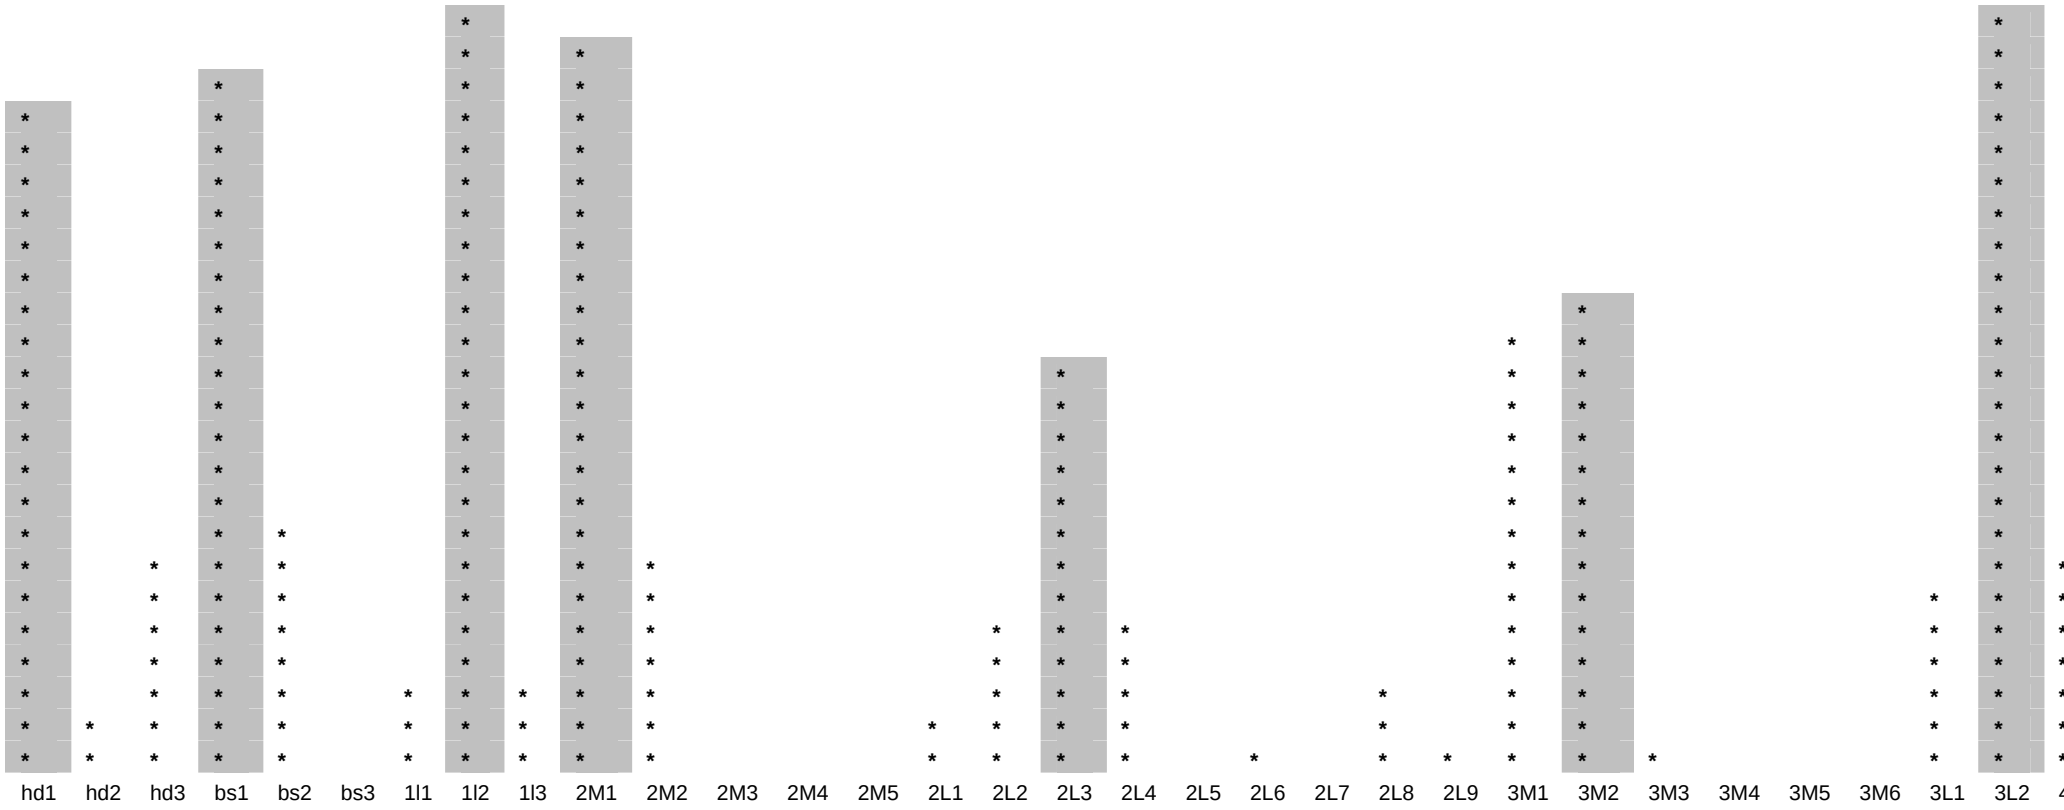

Figure A5.2: Histogram of the frequency of variation in the Sotho male subgroup. Shaded areas represent the common condition in each bone.

