APPENDIX 2

Appendix 2 is in the form of a CD Rom, which is attached. It includes the following data in Excel format for all beads studied (see Chapter 4 for explanations of terms):

Bead ID (my identification code for each bead)
Quantity (number of whole beads)
Quantity fragments (number of beads represented by the fragments)
How made
Structure
Shape
End treatment
Diameter
Size range
Length
Length ratio
Garden Roller (true, false field)
Diaphaneity
Munsell number
Colour name
Colour group
Bead series (when possible to determine)
Lustre
Patination (when left blank, beads were not patinated)
Decoration (rare)
Kidd & Kidd code
Details of where the beads were found in the site – details vary with site
Remarks (unusual or significant observations)

Presenting the data in this form not only reduces the bulk of the printed work but, more importantly, delivers it in a format that other researchers can easily utilize.
