*Statistically significant differences in % susceptibility between 2013 and 2017

Fig. 1. Percentage of Enterobacteriaceae isolates susceptible to routinely tested antimicrobial agents, 2013 versus 2017.

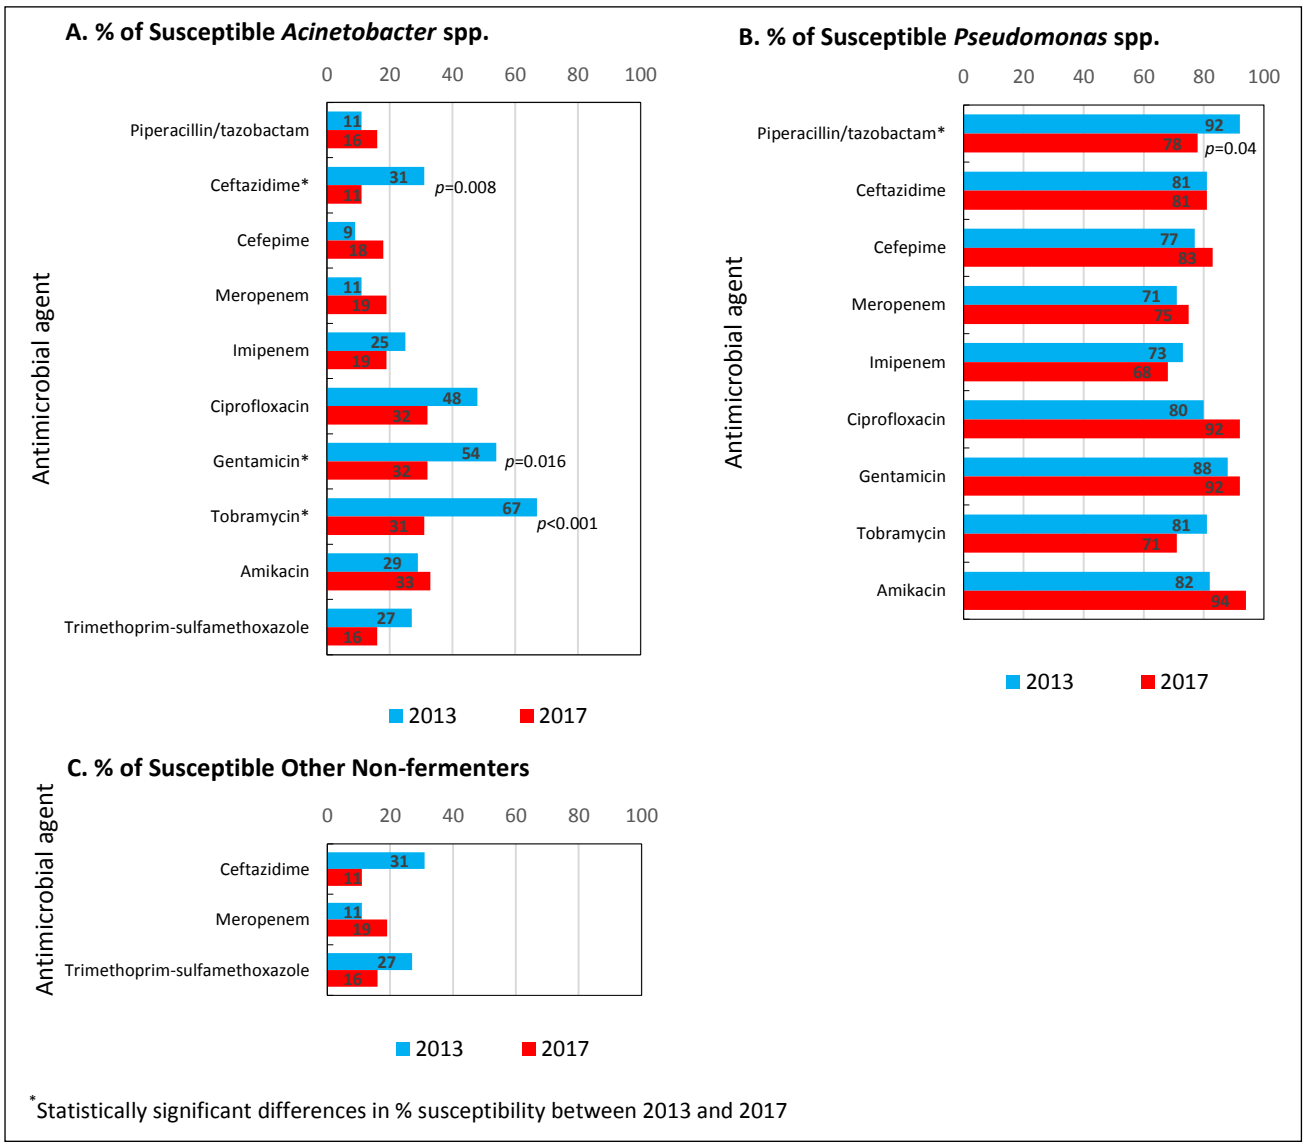

Fig. 2. Percentage of non-fermentative gram-negative bacteria susceptible to routinely tested antimicrobial agents, 2013 versus 2017.

