

## LIST OF TABLES

Table 1: Sample demographic (gender – province).....	50
Table 2: Sample demographics (type of employment – organizational sector).....	52
Table 3: Comparison of sub-sample's level of compassion fatigue.....	61
Table 4: Participant's level of Compassion Fatigue.....	62
Table 5: Descriptive statistics on participant's level of Compassion Fatigue.....	63
Table 6: Summary statistics and moments of the scales.....	63
Table 7: Reliability, number of participants, minimum and maximum range, and number of items in a scale.....	64
Table 8: Correlation between sub-samples and measures used in the current study.....	65
Table 9: T-test for compassion fatigue.....	66
Table 10: Pearson Product Moment Correlation Matrix of the variables in the study.....	67
Table 11: Correlation between Work Environment variables and Compassion Fatigue.....	67
Table 12: Correlation between Sense of Coherence and Compassion Fatigue.....	68
Table 13: Correlation between Work Environment variables and Sense of Coherence.....	69
Table 14: Summary of Stepwise Regression for Compassion Fatigue.....	70
Table 15: Summary of Stepwise Regression with interaction variables for Compassion Fatigue.....	71
Table 16: Role of Sense of coherence in moderating the relationship between Job control and Compassion Fatigue.....	76
Table 17: Role of Sense of coherence in moderating the relationship between workload and Compassion Fatigue.....	76
Table 18: Role of Sense of coherence in moderating the relationship between workload and Compassion Fatigue.....	80