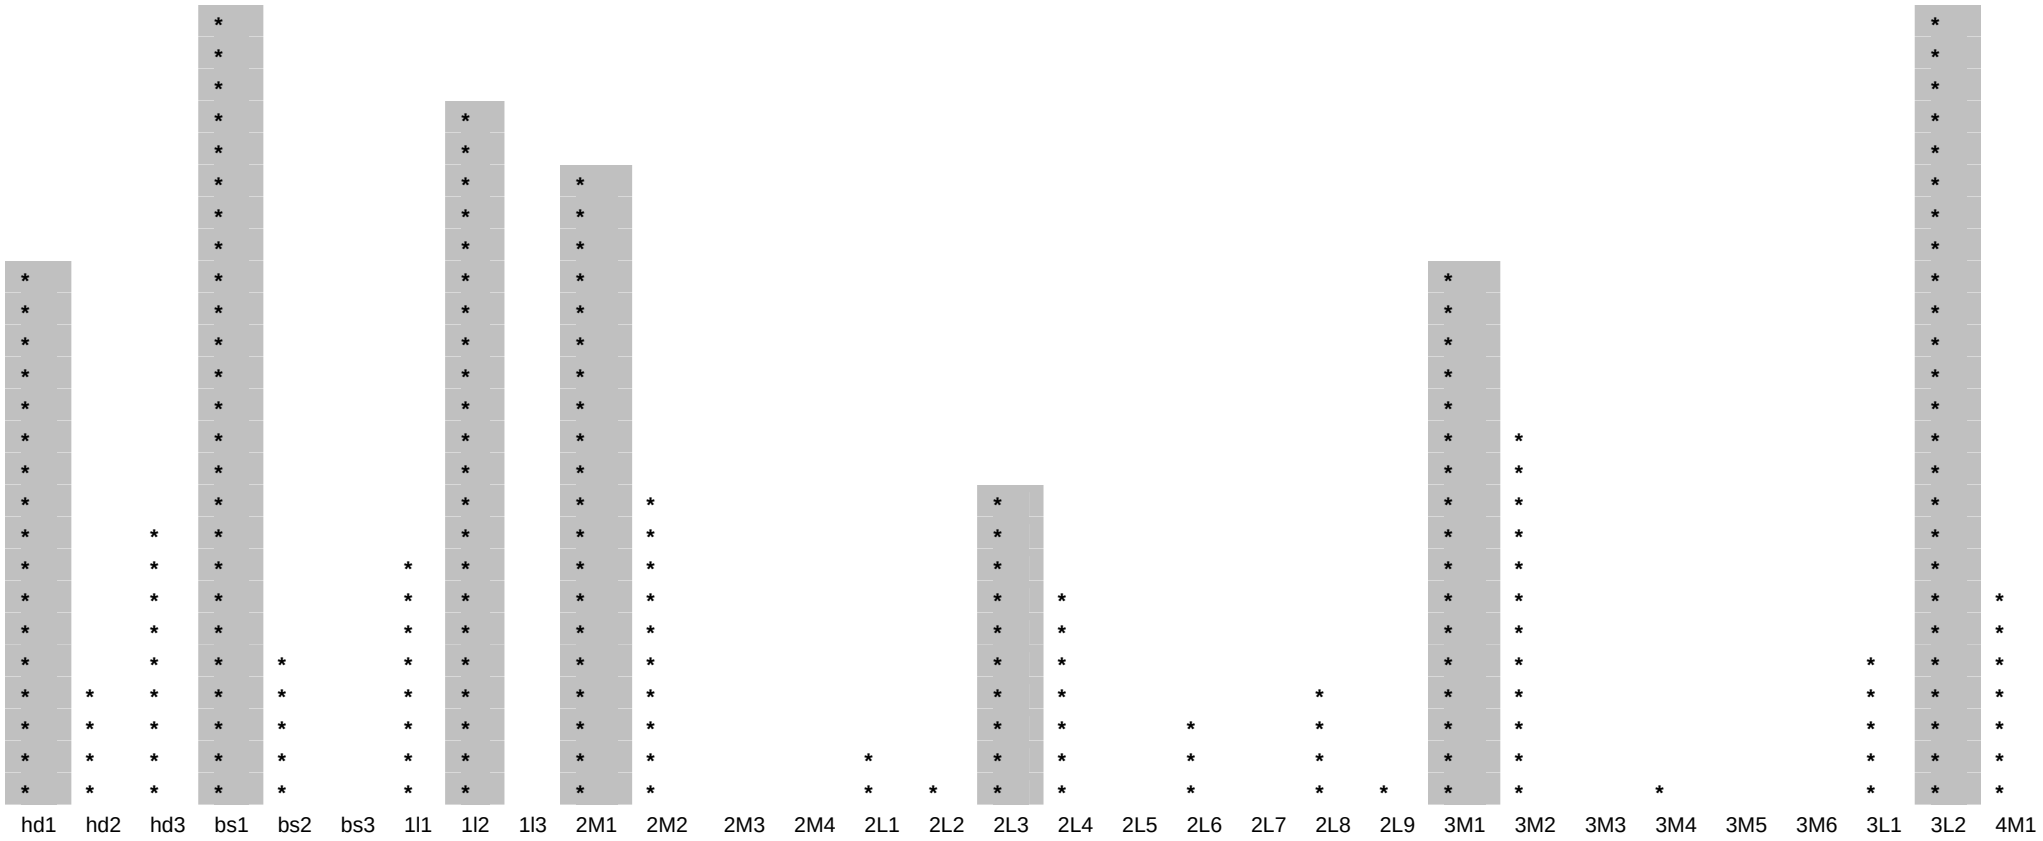

Figure A5.3: Histogram of the frequency of variation in the Zulu female