**THE MEDIATION OF THE INTEGRATED APPROACH TO
LITERACY INSTRUCTION PROGRAMME TO GRADE EIGHT
LEARNERS IN AN INDEPENDENT SECONDARY SCHOOL IN
SOUTH AFRICA**

Student number: 9406366T

**A dissertation submitted to the Wits School of Education, Faculty of Humanities,
University of the Witwatersrand in fulfilment of the degree of Master of Education**

Johannesburg 2012

ABSTRACT

The role of literacy skills in learning and the ability to have the cognitive learning skills necessary to receive, process and make meaning of information is core to academic achievement at school. Many learners whose underdeveloped literacy skills prove to be a considerable barrier to learning struggle to make any significant progress at school, particularly at secondary school if these learners have come into their grade eight year from a remedial primary school where only a limited curriculum is taught. Often these learners drop out of the educational system altogether with no real alternatives available to them. Inclusive education policy states that schools must do everything they can to make the curriculum accessible to all learners regardless of their barrier to learning.

This research project examined the critical success factors of implementing a one-on-one mediated literacy programme to eight selected grade eight learners as part of their school programme. The learners selected to be participants on the programme were identified from an analysis of background history, educational testing, and parent and teacher recommendations as learners whose specific barrier to learning was associated with inadequate literacy skill ability. The programme was called the Integrated Approach to Literacy Instruction(IATLI), and it combined the mediation of literacy skills simultaneously with metacognitive learning strategies. The research project was participatory in nature, as the researcher was the mediator of the programme to the eight learners. The project was based on participatory action research theory, and was a case-study design implemented at an independent secondary school in Johannesburg. The methodology used to evaluate the research project was a mixed research design incorporating structured surveys of the teaching staff, pre- and post-testing of the eight learners using standardized educational tests that evaluated literacy ability, semi-structured interviews with the teachers who taught the eight learners, and commentary from the learners themselves recorded in the researcher's journal.

Quantitative and qualitative analysis of the data indicated that the programme was a worthwhile initiative, and that certain critical success factors of the IATLI programme's implementation emerged. Of these critical success factors, highlighted in the research sub-questions, success was often more evident in some learners than others. The data also highlighted a number of challenges that the programme's implementation exposed, notably sustainability of the programme in the long term, as the programme was driven by the learning support specialist and the factor of burnout with regard to the intensive nature of the programme and its demands on the learner participants and the school's internal structures. Other challenges that emerged were the practical aspects of integrating an inclusive education initiative into the demanding high school curriculum, and addressing the paradigm shift necessary to get all educators collaborating with learning support programme outcomes and then supporting initiatives in their own teaching.

DECLARATION

I declare that this dissertation is my own unaided work. It is being submitted for the degree of Master of Education at the University of the Witwatersrand, Johannesburg. It has not been submitted before for any degree or examination at another University.

Douglas Andrews

Day of in the year

This dissertation is dedicated to my wife Michelle, our beautiful daughter Jenna, my sister Janet and my mother, all of whom inspired me to undertake this journey

ACKNOWLEDGEMENTS

I would like to thank my supervisor, Professor Ruksana Osman, for her professional support and dedication while assisting me with my study. Her kindness and constant willingness to be of assistance and guidance to me over the duration of the research process has contributed to my enjoyment and development as a researcher and post graduate student.

I would also like to acknowledge the academic and support staff at WITS who assisted me throughout the research process. Their expert academic input, generosity, openness and willingness to be of assistance and support was invaluable to my enjoyment and progress.

I would also like to thank my wife Michelle and daughter Jenna without whose constant support and encouragement this dissertation would have been very difficult to accomplish.

Thanks must also go to the principal, management team and teachers at the school where I conducted my research study. Their openness and willingness to support my research project helped make the journey a satisfying and enjoyable experience.

Finally I would like to acknowledge the eight children and their parents who participated so willingly in my research project and who gave me their full support from the inception of the project to its conclusion.

CHAPTER ONE

1. INTRODUCTION	1
1.1 The start of my research process	2
1.2 Statement of the Problem	4
1.3 Research question	5
1.3.1 Research sub-questions	5
1.4 Rationale	5
1.5 Aims, objectives and purpose of this study	6
1.5.1 Details of the mediation programme	7
1.6 Conclusion to introduction	9

CHAPTER TWO

2. LITERATURE REVIEW	10
2.1 Introduction	10
2.2 An examination of the IATLI and the Ecosystemic Graphic Organizer within the context of constructivist theory	12
2.2.1 The structure of the IATLI Learning Support curriculum	20
2.2.2 The Ecosystemic Perspective	23
2.3 Mediation as an Interaction Method	24
2.4 The cognitive process of speech and literacy	25
2.4.1 Links between neuropsychology applications in education and the IATLI programme	28

2.5	Programmes	31
2.6	Alternative approaches to evaluation	32
2.6.1	Naturalistic and participant orientated evaluation models	33
2.7	Focussing evaluative enquiry: evaluation forms and approaches	35
2.8	Concepts of inclusive schooling	36
2.9	Review of studies that support the mediated literacy programme utilised in this research project	41
2.10	A review of two studies that show the positive relationship between self-esteem, self-efficacy and the academic development of learners with learning disabilities	44
2.10.1	Comparative Support Programme	48
2.10.2	Comparison of an early literacy programme conducted in a Hispanic community in Los Angeles to the IATLI programme	50
2.10.3	Discussion of a comparative, constructivist literacy programme implemented in elementary schools in Hawaii ...	51
2.11	Rival hypotheses and the limitation of their impact on my study	54
2.11.1	A critique of a ‘work-based learning’ model, with the intention of positioning and validating the need for a mediated learning experience for learners	55
2.12	Conclusion	56

