You seem fixated on race. How many black men appeared on that [#RUReferenceList](#)? Give numbers please. How many were banned? If none of them either then why the constant reference to **race**?

EFFSC SU pledges solidarity with [#EndRapeCulture](#) [#RUReferencelist](#)

EFF STUDENT COMMAND SU PLEDGES SOLIDARITY WITH #ENDRAPECULTURE CAMPAIGN

The EFF Student Command of Stellenbosch University commends the students across all universities who have been putting their bodies on the line and speaking out about rape. We think it is important to acknowledge that rape culture is prevalent across all campuses. Rape culture is the systematic and pervasive normalisation of sexual violence against women and gender minorities. Rape culture not only creates an unsafe space environment for women, trans and non-binary individuals, but it also furthers attitudes of complicity in sexual violence.

Recent events including the [#RUReferencelist](#) campaign at the university currently known as "Rhodes" and the lack of commitment from universities' management to address issues regarding sexual violence have shown that rape culture continues to be normalised on our campuses and treated as an inevitable by-product of societal values and attitudes. We urge residences (especially male residences) to also consider how certain "traditions" can make women feel unsafe and how engaging in these type of "traditions" perpetuate rape culture. These type of attitudes and traditions have no place on our campus.

The EFF Student Command of Stellenbosch University supports the [#EndRapeCulture](#) campaign. We think it is important to fight back against cultures that make our universities to be unsafe spaces. We call upon Stellenbosch University management to strengthen the sexual assault policy for students and staff. We also call upon management to implement programmes to actively combat rape culture on our campus. It is also important that campus security, SSV0/CSCD (Centre for student counselling and development) and university administration better support students in responding to incidents of sexual violence.

We need to promote open and honest dialogue surrounding sexual violence. More needs to be done to educate and raise awareness. As an academic community we need to create safer spaces and encourage open dialogue. The [#EndRapeCulture](#) campaign is where the conversation starts but it does not end with this campaign. We hope that students, staff and student bodies continue to educate themselves and their communities.

The EFF Student Command stands in solidarity with survivors, students, activists and allies across all campuses in their fight to dismantle rape culture. It is a promise not to be a bystander to the problem, but to be part of the solution. [#WeBelieveYou](#)
