

**Investigating the relationship between attitudes towards tablet usage, access, learning styles, motivation and learner achievement in a blended learning environment.**

---

A research project submitted in partial fulfillment of the requirements for the degree of MA in Social and Psychological Research in the Faculty of Humanities, University of the Witwatersrand, Johannesburg.

**Samantha Hart (388619)**  
**Supervisor: Sumaya Laher**

## Declaration

I declare that this research project is my own, unaided work. It has not been submitted before for any other degree or examination at this or any other university.

| 2.11 Data Analysis                                                                                                                                                                                                    | 41-43  |
| 2.12 Conclusion                                                                                                                                                                                                       | 43     |
| <b>Chapter 3: Results</b>                                                                                                                                                                                             | 44-86  |
| 3.1 Introduction                                                                                                                                                                                                      | 44     |
| 3.2 Research Question 1: What are the levels of access to tablets and other forms of technology for the sample?                                                                                                       | 45-48  |
| 3.3 Research Question 2: What are learners' attitudes towards the use of tablets?                                                                                                                                     | 49-51  |
| 3.4. Research Question 3: What are the factors which influence overall attitudes towards tablet usage?                                                                                                                | 51-58  |
| 3.4.1 Research Question 3.1: What are the factors which influence the perceived enjoyability, perceived ease of use and perceived usefulness of using tablets?                                                        | 58-72  |
| 3.4.2 Research Question 4: To what extent do overall attitudes towards tablet usage, learning style preferences motivation and access predict academic achievement?                                                   | 73-76  |
| 3.4.3 Research Question 4.1: To what extent to perceived enjoyability, perceived ease of use, perceived usefulness, motivation and access predict academic achievement?                                               | 76-79  |
| 3.4.4 Research Question 5: To what extent do overall attitudes, learning style preferences, access and motivation predict learners' desire to continue / discontinue using tablets in a blended learning environment? | 80-84  |
| 3.3 Conclusion                                                                                                                                                                                                        | 84-86  |
| <b>Chapter 4: Discussion</b>                                                                                                                                                                                          | 87-105 |

|                                                                         |         |
|-------------------------------------------------------------------------|---------|
| 4.1 Introduction                                                        | 87-89   |
| 4.2 Levels of access to tablets and other forms of technology           | 90      |
| 4.3 Learner attitudes towards tablets in a bended learning environment  | 90-94   |
| 4.4 What influences learner attitudes?                                  | 95-100  |
| 4.4.1 Learning styles and learner attitudes                             | 95-98   |
| 4.4.2 Motivation and learner attitudes                                  | 98-90   |
| 4.4.3 Access and learner attitudes                                      | 99-100  |
| 4.5 What influences learner achievement                                 | 100-102 |
| 4.5.1 Attitudes                                                         | 101     |
| 4.5.2 Learning Styles                                                   | 101-102 |
| 4.5.3 Access                                                            | 102-103 |
| 4.6 The role of attitudes in learners desires to continue using tablets | 103-104 |
| 4.7 Conclusion                                                          | 105     |
| <b>Chapter 5: Limitations and Recommendations</b>                       | 106-111 |
| 5.1. Introduction                                                       | 106     |
| 5.2 Conceptual limitations                                              | 106-107 |
| 5.3 Methodological limitations                                          | 107-109 |
| 5.4 Recommendations                                                     | 109-112 |
| 5.5 Conclusion                                                          | 112     |
