Pressed for Time?

In the past twenty years man has doubled his scientific knowledge. It is estimated that he will double it again in the next ten years.

Slowly but surely educationists throughout the Republic are realising that the methods and tools of the past are no longer adequate and that new, better and faster ways to stimulate learning must be used.

Thirteen years ago we brought the first overhead projector to South Africa.

No other teaching tool can do more for the hard pressed teacher.

May we demonstrate it to you? On Rand for Rand the cost is only R84.
