CONTENTS

Abstract
List of tables……..…i
List of figures……...iii
Glossary of terminology and abbreviations……..…..vi
Abbreviations……..…vii

Chapter 1
1. Rationale……...1
The evolution of audiology……3
The development of audiology training programmes abroad……...6
A brief history of the Au.D. ……...8
The development of audiology training programmes in South Africa……..…10
The quest for autonomy……..12
Scope of practice of audiology……...13
Challenges unique to the South African context…….....14
1.7.1. Incongruity of urban and rural services……....14
1.7.2. Disability in relation to the number and distribution of professionals……14
1.7.3. Linguistic diversity……15
1.7.4. The HIV/AIDS pandemic……..16
1.8. Conclusion……..17

Chapter 2
2. Methodology……...19
2.1. Objective……19
2.2. Sub-aims……19
2.3. Research design……...19
2.4. Development of the research instrument……..20
2.4.1. Section A: Biographical information……...21
2.4.2. Section B: Audit of audiological services……...24
2.4.3. Section C: Adequacy of undergraduate training……27
2.4.4. Section D: Future curriculum design in terms of content and structure……..27
2.4.5. Section E: Future training programmes……....27
2.5. Validity……28
2.6. Sampling……30
2.7. Data preparations……30
2.8. Description of the sample……30
2.9 Data analysis……41
2.10. Equivalence reliability……41
2.11. Test for normal distribution……42
2.12. Inferential statistics……...42

Chapter 3
3.1. Descriptive statistics……44
3.1.1. Perceptions regarding the adequacy of theoretical undergraduate training……...44
3.1.2. Perceptions regarding the adequacy of clinical undergraduate training……...52
3.1.3. Future curriculum design in terms of content and structure……...64
3.1.4. Future training programmes. ……..70
3.2. Inferential statistics……...74

Chapter 4

4. Discussion……..……..…92
4.1. Sample characteristics……92
4.2. Audit of audiological service delivery……..……101
4.3. Perceptions regarding the adequacy of undergraduate training……104
4.3.1. Basic audiology……...104
4.3.2. Diagnostic and electrophysiological tests……...105
4.3.3. Paediatric audiology. ……105
4.3.4. Amplification……106
4.3.5. Hearing conservation and prevention……..107
4.3.6. Habilitation and rehabilitation……..……..107
4.3.7. Miscellaneous services……..108
4.4. Future curriculum design in terms of content and structure……109
4.5. Future training programmes……..110
4.6. Conclusion……111

References……...115
Appendices……..124
Appendix A: Cover Letter……...125
Appendix B: Self-Administered Questionnaire……126
Appendix C: Ethical Clearance……..127
Appendix D: Chi-Squared Analyses……128