subgroup. Shaded areas represent the common condition in each bone.

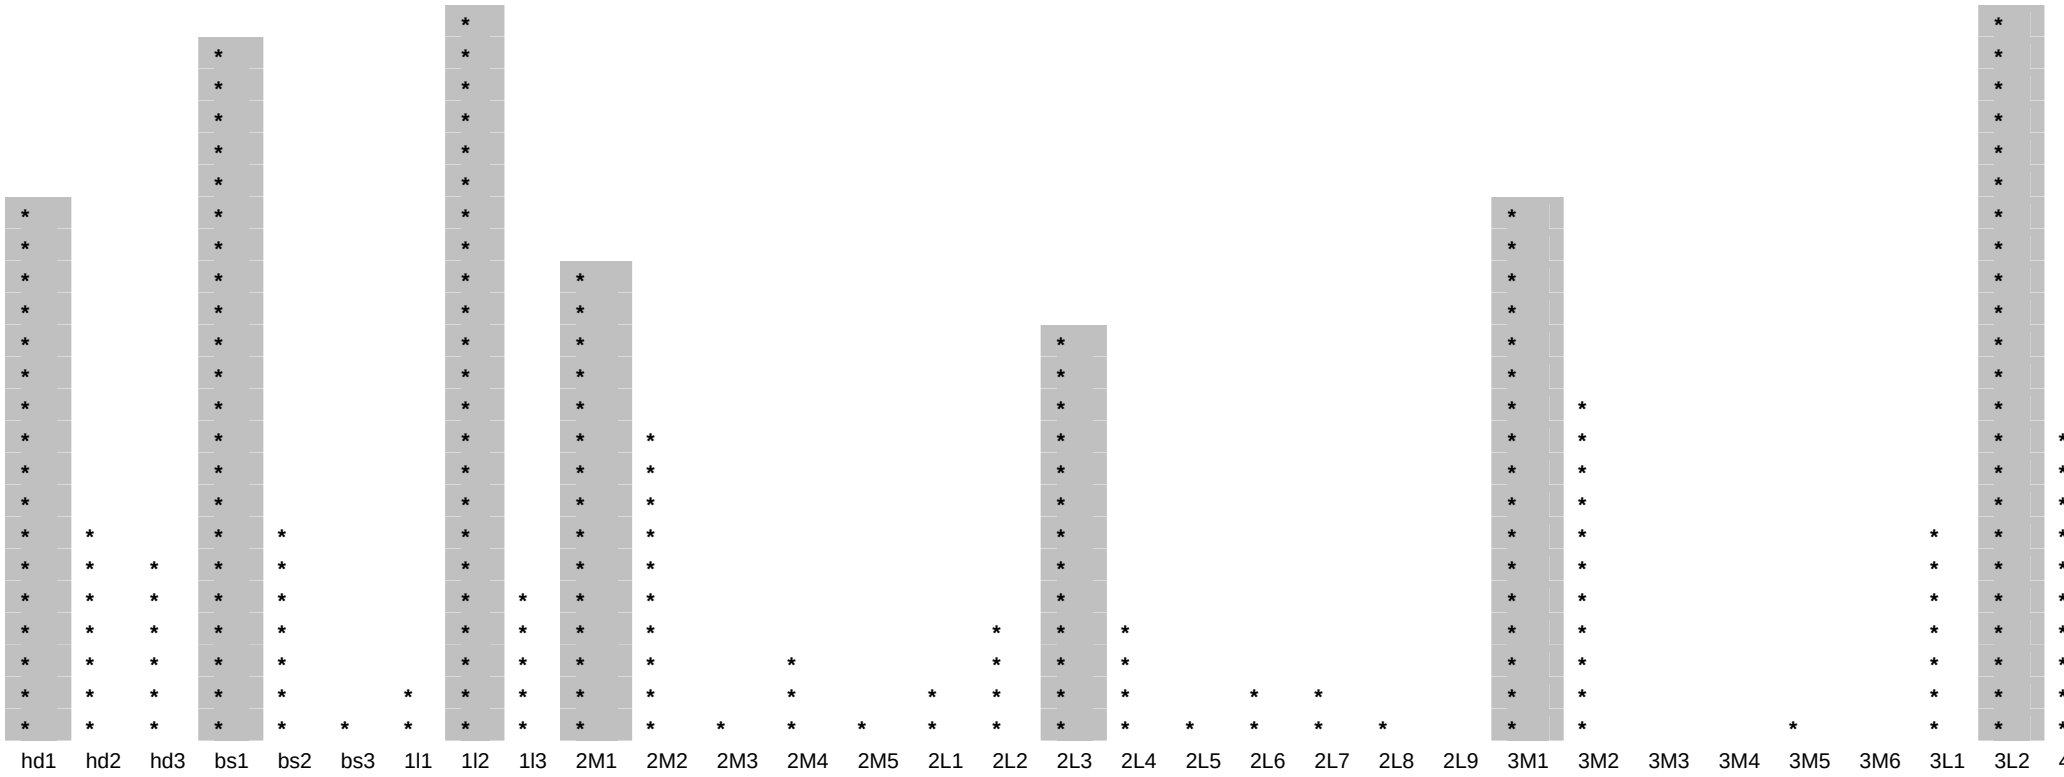

Figure A5.4: Histogram of the frequency of variation in the Zulu male subgroup. Shaded areas represent the common condition in each bone.

