List of Tables

Table 2.1 Abbreviated version of the model of progression in learners' understanding of validity. 25

Table 2.2 Comparison of levels of understanding in the model (Albers, 2003) and Bloom's taxonomy. 26

Table 2.3 Levels of openness of inquiry in laboratory activities 29

Table 4.1 Model of learners' understanding of validity in experiments 55

Table 4.2 Responses to probe 1: selecting the independent variable 57

Table 4.3 Frequencies of learners' foci for selecting the independent variable 58

Table 4.4 Responses to probe 2: selecting the most important control variables 60

Table 4.5 Frequencies of learners' foci for determining the control variables 61

Table 4.6 Responses to probe 3: determining the suitable interval and range for the independent variable (IV) 63

Table 4.7 Frequencies of learners' foci for choosing interval and range of the independent variable (IV) 64

Table 4.8 Description of levels of understanding in the model (Albers, 2003) and how they fit into Bloom's taxonomy. 65

Table 5.1 Frequencies of learners' responses to the question about control variables 75

Table 5.2 Frequencies of learners' responses on choice of independent variable 78

Table 5.3 Frequencies of learners' responses on choice of dependent variable 78

Table 5.4 Frequencies of learners' responses to the question about problem investigated 80

Table 5.5 Frequencies of learners' responses on method description 81

Table 5.6 Frequencies of learners' responses to 'straight line graph' 83

Table 5.6.1 Breakdown of learners' responses to 'straight line graph' 84

Table 5.7 Frequencies of learners' responses on drawing conclusions from data 86