CHAPTER THREE

3.	METHODOLOGY AND RESEARCH DESIGN.....	57
3.1	Introduction	57
3.2	Case study research	59
3.3	This study operating as an action research	60
3.4	Methodology	61
3.5	Description of the intended data collection methods	64
3.6	Consideration of the natural setting where my research was conducted	67
3.7	Triangulation	68
3.8	Techniques of qualitative data analysis	69

3.9	The researcher as an ethnographer	71
3.10	Reliability and validity	72
3.11	Compliance with ethical standards	74
3.12	Conclusion	75

CHAPTER FOUR

FINDINGS AND DISCUSSION OF RESULTS	76
4. Introduction (Results of data analysis)	76
4.1 Learner Participants' and Teacher Participants' Background History/Information	76
4.2 Discussion of the results from the Likert-Type Questionnaire	78
4.3 Discussion of the results from the researcher's journal as a framework to compare and analyse the results from the testing (SDRT) and the semi- structured interview	84
4.3.1 Discussion of excerpts from the researcher's journal	85
4.3.2 Theme one: Participants' emotional responses to the IATLI Programme	87
4.3.3 Theme two: Participants' and facilitators' impressions of their own learning skill development from their participation on the IATLI programme	91
4.3.4 Theme three: Participants' commentary on their own literacy skill development from participation on the programme	94
4.3.5 Theme four: Participants' focus and attention during the mediated learning sessions	95
4.3.6 Conclusion	96
4.4 Quantitative analysis: Results from pre- and post-testing of the eight learners who participated on the programme	96
4.4.1 Results of the pre- and post-test scores for the Phonetic Analysis sub-test	98
4.4.2 Discussion of the breakdown of the Phonetic Analysis sub-test of the SDRT	99
4.4.3 Statistical analysis of the Phonetic analysis sub-test of the SDRT	100

4.4.4	Analysis of the Reading Comprehension sub-test of the Stanford Diagnostic Reading Tests	101
4.4.5	Discussion of the breakdown of the literal and inferential aspects tested within the SDRT Reading Comprehension sub-test	103
4.4.6	Statistical analysis of the Reading Comprehension sub-test of the SDRT	104
4.4.7	Analysis of the Auditory Vocabulary sub-test of the SDRT	105
4.4.8	Statistical analysis of the Auditory Vocabulary sub-test scores for the learner participants from the SDRT	107
4.4.9	Discussion and comparison of the learner participants' results on the SDRT for Auditory Vocabulary	108
4.4.10	Discussion of the three categories of the Auditory Vocabulary sub-test that included Maths and Science questions, Social Studies and Arts and Reading and Literature	109
4.5	Discussion of results from the semi-structured interviews conducted with the teachers who volunteered to participate in this research study	110
4.6	Analysis of results	112
4.6.1	The first research sub-question stated: Will educators and the mediator observe an improvement in literacy skills reflected in the learners' class activities over a six month period?	112
4.6.2	Discussion of the data with regard to sub-question two which asked: Is the IATLI programme enhancing the self-esteem of the target audience, in this case the participating grade eight learners?.....	123
4.6.3	Research sub-question three asked: Will quantitative and qualitative evidence show that the participant learners on the programme internalised the cognitive learning strategies outlined by the outcomes of the IATLI programme?.....	135
4.6.4	Research sub-question four: Does this method of programme mediation enhance the school's ability to provide an inclusive learning environment?.....	145
4.6.5	Sub-question five: Have the stated outcomes of the IATLI programme been achieved?.....	158
4.7	Logic model	162

4.8	Conclusion	165
-----	------------------	-----

CHAPTER FIVE

5.	CONCLUSIONS AND DISCUSSIONS	167
-----------	--	------------

5.1	Summative conclusion: The chapters comprising this study that investigated the critical success factors related to mediating the IATLI programme to grade eight learners at an independent school	168
-----	---	-----

5.1.1	Chapter One: Introduction	168
-------	---------------------------------	-----

5.1.2	Chapter Two: Literature Review	169
-------	--------------------------------------	-----

5.1.3	Chapter Three: Methodology and Research Design	173
-------	--	-----

5.1.4	Chapter Four: Findings and Discussion of Results	175
-------	--	-----

5.2	The main research question of this study asked: ‘What are the critical success factors of mediating the Integrated Approach to Literacy Instruction to grade eight learners in an independent school?’	177
-----	--	-----

5.2.1	Sub-question one: Will educators and the mediator observe an improvement in literacy skills reflected in the learners’ class activities over a six month period?	178
-------	--	-----

5.2.2	Sub-question two: Is the IATLI programme enhancing the self-esteem of its target audience, in this case the participating grade eight learners?	182
-------	---	-----

5.2.3	Sub-question three: Will quantitative and qualitative evidence show that the participant learners on the programme internalised the cognitive learning strategies outlined by the outcomes of the IATLI programme?	186
-------	--	-----

5.2.4	Sub-question four: Does this method of programme mediation enhance the school’s ability to provide an inclusive learning environment?	189
-------	---	-----

5.2.5	Sub-question five: Have the stated outcomes of the programme been achieved?	192
-------	---	-----

5.3	Conclusions when investigating the power relationships that prevailed for the duration of this case-study	196
-----	---	-----

5.4	Conclusions when comparing this study to other studies discussed in the literature	197
-----	--	-----

5.5	Individual learner profile description at the conclusion of the mediated IATLI programme for each of the eight participants	199
-----	--	-----

5.6	Concluding arguments	209
5.7	Significance of the findings of this study for the wider educational community and national education structures	212
5.8	Recommendations for further study	214
5.9	Envisaged contribution of the study to scholarship and policy or practice	215