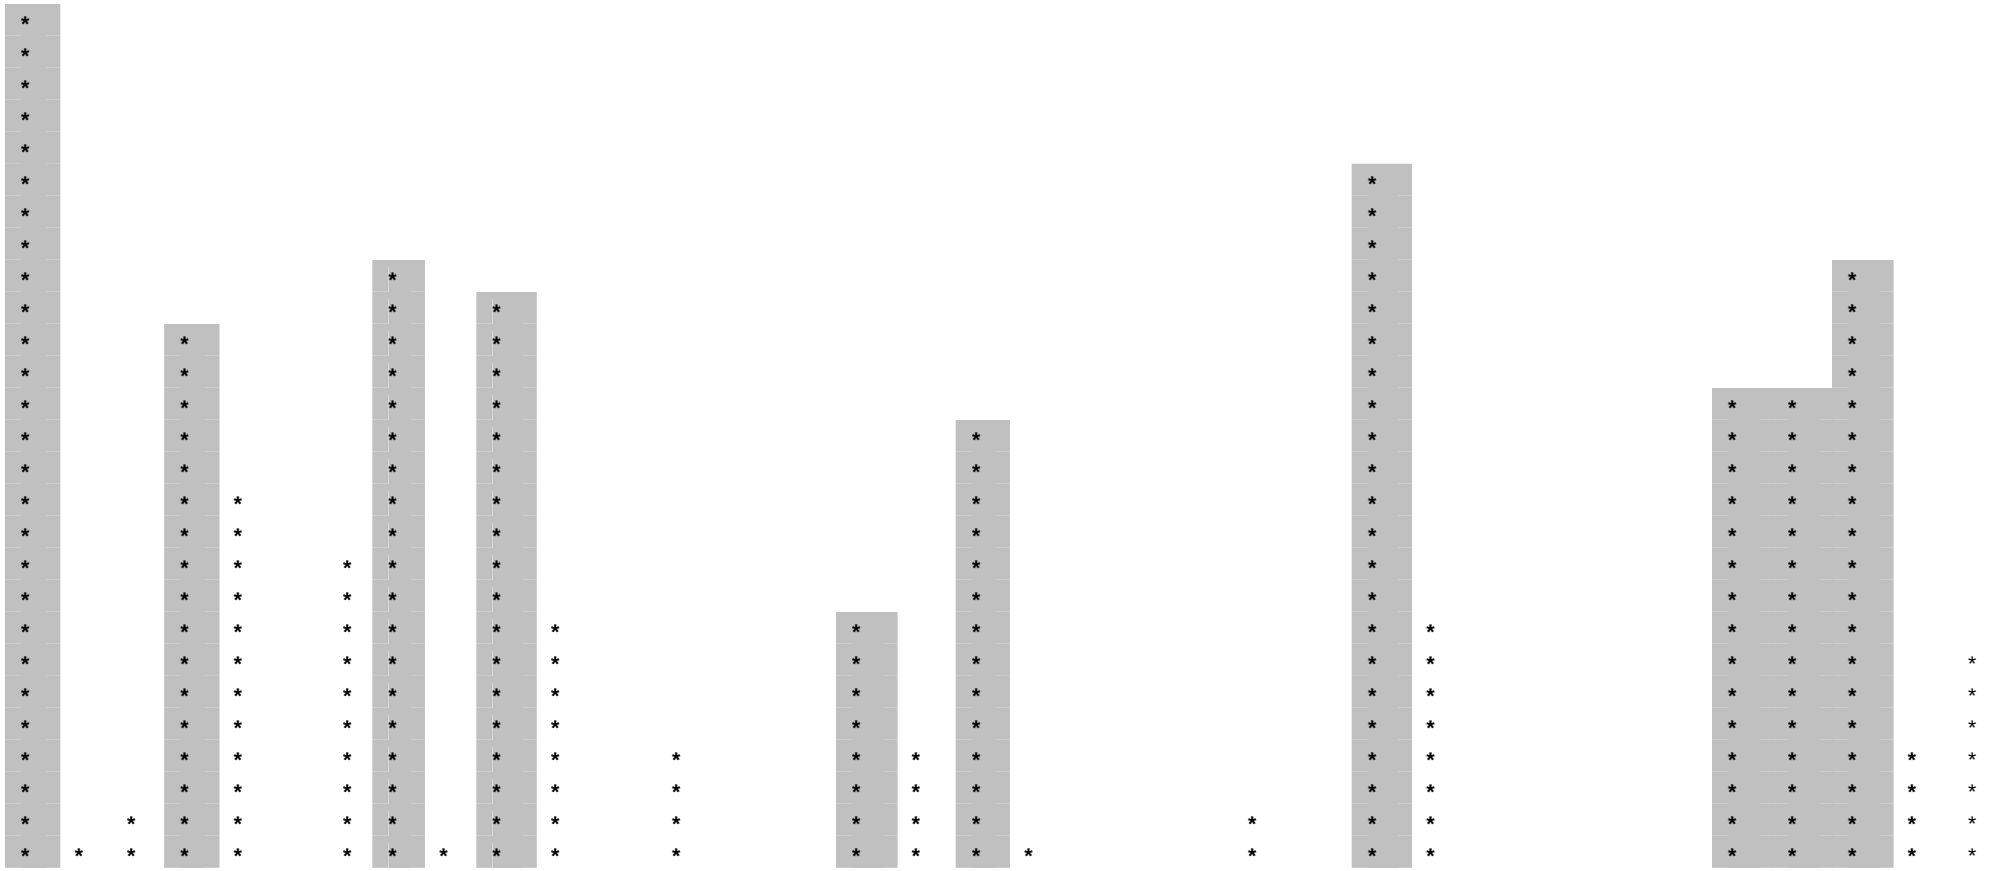

Figure A5.5: Histogram of the frequency of variation in the European female subgroup. Shaded areas represent the common condition in each bone.

