IF YOU CAN'T GET IT THROUGH THE DOOR

Bring it into the Lecture Room by means of the new instant

8 mm. CASSETTE & SPECIAL 800E4 LOOP FILM PROJECTOR

Experience has proved the educational value of a series of short motion pictures, each concentrating on a single aspect of a subject. For demonstrating the single experiment in physics or chemistry, live-action shots in biology, dissection, technical skills in art, medicine, athletics, domestic science . . . the uses of the single concept film are innumerable. Loading is instant. There is no threading, no rewinding. The film is spliced into a continuous loop, and will repeat itself indefinitely. Control is easy with the remote control extension cable, or the simple switch on the projector.

Write or telephone to arrange a demonstration, or to obtain more information regarding the projector and the huge variety of films available.

V.I.P. (JNR.) going to school.

Shell is there to help him. Today perhaps he'll be learning from maps or films or film strips or from many other teaching aids supplied by Shell to schools everywhere. At universities, too, Shell plays its part. Every year, everyone of the fourteen South African universities receives a financial contribution from Shell and every year Shell awards a scholarship for post-graduate studies overseas. In every way Shell helps Education to turn the V.I.P. Jnrs. into V.I.P. Snrs. Another example of Shell in the life of South Africa.

Careers for Graduates

The Anglo American Corporation Group through its interests in mining, industry, research and other fields provides openings for satisfying and rewarding careers.

- In the Group's technical divisions there is broad scope for graduates in mining, chemical, mechanical, civil and electrical engineering and metallurgy.
- Graduates in science are able to participate in the many research projects conducted by the Group.
- Qualified geologists are needed for the continuous prospecting undertaken by the Group.

Interested persons should write to the Personnel Officer, 45 Main Street, Johannesburg.

THE MASTER COPYING METHOD

Head Office — Eloff Street, Johannesburg

The O.K. Bazaars is the largest retail organisation in South Africa, employing 15,000 people of all races. It has more than 90 branches in existence or in the planning stage in South Africa and a further 50 in Great Britain.

It offers a wide field of employment for school leavers and university graduates which includes branch managers, lawyers, industrial and clinical psychologists, nurses, staff trainers and personnel officers, accountants, architects, draughtsmen, electrical engineers, caterers, display artists — as well as selling and clerical staff. Selected male matriculants and graduates are given a unique five months residential training course to prepare them for managerial appointments, decided entirely by merit based on performance, and restricted only by the limits of the capabilities of those seeking promotion.

OPPORTUNITY OF A LIFETIME . . .

Many staff services of practical and financial value are provided — Pension and Medical Aid Funds for males and females — Canteens offering wholesome meals at low cost — special Sick Leave facilities — and the accumulation of Long Leave.

School leavers and graduates may be recommended with confidence to make further enquiries regarding the many opportunities in this large and expanding company.

Those interested in obtaining details should be referred to:

The OK

. . . FOR A LIFETIME OF OPPORTUNITY

HOW SHALL WE FACE TOMORROW'S GREATEST CHALLENGE ?

Ever since the Newsom Report* came out there has been little doubt as to what the challenge is. The report pointed its finger in no uncertain manner towards television — firmly drawing attention to the increasingly important role it must inevitably play in education. Yet the subject remains highly controversial, and many people are uncertain about its full implication.

What is already abundantly clear is that television can be the world's most powerful medium for communication — almost certainly the most effective to be devised since the day the blackboard was invented. And of the several ways in which television can be used in education, it is probable that closed-circuit TV is potentially the most valuable.

**'Half Our Future', the Newsom Report on Secondary Education published by the Central Advisory Committee for Education, October* 1963.

