

## TABLE OF CONTENTS

<b>TABLE OF CONTENTS</b> .....	1
<b>LIST OF TABLES</b> .....	6
<b>LIST OF FIGURES</b> .....	9
<b>LIST OF ACRONYMS</b> .....	19
<b>CHAPTER ONE – INTRODUCTION</b> .....	23
1.1 Objectives and Scope of the Research .....	23
1.1.1 Objectives of the Research.....	23
1.1.2 Scope of the Research .....	25
1.2 General Background .....	26
1.2.1 Coal in South Africa .....	29
1.2.2 Remaining reserves of economic interest in South Africa .....	32
1.2.3 Role of coal preparation in the future coal industry in South Africa .....	38
1.2.4 Environmental concerns associated with the coal value chain in South Africa .....	41
1.3 Evaluation of thermal coal production and international markets .....	48
1.3.1 Thermal Coal Export Production, Cost and Demand.....	48
1.3.2 Lower Grade Thermal Coal Export Production .....	52
1.4 Coal Resource Characterisation.....	54
<b>CHAPTER TWO – LITERATURE REVIEW</b> .....	58
2.1 Coal Mineralogy .....	58
2.1.1 Mineralogical Analysis .....	58
2.1.2 Mineralogical Impact on Physical Properties Affecting Coal Processing .....	61
2.1.1.1 Moisture .....	63
2.1.1.2 Specific Gravity.....	63
2.1.1.3 Structure and breakage .....	64
2.1.1.4 Size composition.....	64
2.1.1.5 Friability or size stability .....	64
2.1.1.6 Abrasiveness .....	64
2.1.1.7 Clay and shale .....	65
2.1.1.8 Coal petrography applied to preparation.....	66
2.2 Liberation Functions of Coal & Associated Minerals.....	68
2.3 Coal Plant Design and Equipment Selection .....	73

2.3.1.1 Plant Design .....	76
2.3.2 Maximum Utilisation of Resources.....	80
2.3.2.1 Crushing.....	81
2.3.2.2 Screening.....	85
2.3.2.3 Dense Medium Separation.....	86
2.3.2.4 Jigging.....	94
2.3.2.5 Dry Processing.....	96
2.3.2.6 Fine Coal Processing Developments .....	100
2.3.2.7 Ultra-fine coal beneficiation .....	100
2.3.2.8 Treatment of Ultra-fines in Slimes Compartments.....	101
2.3.2.9 Chemical Cleaning of coal.....	102
2.3.2.10 Microbial Cleaning of Coal .....	103
2.3.2.11 Retreatment of Discard Dumps.....	104
2.3.2.12 Dewatering of Coal Technologies .....	104
2.3.2.13 Acid generation from coal discard facilities .....	105
2.4 Trace Elements in Coal .....	106
2.5 Coal Utilisation.....	108
2.6 Steam Coal Trade Economics .....	112
2.7 Mining Life Cycle Assessments .....	116
<b>CHAPTER THREE – METHODS AND MATERIALS .....</b>	<b>118</b>
3.1 Geological Background.....	121
3.1.1 Witbank Coalfield No. 4 Seam .....	121
3.1.2 Waterberg Upper Ecca .....	122
3.2 Background to Sampling Procedure of Witbank Coalfield No. 4 Seam .	125
3.2.1 Witbank No. 4 Seam Sampling Procedures.....	126
3.2.2 Borehole samples for borehole correlation liberation data.....	128
3.2.3 Sample preparation.....	128
3.3 Sampling of Waterberg Upper Ecca .....	129
3.4 Analysis .....	130
3.4.1 Washability analysis.....	130
3.4.2 Floatability analysis.....	132
3.4.3 Particle Size Distribution (PSD) Analysis .....	133
3.4.4 Proximate and Calorific Value Analysis .....	133
3.4.5 Mineral Matter and Liberation Analysis .....	134
3.4.6 Trace Element and Sulphur Form Analysis.....	134
3.4.7 Petrographic Analysis .....	136
3.5 Techno-economic, Mineralogical and Process modelling methods.....	136

<b>CHAPTER FOUR - RESULTS</b> .....	137
4.1 Introduction.....	138
4.1.1 Witbank No. 4 Seam.....	140
4.1.2 Waterberg Upper Eccla .....	141
4.2 Composite trace elements sample .....	142
4.3 Distribution of trace elements at different densities .....	144
4.4 Percentage Reduction of certain trace elements .....	145
4.5 Washability analysis – dense medium beneficiation.....	150
4.6 Froth Flotation .....	152
4.7 Liberation Analysis Results.....	155
4.7.1 Liberation prediction from XRD Data and Wash Curves .....	155
4.7.2 Liberation illustrated through QEMSEM Analysis.....	155
4.8 Petrographic Analysis Results .....	166
4.8.1 Partitioning of Macerals .....	168
4.8.2 Partitioning of Microlithotypes .....	171
<b>CHAPTER FIVE – DISCUSSION ON SULPHUR AND TRACE ELEMENT OCCURRENCE</b> .....	173
5. 1 Relationship between Trace elements, sulphur and mineral matter associations.....	174
5.2 Modelling of trace element reduction by dense medium beneficiation...	180
<b>CHAPTER SIX – LIBERATION MODELLING OF MINERALS AND MACERALS ASSOCIATED WITH TRACE ELEMENTS</b> .....	182
6.1 General Liberation Modelling.....	183
6.2 Liberation Modelling of Mineral Matter.....	186
6.2.1 Mineral Liberation of Witbank Coalfield No. 4 Seam.....	186
6.2.2 Mineral Liberation of Waterberg Upper Eccla .....	188
6.3 Liberation Modelling of Macerals .....	190
6.3.1 Maceral & Microlithotype Liberation of Witbank Coalfield No. 4 Seam .....	190
6.3.2 Maceral & Microlithotype Liberation of Waterberg Upper Eccla	194
6.3.3 Summary Liberation of Witbank No. 4 Seam and Waterberg Upper Eccla.....	198
<b>CHAPTER SEVEN - BENEFICIATION TECHNIQUES AND PROCESSES FOR OPTIMUM ENERGY RECOVERY &amp; POLLUTANT REDUCTION</b> .....	200
7.1 Process characterisation for the beneficiation of coal to reduce sulphuric related species and its associated trace elements .....	200
7.2 Process characterisation for beneficiation and optimal energy recovery	203
<b>CHAPTER EIGHT - COAL BENEFICIATION MODELLING OF BENEFICIATION OPTIONS</b> .....	207