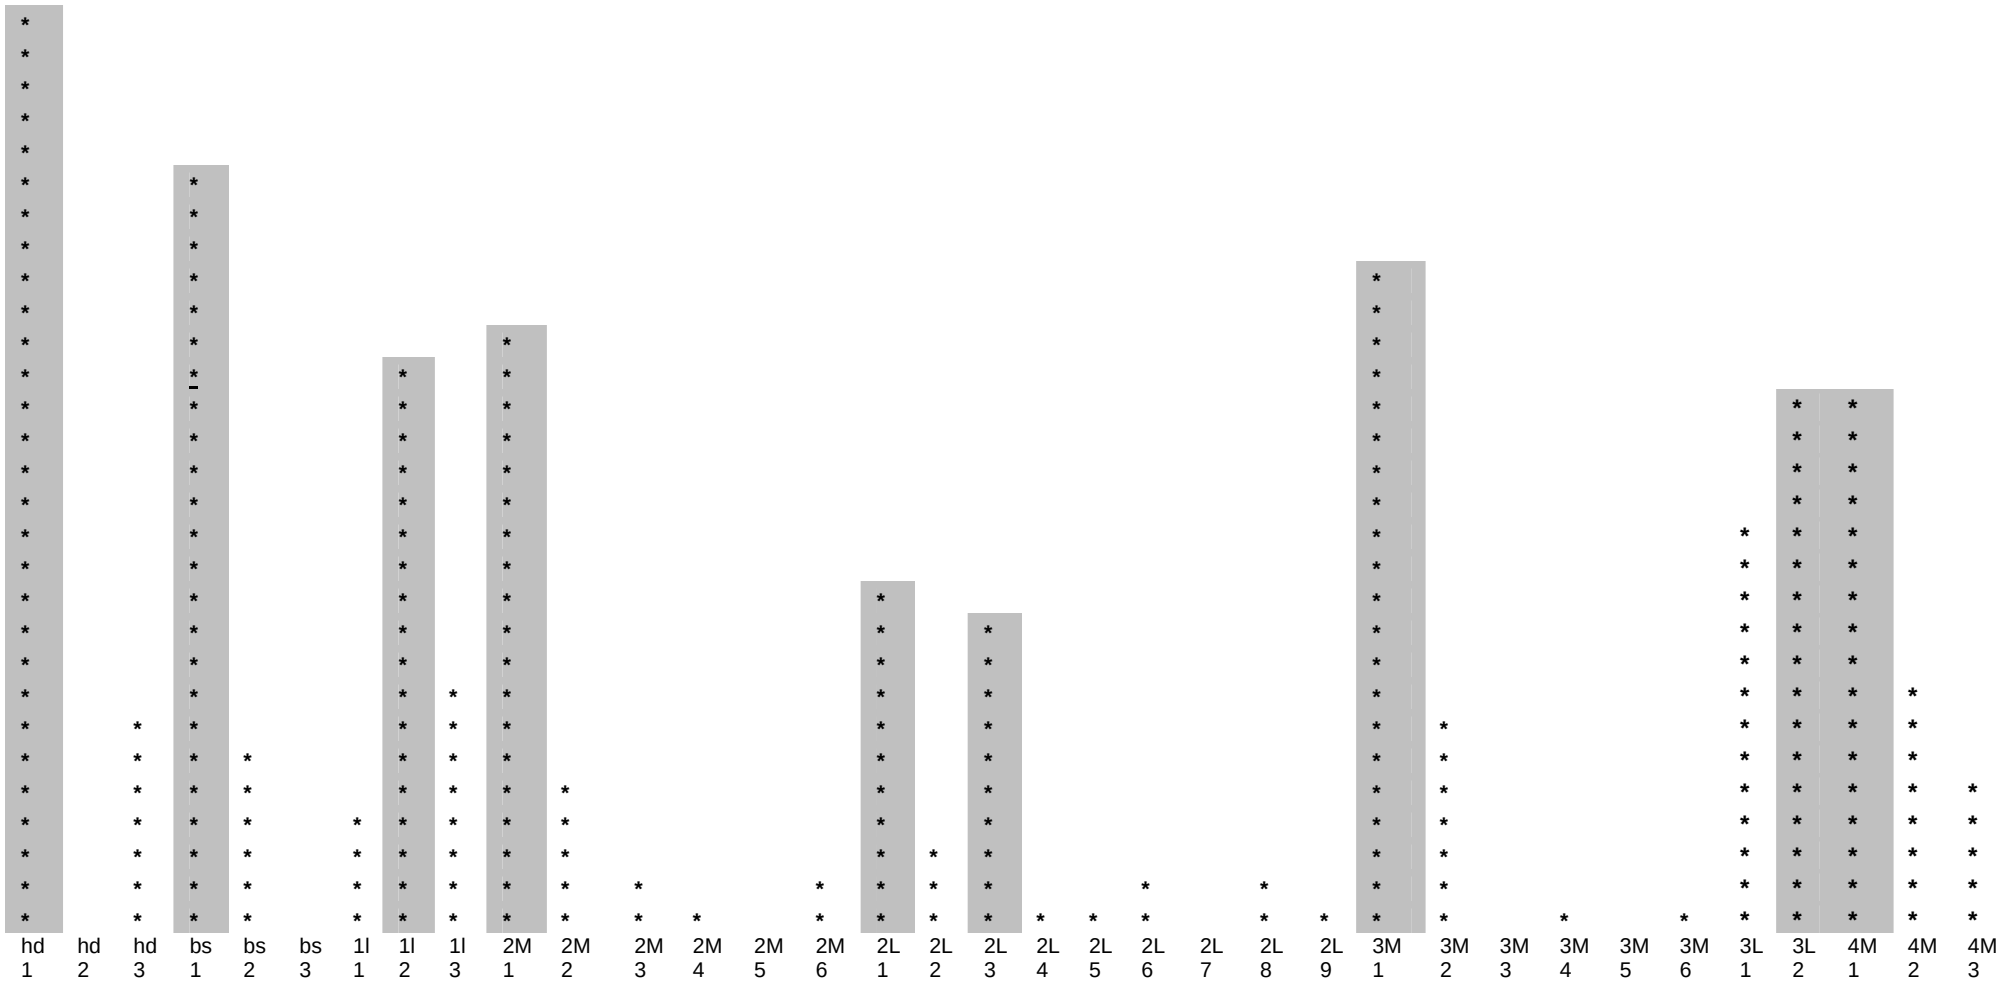

Figure A5.6: Histogram of the frequency of variation in the European male subgroup. Shaded