THE EXPERIENCE THAT CAN HELP

We at Pye H.D.T. have already gained a wealth of experience in this field. Just as the Pye group pioneered closed-circuit TV in Europe in 1952 so Pye H.D.T. have pioneered the use of this medium in every aspect of education. Not only were we the first people to introduce closed-circuit television into this country's schools, we are also installing — in Glasgow — the world's largest educational TV system, while at Brentwood we equipped the first teacher training college and at Cambridge the first British University, to use closed-circuit TV. No other company in the country has the knowledge and experience which Pye H.D.T. have built up over the past seven years. Our concentrated study in all parts of the world and the pioneering of complete installations of educational television systems in this country, has placed us in a unique position to offer advice based on *practical* experience of *all* aspects of educational television. The knowledge we have gained from this experience will, we believe, be of great value to you when you are weighing up the pros and cons of educational television.

BRAIN POOL READY TO ADVISE YOU NOW ON CLOSED-CIRCUIT TV

Our experts will gladly give you all the helpful advice they can. Indeed they will welcome an opportunity to discuss the whole future of educational TV with you. For they are just as anxious as you to discover how the wisest possible use can be made of this immensely powerful medium.

What problems would you hope to solve by using closed-circuit TV? Tell us, and we will produce a complete plan, without any obligation, based entirely on the results of our discussion.

Introducing a Laboratory Approach to Developmental Reading Instructions for Schools

Instruction is provided in a wide variety of reading skills which are introduced and developed in a carefully planned sequence. Instruction, training, or guidance are provided in twelve major areas which have been judged the most critical to the development of effective and efficient readers:

1. **Perceptual Skills:**
   Identification, recognition, and association of printed symbols with meaning
2. **Visual Functioning:**
   Binocular co-ordination and mobility
3. **Word Knowledge:**
   Central and transferred word meanings in contextual settings
4. **Word Attack Skills:**
   Structural and phonetic analysis
5. **Comprehension Fundamentals:**
   Recall, understanding, organizing
6. **Interpretation:**
   Concluding, comparing, predicting, sensing, visualizing
7. **Analytical Reading:**
   Minute detail and over-all structure
8. **Critical Reading:**
   Relevancy, accuracy, validity, significance
9. **Reference Skills:**
   Location of information
   Usage of materials
10. **Selective Reading:**
    Skimming
    Scanning
11. **Guidance in Reading:**
    Attitudes, habits, interests, taste
12. **Allied Communication Skills:**
    Listening, speaking, and writing

CAMBRIDGE

Education Through English

EVA ENGHOLM

Mrs Engholm's book is the record of an experiment in education in Uganda where she taught English and Art to African children. She explains how she first analysed each teaching situation and how she experimented until she got successful results. Her ideas are explained with many practical examples and suggestions from her own classwork. 25*s. net*

The Pronunciation of English

DANIEL JONES

'The masterly combination of thoroughness and conciseness which has kept this a standard work for over forty years still recommends it.' *The Use of English*

Paperback 11*s.* 6*d. net*

L'Enfant Noir

CAMARA LAYE

EDITOR: JOYCE A. HUTCHINSON

One of the best and most famous prose works from French-speaking West Africa. The vocabulary is simple and should be well within the scope of anyone who has reached English 'O' level French. There is a detailed introduction providing critical notes and a description of the author's childhood and background in Guinea. 12*s.* 6*d.*

Russian Pronunciation Illustrated

DENNIS WARD

Illustrated by GEORGE HIM

This book follows the pattern of the Cambridge series of illustrated pronunciation guides which already includes French, Spanish and English. Words, phrases and sentences are used to provide cumulative drills in all the phonetic elements of the language. 8*s.* 6*d. net*

English Pronunciation Illustrated

J. L. M. TRIM

Illustrated by PETER KNEEBONE

Another of the Cambridge guides to pronunciation. Each English sound is isolated, contrasted and drilled and Peter Kneebone's drawings drive the lesson home in an unforgettably amusing way. 6*s.*

