

Declaration

I declare that this thesis is my own unaided work in fulfilment of the degree of Doctor of Philosophy in the School of Geography, Archaeology and Environmental Studies in the University of Witwatersrand, Johannesburg. This thesis has not been submitted previously for any degree or examination at any other university.

I further declare that the work presented in the thesis:

DIRECT RADIATIVE FORCING BY AEROSOLS OVER SOUTHERN AFRICA

is authentic and original unless clearly indicated otherwise and in such instances full reference to the source is acknowledged and I do not pretend to receive any credit for such acknowledged quotations, and that there is no copyright infringement in my work. I declare that no unethical research practices have been used and no material gained through dishonesty. I understand that plagiarism constitutes a serious offence and, should I contravene the Plagiarism Policy (notwithstanding signing this affidavit), I may be found guilty of a serious criminal offence (perjury) that would compel the University to inform all other tertiary institutions of the offence. The University would also be able to issue a corresponding certificate of reprehensible academic conduct to whoever may request such a certificate from the institution.

Antonio Joaquim Queface