areas represent the common condition in each bone.

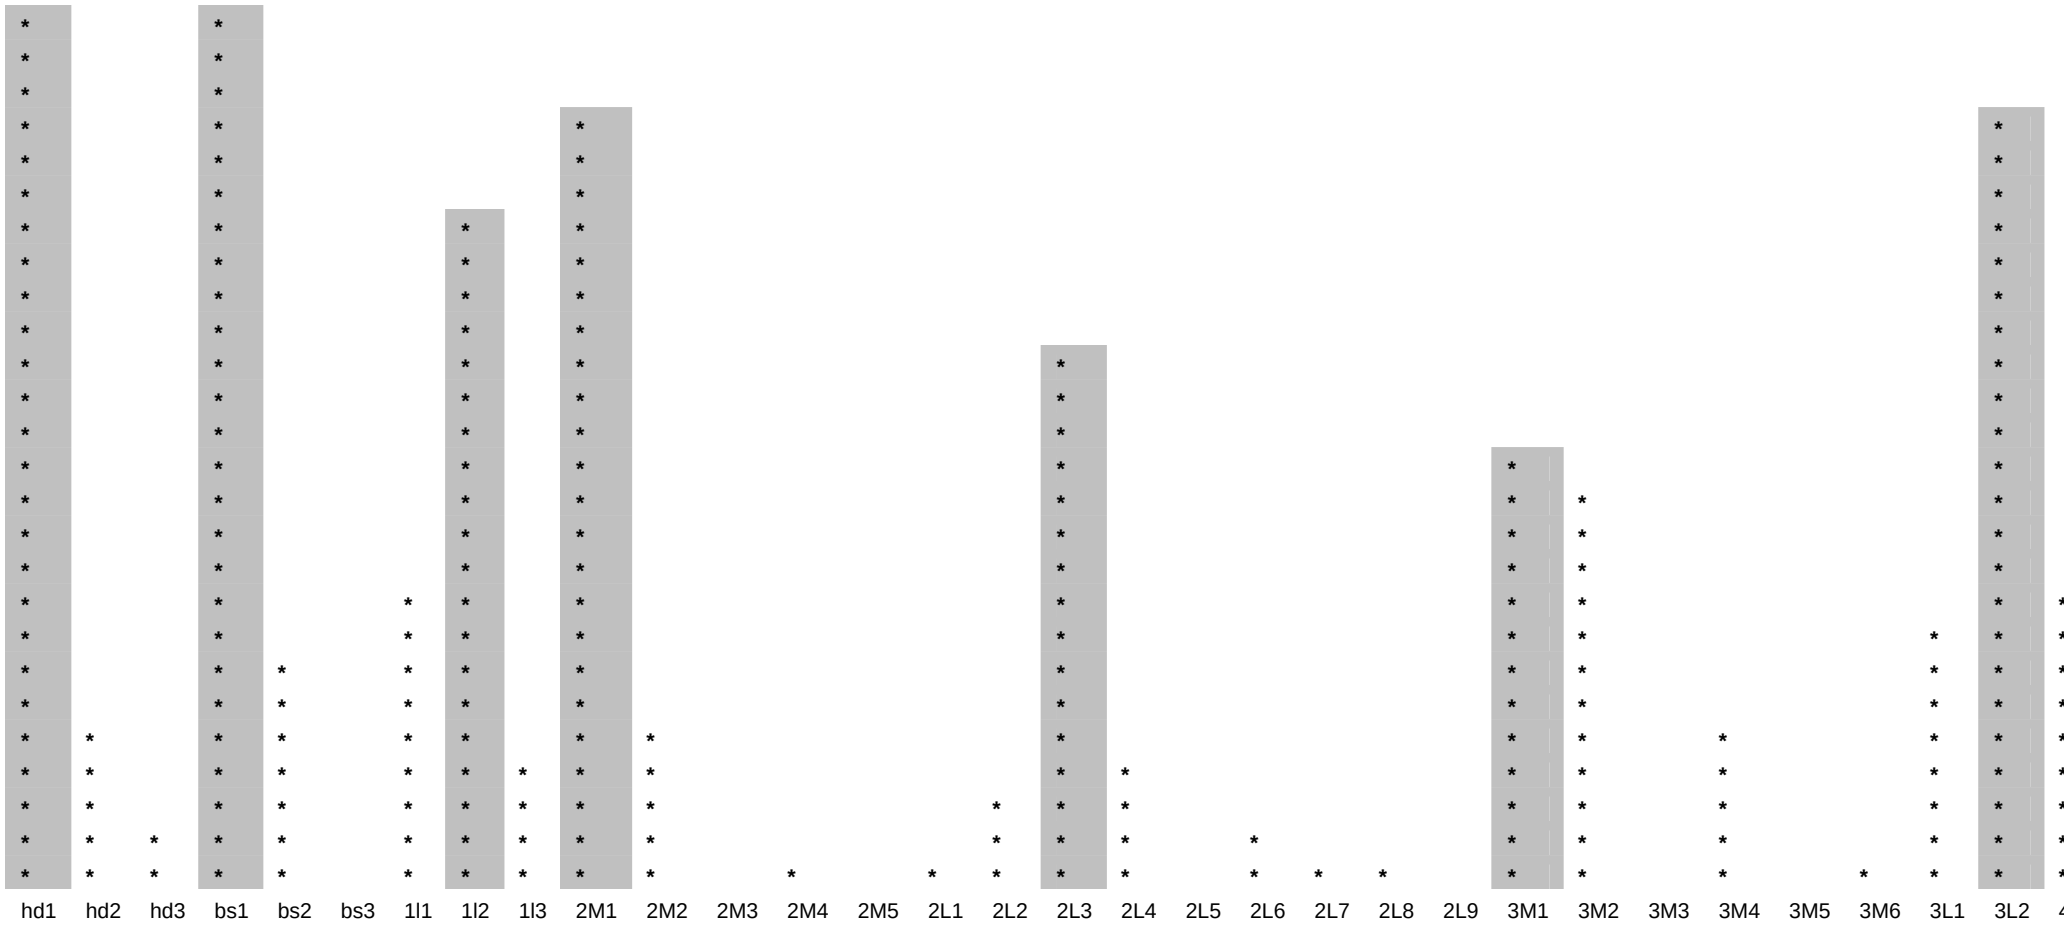

Figure A5.7: Histogram of the frequency of variation in the Pre-pastoral pooled and sex indeterminate subgroup. Shaded areas represent the common condition in each bone.