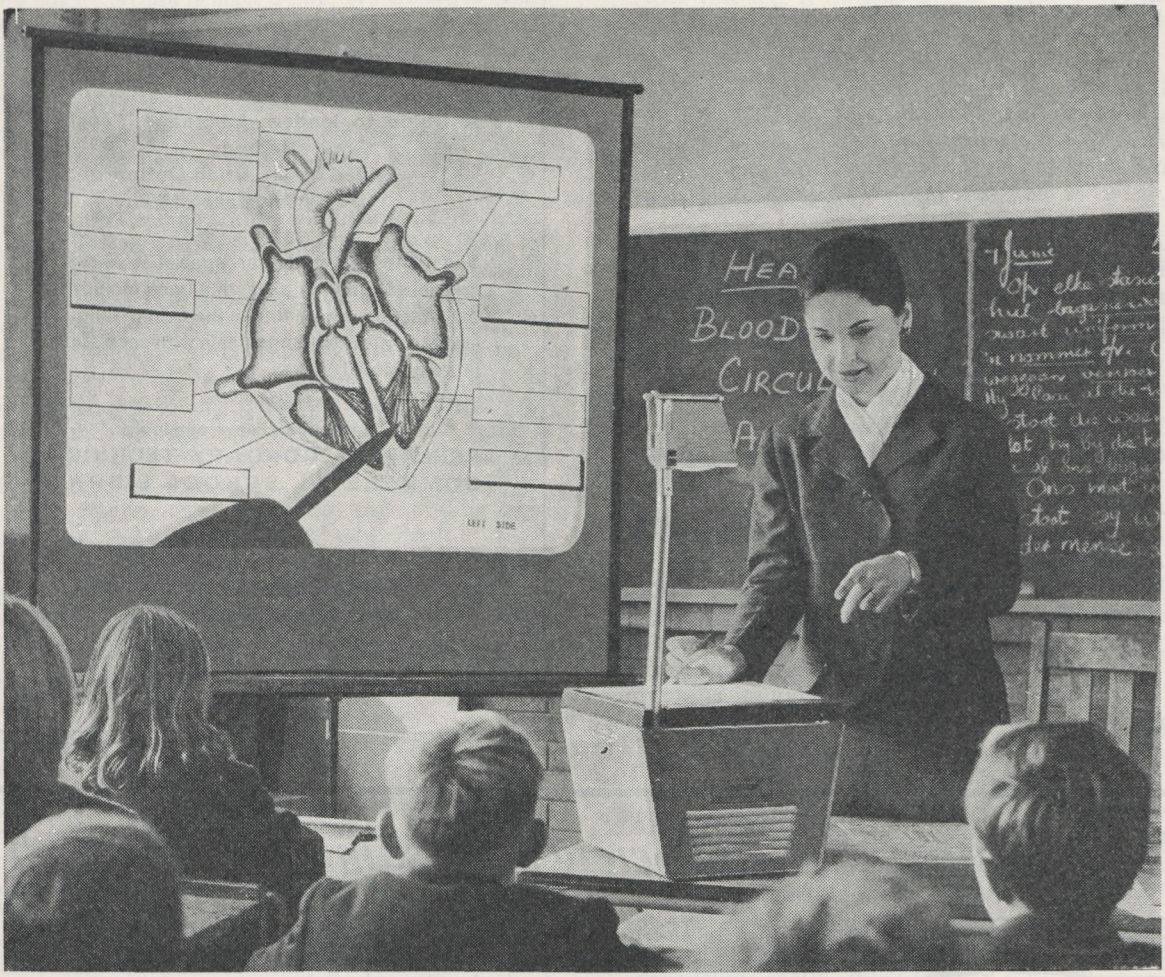

La Caisse de Joseph

J. R. BURNE

A French reader for secondary schools, set in Sierra Leone. While Joseph is at school, a valuable box is stolen and he helps the police to catch the thief. With word-lists and comprehension tests. 4*s.*

U.K. prices

CAMBRIDGE UNIVERSITY PRESS

Even coloured illustrations show up brilliantly in broad daylight.

