PREFACE.....	xxiv

CHAPTER 1

Introduction.....	1
--------------------------	----------

PART 1

1.1 The menstrual cycle.....	2
1.1.1 Overview of menstrual cycle physiology.....	2
1.1.2 Menstrual phases of a eumenorrhoeic cycle	5
1.1.3 Menstrual cycle characterisation: eumenorrhoea, oligomenorrhoea or amenorrhoea.....	6
1.1.4 Common indicators used as evidence of a eumenorrhoeic cycle.....	6
1.1.5 Influence of exercise on the concentration of the ovarian hormones.....	8

PART 2

1.2 Non-reproductive actions of the ovarian steroid hormones.....	9
---	---

1.2.1 Ovarian hormones and metabolism	9
1.2.1.1 Ratio of fat to carbohydrate used based on indirect calorimetry.....	10
1.2.1.2 Influence of menstrual phase on the hormonal regulators of metabolism	12
1.2.1.2.1 Insulin.....	12
1.2.1.2.2 Glucagon.....	13
1.2.1.2.3 Growth hormone.....	14
1.2.1.2.4 Cortisol.....	15
1.2.1.2.5 Catecholamines	16
1.2.1.3 Resultant effect of ovarian hormones on various aspects of carbohydrate metabolism.....	17
1.2.1.3.1 Plasma glucose concentration.....	17
1.2.1.3.2 Plasma lactate concentration.....	18
1.2.1.3.3 Muscle glycogen content quantified from muscle biopsies.....	19
1.2.1.3.4 Animal studies and carbohydrate metabolism.....	19
1.2.1.3.5 Glucose kinetics	21
1.2.1.3.6 Indirect estimation of muscle glycogen use	24
1.2.1.4 Resultant effect of the ovarian hormones on various aspects of fat metabolism.....	27
1.2.1.4.1 Plasma free fatty acid concentration.....	27
1.2.1.4.2 Plasma glycerol concentration.....	27
1.2.1.4.3 Systemic glycerol kinetics.....	28
1.2.1.4.4 Free fatty acid kinetics and the contribution of various lipid sources as metabolic fuel	30
1.2.1.4.5 Animal studies and fat metabolism	36

1.2.1.5	Influence of the ovarian hormones or gender on protein metabolism.....	40
1.2.2	Other non-reproductive physiological actions of the ovarian hormones...	42
1.2.2.1	Ventilation rate.....	42
1.2.2.2	Thermoregulatory system.....	45
1.2.2.3	Heart rate.....	46
1.2.2.4	Metabolic rate.....	47
1.2.2.5	Oestrogen's membrane stabilising and anti-oxidant properties.....	48
1.2.3	Summary of the non-reproductive physiological actions of oestrogen and progesterone and their potential consequences for exercise performance...	51
1.2.4	Effects of the ovarian hormones on exercise performance.....	51
1.2.4.3	Maximal exercise intensities.....	51
1.2.4.3.1	Maximal aerobic capacity.....	51
1.2.4.3.2	Lactate threshold and ventilatory anaerobic threshold.....	52
1.2.4.3.3	Short duration high intensity time to exhaustion.....	52
1.2.4.4	Submaximal exercise intensities.....	53
1.2.4.4.1	Time to exhaustion.....	53
1.2.4.4.2	Time trial performance.....	55
PART 3		
1.3	Stable tracer methodology to estimate plasma free fatty acid oxidation and kinetics.....	56
1.3.1	Estimating plasma FFA kinetics.....	56
1.3.1.1	General concepts.....	56

1.3.1.2	Infusion and sampling site.....	57
1.3.1.3	Equations for estimating substrate kinetics based on isotopic dilution...	59
1.3.2	Estimating the rate of plasma FFA oxidation.....	61
1.3.2.1	General concepts.....	61
1.3.2.2	Correcting for background carbon-13 recovery.....	62
1.3.2.3	Correcting for delays in label recovery due to label fixation.....	64
1.3.3	The acetate correction factor.....	68
1.3.3.1	Infusion time.....	69
1.3.3.2	Position of the carbon label	69
1.3.3.3	Metabolic rate and metabolic state.....	70
1.3.3.4	Training status.....	72
1.3.3.5	Substrate utilisation.....	73
1.3.3.6	Gender.....	73
PART 4		
1.4	Summary.....	74

CHAPTER 2

Oosthuysen T, Jackson S and Bosch AN (2003) Effect of menstrual phase on the acetate correction factor used in metabolic tracer studies.

Canadian Journal of Applied Physiology 28: 818-830.....	76
--	-----------

CHAPTER 3

Oosthuysen T, Gray DA, Davidson B, Apps P, Deftereos DAJ and Bosch AN.

Naturally cycling oestrogen and progesterone influences plasma free fatty acid kinetics during exercise. International Journal of Sports Science and Coaching (Submitted)

90

CHAPTER 4

Oosthuysen T, Jackson S and Bosch AN. Is 2-Hydroxypropyl- β -cyclodextrin a suitable alternative carrier to Human serum albumin for delivering FFA tracers by infusion in metabolic studies? Scandinavian Journal of Clinical and Laboratory Investigation (Submitted).....

123

CHAPTER 5

Oosthuysen T and Bosch AN. (2006) Influence of menstrual phase on ventilatory responses to submaximal exercise. South African Journal of Sports Medicine 18: 31-37.....

141

CHAPTER 6

Oosthuysen T, Jackson S and Bosch AN (2005) Cycling time trial performance during different menstrual phases. European Journal of Applied Physiology 94: 268-276.....

149

CHAPTER 7

Conclusions and Future directions.....	159
7.1 Conclusions.....	160
7.1.1 Menstrual cycle and metabolism.....	160
7.1.2 Effects of the menstrual cycle on exercise performance.....	162
7.1.2.1 As a consequence of alterations to FFA metabolism.....	162
7.1.2.2 As a consequence of alterations to ventilation.....	163
7.1.2.3 Based on actual measures of exercise performance.....	164
7.2 Future directions.....	166

CHAPTER 8
