Acknowledgements	ii
Abstract	iii
List of tables	iv
List of figures	v
CHAPTER 1: INTRODUCTION	1
1.1 Background and rationale for the study	1
1.2 Aims and objectives of the study	6
1.3 Methodology	7
1.4 Potential significance of the study	8
1.5 Organisation of the report	9
CHAPTER 2: THEORETICAL FRAMEWORK FOR THE STUDY	
2.1 Historical backdrop to the study of infant feeding	10
2.2 The influence of African culture on infant feeding	11
2.3 Breastfeeding in South Africa in the context of the HIV/AIDS crisis	13
2.4 Transmission of HIV/AIDS through breast-feeding	15
2.5 Advantages of breastfeeding	17
2.6 Disadvantages of breastfeeding	18
2.7 Nutritional support as a form of early intervention for infants with HIV/AIDS	21
2.8 Alternatives to breast milk	23
2.9 Policies regarding feeding	25

2.10 Feeding policy at Coronation hospital	28
2.11 Summary of chapter	31
CHAPTER 3: METHODOLOGY	32
3.1 Primary aim	32
3.2 Secondary objectives	32
3.3 Research design	33
3.4 Participants	34
3.4.1 Sampling procedure	35
3.4.2 Participant inclusion criteria	36
3.4.3 Participant exclusion criteria	37
3.4.4 Demographic data	37
3.5 Research instrumentation	40
3.5.1 Motivation for the use of an interview schedule for data collection	40
3.5.2 Construction of the interview schedule	41
3.5.3 Content of the interview schedule	43
3.5.3.1 Information sheet	43
3.5.3.2 Consent forms	43
3.5.3.3 Content areas covered in the interview schedule	44
3.6 Research protocol	46
3.6.1 Application to the University of the Witwatersrand Human Research Ethics Committee (Medical)	46
3.6.2 Pre-testing the interview schedule	47
3.6.3 Setting	47
3.6.4 Data collection	48
3.7 Data analysis	50
3.8 Validity and reliability issues	51
3.9 Ethical considerations	52
3.10 Summary of the chapter	53

CHAPTER 4: RESULTS AND DISCUSSION	54
4.1 Introduction	54
4.2 Feeding practices of participants	54
4.2.1 The feeding practices in relation to previous children	54
4.2.2 The type of feeds given to the infants in the study since birth	57
4.3 Attitudes towards breastfeeding	59
4.3.1 What feed was regarded as best for infants	59
4.3.2 Persons perceived to influence the decision regarding infant feeding	61
4.4 Formula and bottle-feeding	65
4.5 Infants receiving both formula and breast milk	68
4.6 Awareness of HIV transmission routes	71
4.7 Antenatal and HIV counselling	73
4.8 Participants' feelings regarding their HIV positive status	75
4.9 Participants' perceptions of their communities' attitudes towards bottle-feeding	79
4.10 Formula and bottle-feeding practices	83
4.10.1 Bottle-feeding practices	84
4.10.2 Final consumption point of the formula	86
4.11 Summary of the chapter	87
CHAPTER 5: CONCLUSIONS AND IMPLICATIONS	89
5.1 Conclusions arising from the study	89
5.2 Limitations of the study	89
5.3 Implications for early intervention and the clinical practice of speech-language pathology	91
5.4 Implications for infant feeding policies of hospitals	95
5.5 Implications for future theory and education	96
5.6 Implications for future research	96

5.7	Concluding comment	98