HOW TO BREAK THROUGH THE BOREDOM BARRIER

How do you bring your subjects to life? Capture attention and hold it? Young people like to see things, and experts say that pictures increase their comprehension by 50% to 85%. With the 3M Visual Communications System, you can add dynamic impact to any subject while you face your pupils in a fully-lighted classroom.

Simply by placing a transparency on the 3M brand Overhead Projector, you can throw any illustration you choose on to the screen behind you – a page from a textbook or magazine, a map or a complicated diagram.

Transparencies for most subjects are available ready-made, or you can produce your own, in just four seconds, with the Thermo-Fax brand Copying Machine. It's unbelievably simple!

The 3M Overhead Projector is available to Transvaal Schools under the Rand-for-Rand Scheme. Wouldn't you like to know more about it? Why not write or phone 3M Company for a free demonstration.

Wishing SYMPOSIUM every success with this, one of its most important issues

A?—or B? The answer is in PROGRAMMED LEARNING

After completing this program, the student (AND teacher, training officer and personnel director) will be able to name the Company offering the most extensive range of equipment and services in the Programmed Learning field in South Africa.

Do you think that the only companies worth anything in the PL field are in America, Britain or Europe? **IF YES, GO TO B**

Do you think that I.T.M. (S.A.) Pty. Ltd is the company that can answer the above challenge? **IF YES, GO TO A**

A

Your Answer: International Tutor Machines, South Africa, (Pty.) Ltd. offers the most extensive range of equipment and services in the Programmed Learning field in South Africa.

THIS IS CORRECT. WELL DONE. *Take a look at the range:*

THE GRUNDYTUTOR automatic teaching machine based on the Crowder branching principal. The GRUNDYTUTOR can also be programmed to use Skinnerian linear techniques within a branching program.

THE GRUNDYMASTER linear teaching machine.

PROGRAMS, covering subjects over the complete range of school, technical and adult education have been published and are availalbe for both the GRUNDYTUTOR and the GRUNDYMASTER. I.T.M.'s program catalogue is one of the most extensive in the world today and new programs are being added to it every month.

LANGUAGE LABORATORIES I.T.M. offer THREE first rate language laboratory setups to suit a variety of individual needs and budgets.

*I.T.M. LANGUAGE LABORATORY based on one magnetic drum, no tape at student positions, simplifying student operation and reducing running costs to a small fraction of conventional laboratories.

*The PRINCE Language Laboratory is one of the most reliable tape teachers in the world today. More than 70 satisfied users in Britain will testify to this.

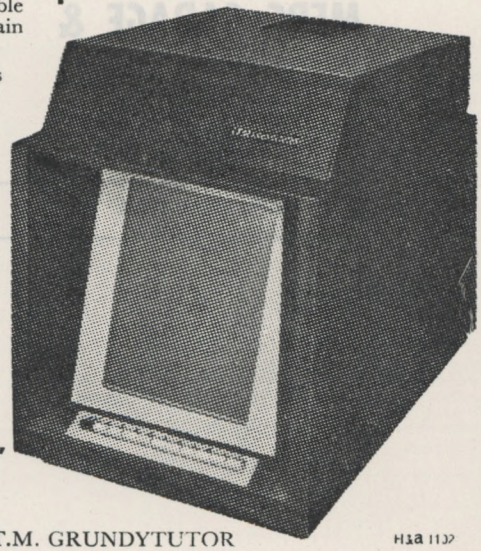

*The TRANSTUTOR Unit System Language Laboratory enables organisations operating on a small budget to progress from one tape recorder to a full-scale language laboratory in easy stages.

PROGRAMMING SERVICES I.T.M.'s Program Department, staffed by more than 30 highly trained programmers, is geared to prepare programs on contract for individual educational and training requirements.

B *Your Answer:* The only companies worth anything in the PL field are overseas.