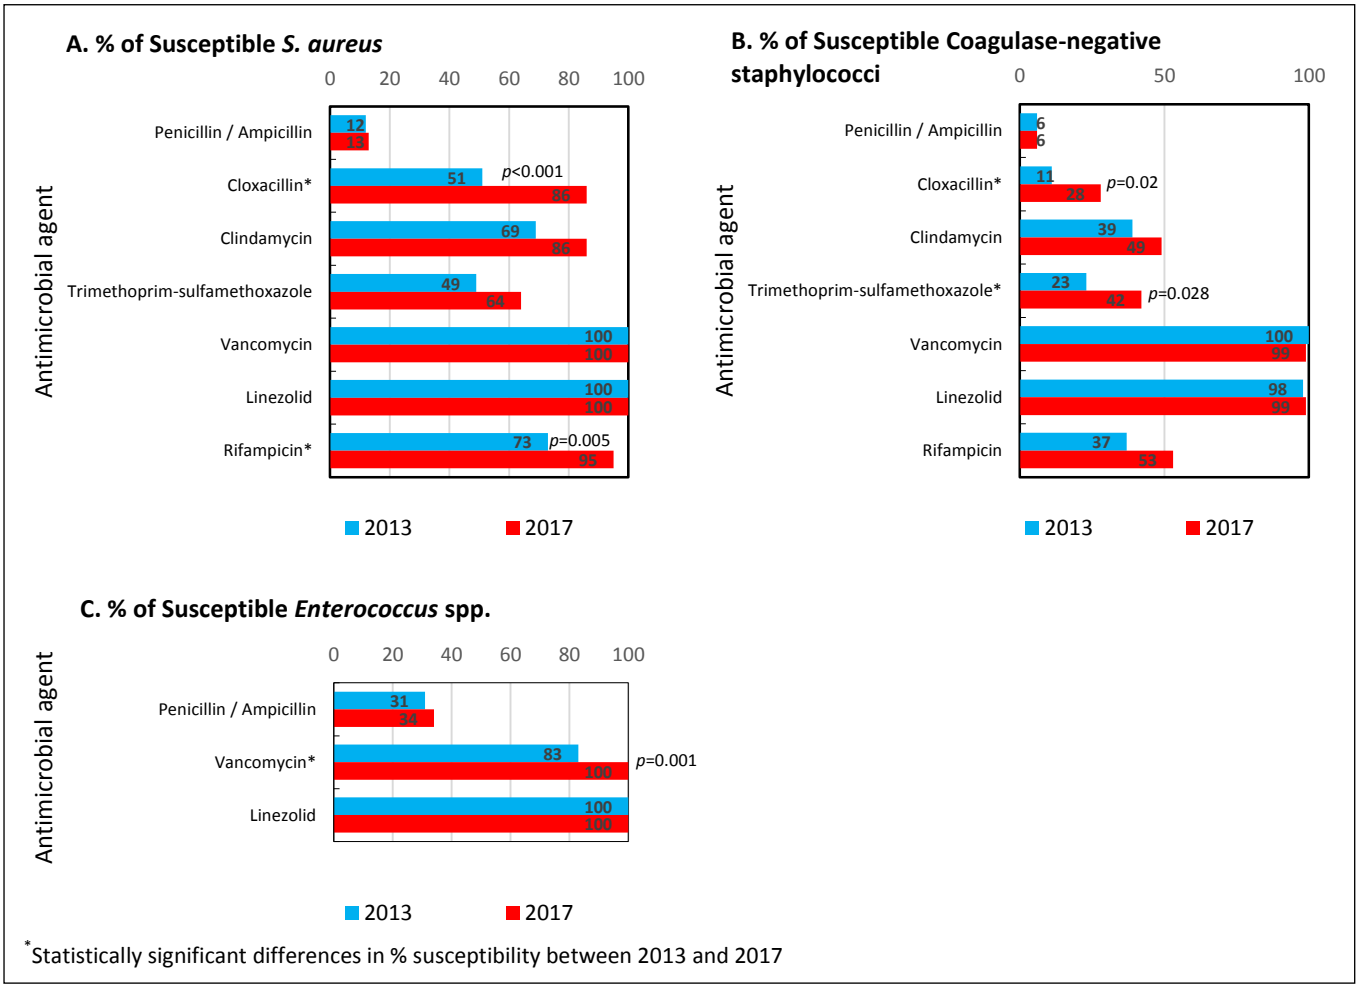

Fig. 3. Percentage of gram-positive isolates susceptible to routinely tested antimicrobial agents, 2013 versus 2017.

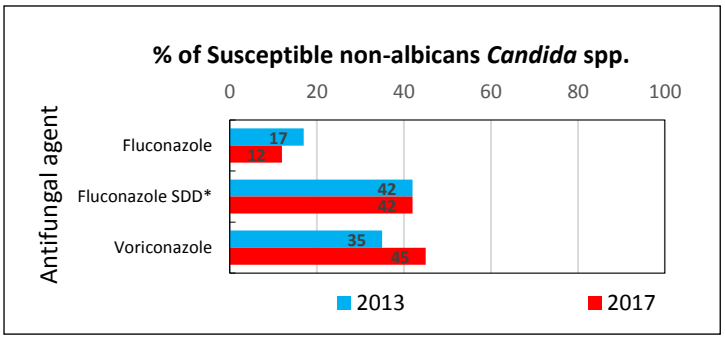

Fig. 4. Percentage of non-albicans Candida spp. susceptible to routinely tested antifungal agents, 2013 versus 2017.
