

LIST OF FIGURES

Figure 1.1:	Experimental scheme of ICP-OES slurry analysis.....	10
Figure 3.1:	Microwave 3000 (Anton Paar GmbH).....	80
Figure 3.2:	Multiwave 3000 (Anton Paar GmbH) reaction vessels.....	83
Figure 3.3:	Fritsch GmbH Planetary Mono Mill “Pulverisette 6”.....	84
Figure 3.4:	Malvern Mastersizer S instrument.....	89
Figure 3.5:	ICP-OES schematic diagram (Arcinus, 2000).....	93
Figure 3.6:	Formation of plasma in the torch (Tissue, 1996. ICP excitation source).....	95
Figure 3.7:	Multi-channel instrument with a Rowland circle (Schwedt, 1997).....	98
Figure 4.1:	Schematic diagrams showing various mechanisms where stability may be lost in slurry dispersion.....	108
Figure 4.2:	Schematic diagram of the variation of free energy with particle separation according to DVLO theory.....	110
Figure 4.3:	Schematic diagram of the variation of free energy with particle separation at higher salt concentrations showing the possibility of a secondary minimum.....	111
Figure 4.4:	Steric repulsion and electrostatic or charge stabilization....	113

Figure 4.5:	(a) Lip-type vessel seals that allow hermetic closure of reaction vessels (b) Built-in micro-controller software for Multiwave 3000 sensor (c) Multiwave 3000 sensor (d) Air gap design of vessel casing for cooling.....	116
Figure 6.1:	Particle sizes and distribution as viewed under SEM (1 mm)	125
Figure 6.2:	Particle sizes and distribution as viewed under SEM (100 μ m)	125
Figure 6.3:	Particle sizes and distribution as viewed under SEM (10 μ m)	126
Figure 6.4:	Initial size distributions of particles in PGMs and gold concentrate.....	127
Figure 6.5:	16 hours grinding time at 150 rpm grinding speed histogram	129
Figure 6.6:	15 hours grinding time at 100 rpm grinding speed histogram	129
Figure 6.7:	14 hours grinding time at 100 rpm grinding speed histogram	130
Figure 6.8:	12 hours grinding time at 150 rpm grinding speed histogram	130
Figure 6.9:	8 hours grinding time at 150 rpm grinding speed histogram	131

Figure 6.10: 6 hours grinding at 100 rpm grinding speed histogram.....	131
Figure 6.11: 4 hours grinding time at 100 rpm grinding speed histogram	132
Figure 6.12: Percentage particle size distributions for grinding modes D – J	136
Figure 6.13: Percentage recoveries of Pt, Pd, Rh, Ru and Au for sample grinding modes A, B and C.....	138
Figure 6.14: Percentage recoveries of metals from slurry solutions A1, A2 and A3.....	140
Figure 6.15: Percentage recoveries of metals from slurry reagents B, B1, B2 and B3.....	142
Figure 6.16: Percentage recoveries of metals from slurry solutions of mixing modes C, C1 and C2.....	144
Figures 6.17: (a) Negative, neutral, positive and blank slurries at 0 minutes, (b) Negative, neutral, positive and blank slurries after 30 minutes, (c) Negative, neutral, positive and blank slurries after 40 minutes, (d) Negative, neutral, positive and blank slurries after 50 minutes and (e) Negative, negative + neutral, neutral, positive and blank slurries after 50 minutes.....	147
Figure 6.18: Percentage recoveries of metals from Triton X-100 and dodecylsulfonic acid sodium salt dispersant slurry solutions	149

Figure 6.19: Percentage recoveries of metals from Triton X-100 and tetrasodium pyrophosphate dispersant slurry solutions.....151

Figure 6.20: Percentage recoveries of metals from slurry solutions containing Triton X-100 dispersant at varied concentrations153

Figure 6.21: Platinum 265.945 wavelength peak for blank, 0.5 and 1 ppm standard solutions and samples A3,0.2 and C,0.2.....157

Figure 6.22: Palladium 342.124 wavelength peak for blank, 0.5 and 1 ppm standard solutions and samples A3,0.2 and C,0.2.....158

Figure 6.23: Rhodium 343.489 analytical wavelength peak for blank, 0.5 and 1 ppm standard solutions and samples A3,0.2 and C,0.2159

Figure 6.24: Ruthenium 187.534 analytical wavelength peak for blank, 0.5 and 1 ppm standard solutions and samples A3,0.2 and C,0.2.....160

Figure 6.25: Iridium 224.260 analytical wavelength peak for blank, 0.5 and 1 ppm standard solutions and samples C,0.1; C,0.1.7;C,0.2 and C,0.2,Se.....161

Figure 6.26: Osmium 228.226 analytical wavelength peak for blank, 0.5 and 1 ppm standard solutions and samples A3,0.2 and C,0.2.....162

Figure 6.27: Nebulizer – spray chamber – torch before modification....169

Figure 6.28: S-shaped elbow inserted between the spray chamber and the torch.....	170
Figure 6.29: Curved elbow fitted between the spray chamber and the torch	170
Figure 6.30: Curved elbow fitted securely in ICP-OES instrument.....	171
Figure 6.31: Calibration curve, detection limit (DL), background equivalence concentration (BEC) and correlation coefficient for platinum.....	176
Figure 6.32: Calibration curve, detection limit (DL), background equivalence concentration (BEC) and correlation coefficient for palladium.....	177
Figure 6.33: Calibration curve, detection limit (DL), background equivalence concentration (BEC) and correlation coefficient for gold.....	177
Figure 6.34: Calibration curve, detection limit (DL), background equivalence concentration (BEC) and correlation coefficient for rhodium.....	178
Figure 6.35: Calibration curve, detection limit (DL), background equivalence concentration (BEC) and correlation coefficient for ruthenium.....	178

Figure 6.36: Calibration curve, detection limit (DL), background equivalence concentration (BEC) and correlation coefficient for iridium.....	179
Figure 6.37: Standard addition calibration curve, regression line coefficient, concentrations and percentage recovery for platinum.....	180
Figure 6.38: Standard addition calibration curve, regression line coefficient, PGMs and Au concentrations and percentage recovery for palladium.....	181
Figure 6.39: Standard addition calibration curve, regression line coefficient, PGMs and Au concentrations and percentage recovery for gold.....	181
Figure 6.40: Standard addition calibration curve, regression line coefficient, PGMs and Au concentrations and percentage recovery for rhodium.....	182
Figure 6.41: Standard addition calibration curve, regression line coefficient, PGMs and Au concentrations and percentage recovery for ruthenium.....	182
Figure 6.42: Standard addition calibration curve, regression line coefficient, PGMs and Au concentrations and percentage recovery for iridium.....	183

Figure 6.43: Lewis structure of thiocyanate hybridization and Pt-SCN
structure.....270