NO: *No, you're missing some important information about a recently founded South African company.*

RETURN *and try again.*

I.T.M. GRUNDYTUTOR

ANNOUNCING

A LA PAGE

by Denis Grayson
Illustrations by Pouzet

This latest book in Denis Grayson's new French course for secondary schools consolidates what has been learnt in the course so far. The text is presented as a continuous story — Le Catalyseur — set in contemporary Paris and Algeria and the relevant exercises are arranged in a separate section. A paperback edition of Le Catalyseur is also available for use as a supplementary reader.

Of A la Page 3, the Reviewer in Modern Languages said '*This book is a joy to handle . . .*' We believe this is true of all the books in the series. To prove our point may we send you inspection copies of the books published so far:

MON CAHIER — 32 pages (*a preliminary workbook*) and	R0.25
LES SONS DU FRANÇAIS (*an accompanying gramophone record*)	R0.47
BOOK ONE — 240 pages *illustrated by Sempé*	R1.27
BOOK TWO — 288 pages *illustrated by Pouzet*	R1.40
BOOK THREE — 304 pages *illustrated by Pouzet*	R1.45
BOOK FOUR — 308 pages *illustrated by Pouzet*	R1.55
LE CATALYSEUR (*paperback*)	R0.53

The fifth and final book is under preparation

Transvaal Teachers' Association

(FOUNDED **1904**)

WHAT THE T.T.A. STANDS FOR:

(1) Progressive Education — the Education Committee studies all the latest movements in education.

(2) Professional Responsibility — the T.T.A. works towards an enhanced status for the profession.

(3) Liberal outlook in education — our interests go beyond a purely narrow education. We oppose reactionary policies.

(4) Improved conditions of service — this embraces salaries, leave privileges, pensions, Schools, etc.

The T.T.A. is NOT a sectional association. It caters for all branches of the profession; college of education lecturers; high school and primary school teachers, and married women teachers.

WHAT THE T.T.A. OFFERS YOU.

(1) The services of a full-time General Secretary.

(2) Easy approach to the Education Department with your difficulties.

(3) Legal defence in matters of professional interest — a strong Fund is available when needed.

(4) A Benevolent Fund to help members in cases of distress, illness or sudden emergency.

(5) A permanent headquarters at 38 Honey Street, Berea, Johannesburg.

(6) The "Transvaal Educational News"—official organ of the Association and a forum of progressive educational thought.

Rational Instruction and Training with recorded Tapes.

The system is suitable for transmitting by means of connecting wires for INDIVIDUAL instruction or GROUP instruction by means of a magnetic loop and transistorised earphones.

ADVANTAGES OF RITT METHOD

1. The instruction is identical on every occasion and is only changed if the method is changed.
2. The pupil can question the tape at any time without embarrassment.
3. Increased pupil concentration.
4. Magnetic tapes in cartridges effectively protected against dust and dirt.
5. More flexibility. The instruction unit can be moved to any part of the works or office.
6. No connecting wires to earphones necessary. Pupils can move about freely within the area of the loop.

FULL DESCRIPTION AND DETAILS AVAILABLE UPON REQUEST

Voix et Images

de France

The Centre de Recherche et d'Étude pour la Diffusion du Français (CREDIF) has evolved a teaching method in which situations are presented on filmstrip and the relevant dialogue is spoken on tape. In this way the student can acquire French speech patterns and structures in the earliest stages of learning, without the interference of translation and artificial analysis. This is the most authoritative and scientifically prepared of all audio-visual French courses for secondary-school and adult pupils beginning the language.

Harrap-Didier Audio-Visual Language Courses

These courses in French and German are based on the 'global' method originally developed at the Centre de Recherche et d'Étude pour la Diffusion du Français (CREDIF). This method presents the grammatical structure and vocabulary through a variety of situations. No word is taught in isolation, or as an illustration of a grammatical analysis. The vocabulary recurs throughout the course in different contexts and combinations until the student is able to manipulate the language spontaneously. Both courses are produced on filmstrip and record, with a taped language laboratory version for the German. The French course consists of twenty-five lessons, and the German, of two parts each of twenty-five lessons.
