ACKNOWLEDGEMENTS

First and foremost I would like to thank God for making this possible and for seeing me through all the difficulties I have faced during the course of my Masters degree.

I would like to thank my supervisor, Professor Clifford Odimegwu, who assisted me through the whole process and ensured that I performed to the best of my ability at all times. Without him it would not be possible to have completed this dissertation.

I would also like to make special mention to my tutor and mentor Nicole DeWet, who was always willing to spare her time and help me with any difficulties I faced during process of compiling my research.

I would also like to extend my sincerest thanks to Elizabeth Trew, for proof reading my research. Lastly, I would like to thank my family and friends for their love, support and encouragement throughout the period of my studies. I would not have been able to achieve this level in my academic career without them.
