LIST OF FIGURES

Page

Figure 4.1: The distribution of learners across schools 74

Figure 4.2: The number of learners included in the study by gender 75

Figure 4.3: Marital status of parents as reported by learners 77

Figure 4.4: The frequency of Criterion A scores 79

Figure 4.5: The frequency of Criterion B scores 80

Figure 4.6: The frequency of Criterion C scores 81

Figure 4.7: The frequency of Criterion D score 82

Figure 4.8: The frequency of total PTSD scores 83

Figure 4.9: The proportion of learners exposed to stressful events by gender 88

Figure 4.10: The proportion of learners experiencing PTSD symptoms of intrusive and recurrent recollection of the traumatic event

89

Figure 4.11: The proportion of learners experiencing PTSD symptoms of avoidance of the traumatic event 90

Figure 4.12: The proportion of learners experiencing persistent symptoms of increased arousal as a result of the traumatic event

91

Figure 4.13: A number of events witnessed and/or experienced as reported by learners by gender 93

Figure 4.14: A graph depicting the level of involvement in reported incidents by gender 94

Figure 4.15: The identity of victims as reported by learners 96

Figure 4.16: A table depicting the comparison of means across schools 103
