

**INFORMATION SHEET**

Hello, my name is Kenneth Madiebo and I am currently undertaking a study as a part of the requirements for a master of public health degree from the department of public health in the Faculty of Health Sciences of the University of the Witwatersrand.

This is a study that seeks to determine the medical students' views towards the role of doctors in reducing or even helping to stop the habit of tobacco use.

I will be extremely grateful if you participate in this study.

Please note that to participate, you must be 18 years old and above.

Also note that your participation is entirely voluntary and you may decide to discontinue participation at any stage while answering this questionnaire.

The identity of all participants will be kept anonymous.

The questionnaire will last about 5 minutes.

Thank you very much.