8.1 Processing Simulations .....	207
8.1.1 Waterberg Upper Ecca Optimum Circuit for Export Product Optimum Process .....	217
8.1.2 Waterberg Upper Ecca Optimum Circuit for Domestic Product	217
8.1.3 Waterberg Upper Ecca Optimum Circuit for Optimum Sulphur Reduction and Associated Trace Elements Process .....	217
8.1.4 Witbank Coalfield No. 4 Seam Optimum Circuit for Export Product .....	218
8.1.5 Witbank Coalfield No. 4 Seam Optimum Circuit for Domestic Product .....	218
8.1.6 Witbank Coalfield No. 4 Seam Optimum Circuit for Optimum Sulphur and Associated Trace Elements Reduction Process .....	219
8.2 Processing Resources Requirements Modelling .....	221
<b>CHAPTER NINE – COAL BENEFICIATION INFLUENCE ON UTILISATION .....</b>	<b>223</b>
9.1 Effect of Specific Mineral Content.....	223
9.2 Emissions Reduction (SO <sub>x</sub> , NO <sub>x</sub> , CO <sub>x</sub> ).....	225
9.3 Utilisation Potential and Efficiency .....	230
9.4 Techno-Economic Aspects of Ash Utilisation .....	231
9.5 Techno-Economic Aspects of Gas Cleaning .....	232
<b>CHAPTER TEN - TECHNO ECONOMIC &amp; ENVIRONMENTAL MODELLING OF BENEFICIATION PATHS .....</b>	<b>234</b>
10.1 Introduction.....	234
10.2 Product Quality and Market .....	235
10.3 Methodology for Economic Analysis .....	236
10.4 Modelling Results and Discussion .....	237
10.4.1 Process Results.....	237
10.4.2 Tailoring the Process to Specific Needs .....	241
10.4.3 Flowchart Selection.....	241
10.4.4 Size of Equipment and Amount Needed .....	242
10.5 Cost Estimating Results.....	242
10.5.1 Methodology for Economic Analysis .....	242
10.5.2 Capital Costs for Plant .....	243
10.5.3 Operating Costs for Plant.....	245
10.5.4 Transport Costs .....	246
10.6 Cost Benefit Analysis.....	246
10.7 Techno-Economic Impact of Low Grade Thermal Coal Export on the South African Coal Utilisation Industry .....	259
<b>CHAPTER ELEVEN - CONCLUSIONS .....</b>	<b>262</b>
11.1 Processing Qualitative Results .....	262

11.2 Mineral & Petrographic Analysis Results .....	263
11.3 Techno-Economic Analysis Results .....	264
<b>CHAPTER TWELVE - RECOMMENDATIONS .....</b>	<b>268</b>
<b>CHAPTER THIRTEEN – REFERENCES &amp; BIBLIOGRAPHY .....</b>	<b>271</b>
<b>APPENDICES .....</b>	<b>285</b>
Appendix A. Techno-Economic Model Assumptions .....	285
A.1 Energy Conversion .....	285
A.2 Techno-Economic Model CPI & PPI .....	285
A.3 Techno-Economic Model Parameters .....	286
Appendix B. Detailed operating Costs .....	287
B.1 Witbank Coalfield No. 4 Seam (Export) .....	287
B.2 Waterberg Upper Ecca .....	290
B.3 Free State (Vereeniging) .....	293
Appendix C. Detailed Equipment Lists & CAPEX .....	297
C.1 Major Equipment & Installation Cost (R'000) .....	297
C.2 Capital Estimate for 500 tph (tons per hour) Dense Medium Plant .....	299
C.3 Auxiliary Construction & Installation Capital Costs .....	300
Appendix D. Discounted Cash Flow Scenario's & Sensitivity Analysis .....	301
D.1 Witbank Coalfield No. 4 Seam .....	301
D.2 Waterberg Upper Ecca .....	307
D.3 Free State (Vereeniging) .....	310
Appendix E. Data Analysis Tables .....	320
Appendix F. Petrographic Analysis Reports .....	380
Appendix G. Beneficiation Modelling Models Included .....	404
G.1 Witbank Coalfield .....	404
G.2 Waterberg Upper Ecca Coalfield .....	408
G.3 Free State Coalfield .....	415
