

DEDICATION

To my family because of all the wonderful things they do for me and supporting me all the way,
you helped me through a time when nobody else could have.

SHIMA KAMAL YASIN

January, 2008

AKNOWLEDGEMENT

First of all, I would like to express my gratitude to UNICEF/UNDP/World Bank/WHO Special Programme for Research and Training Diseases (TDR) who provided the financial support for this training.

Also, I would like to express my gratitude to the Macro International, USA for providing the data of the 2005 Egyptian Demographic and Health Survey used in the study. It is my own believe that the results of this study will benefit all parties involved.

I have been extremely fortunate to have Dr. Georges Reniers who in spite of his extremely busy schedule was there for supervision, guidance and support. I thank the staff of Wits School of Public Health. I also thank the staff of the University of Khartoum who nominated me for this scholarship.

Finally, I wish to express my thanks to my great parents, brothers and sisters who supported me during this period and all through my life. And I thank all my friends and colleagues.

And last but the foremost, I praise Allah for blessing all my undertakings.

TABLE OF CONTENTS

Declaration	I
Dedication	II
Acknowledgment	III
Table of Contents	IV
List of Tables	V
List of Appendices	VI
List of abbreviation	VII
Abstract	VIII
Chapter One: General Introduction	1
Chapter Two: Methodology	18
Chapter Three: Results	31
Chapter Four: Discussion	48
Chapter Five: Conclusions and Recommendations	58
References	61
Appendix One	65
Appendix Two	66

LIST OF TABLES

Table (2.1): Variables of Interest and their definitions.....	24
Table (3.1): Percentage distribution of live births by some of the selected variables.....	32
Table (3.2): Levels and differentials of Infant and Post-neonatal Mortality by selected variables EDHS (2005).....	34
Table (3.3): Results of Bivariate Regressions (Adjusted Odd and Hazard Ratios) Showing the Association between Infant Mortality and Selected Socioeconomic and Biodemographic Variables EDHS (2005)	36
Table (3.4): Results of Multivariate Regressions (Adjusted Hazard Ratios) Showing the Association between Infant Mortality and Selected Socioeconomic and Biodemographic Variables EDHS (2005)	39
Table (3.5): Results of Multivariate Regressions (Adjusted Hazard Ratios) Showing the Association between Neonatal Mortality and Selected Socioeconomic and Biodemographic Variables EDHS (2005).	43
Table (3.6): Results of Multivariate Regressions (Adjusted Hazard Ratios) Showing the Association between Post neonatal Mortality and Selected Socioeconomic and Biodemographic Variables EDHS (2005).....	46

LIST OF APPENDICES

APPENDIX 1: Test of Proportional Hazard Model Assumptions for Final Infant Mortality Model.....	65
APPENDIX 2: Test of Proportional Hazard Model Assumptions for Final Infant Mortality Model after Inclusion of the Variables that violated that Violated the Assumptions as Time Varying Covariates (TVC).....	66

LIST OF ABBREVIATIONS

AHR	Adjusted Hazard Ratio
AOR	Adjusted Odd Ratio
ARI	Acute Respiratory Infection
CAPMAS	Central Agency of Public Mobilization and Statistics
CBR	Crude Birth Rate
DHS	Demographic and Health Survey
DSS	Demographic Surveillance Sites
EDHS	Egypt Demographic and Health Survey
FWI	Family Welfare Index
GDP	Gross domestic Product
GNP	Gross National Product
IMR	Infant Mortality Rate
MDG	Millennium Development Goals
MOHP	Ministry of Health and Population
NDDCP	National Diarrheal Disease control Project
NPC	National Population Council
ORS	Oral Rehydration Solution
PNMR	Post neonatal Mortality Rate
SCS	Sentinel Community Survey
TVC	Time Varying Covariate
UN	United Nations
UNICEF	United Nations Internal Children's emergency Fund
UN-HR	Unadjusted Hazard ratio
UN-OR	Unadjusted Odd Ratio
USAID	United States Agency for International Development
WFS	World Fertility Survey
