

THE SYNTHESIS OF BENZO[c]CARBAZOLES

Johanna M. Nhlapo

**A dissertation submitted to the Faculty of Science,
University of the Witwatersrand,
JOHANNESBURG,
In fulfillment of the requirements for the degree of
Master of Science.**

March 2005

DECLARATION

I declare that the work presented in this dissertation was carried out exclusively by myself under the joint supervision of Professors C.B. de Koning and J.P. Michael. It is being submitted for the degree of Master of Science in the University of the Witwatersrand, Johannesburg. It has never been submitted before for any degree or examination at any other University.

March 2005

ABSTRACT

The base/light-induced cyclisation (condensation) reaction between alkyl and carbonyl substituents on biaryl compounds discovered in the University of the Witwatersrand laboratories was used to synthesise benzo[*c*]carbazoles. Specifically, 5,7-dimethyl-7*H*-benzo[*c*]carbazole was synthesised from 2-methyl-1*H*-indole in 79 % yield over four steps. The reaction sequence involved bromination of 2-methyl-1*H*-indole at C-3 to give 3-bromo-2-methyl-1*H*-indole. The subsequent methylation of the amino group to give 3-bromo-1,2-dimethyl-1*H*-indole was followed by Suzuki coupling with acetophenone-2-boronic acid under non-aqueous reaction conditions to give 1-[2-(1,2-dimethyl-1*H*-indol-3-yl)phenyl]. Lastly, ^tBuOK/hν-induced cyclisation of the product yielded the desired benzo[*c*]carbazole. 10-Methoxy-5,7-dimethyl-7*H*-benzo[*c*]carbazole was synthesized analogously in 75% yield from 5-methoxy-2-methyl-1*H*-indole.

TO

My husband Zimi Nhlapo,
my sons Thuto and Phatsimo,
mothers Onica Nhlapo and Emma Kgamphe,
brothers Daniel, Tebogo and Lekgotla Kgamphe
and
sister Tiro Nhlapo.

Let this be another testimony to how far we have come!

ACKNOWLEDGEMENTS

I would like to thank my supervisors Professors C.B. de Koning (also my mentor) and J.P. Michael for their guidance and boundless patience throughout the execution of this research project. For all the constructive criticism, encouragement and demands to do my best, I am indebted to you gentlemen and I just could not have chosen better Teachers!

To other research supervisors and teachers in the Wits Organic Chemistry Research Group: Drs Andy Dinsmore and Willem van Otterlo, I can never thank you enough for the many fruitful discussions on chemistry and words of encouragement when the knocks of research and life in general proved too many to bear. I have conquered at last! This is extended to “the mothers of chemistry” Drs Gail Green and Margie White as well as to the Godfather, Professor James Bull of the University of Cape Town.

To the members of the Organic Chemistry Research Team (former and present); Drs Mandy Rousseau, Ibrahim Yillah, Jose Oliveira, Chris van der Westhuizen, Sandy Vandayar, Claudia San Fat, Karen Mandy and (Drs) Darren Riley, Riaan Petersen, Simon Moleele and Lindani Ngidi as well as Mr Lucan Li and Ms Gillian Natrass: Thank you for all the good (and bad) times we shared together in the lab!

I am greatly indebted to my friends (Drs) Sunnyboy Manzini, Edwin Mmutlane, Priscilla Ikhide, Florence Nareetsile and Dr Winile Mavuso and Dr Abel Debeila. No words can express just how grateful I am suffice it to say *thank you very much*. This is extended to Lucky Mabena, Gilbert Morokolo and Christopher Kgatshe: we had fun, we cried together and fought (especially with Edwin!).

My sincere gratitude goes to my sponsors; the University of the Witwatersrand, The National Research Foundation, the Mellon Foundation and DAAD for the generous funding I received throughout my postgraduate studies. In conclusion I would like to acknowledge the assistance of Messrs David Moloto and Elias Valoyi for the wonderful service they provide to the School of Chemistry as a whole, Mrs Sigi Heiss for the innumerable NMR spectra, Prof. Phil Boshoff (Cape Technikon) for all High Resolution Mass Spectroscopic analyses, Dr Neil Grimmer for teaching me how to make $\text{Pd}(\text{PPh}_3)_4$ as well as (Dr) Manuel Fernandes for X-ray crystallographic analyses.

LIST OF ABBREVIATIONS

Ac	acetyl
Ar	aryl
bp	boiling point
Bu	butyl (<i>n</i> = normal, <i>s</i> = secondary and <i>t/tert</i> = tertiary)
CFS	cesium fluorosulfate
DDQ	dichlorodicyanobenzoquinone
DME	dimethoxyethane
DMF	<i>N,N</i> -dimethylformamide
DNA	deoxyribonucleic acid
Et	ethyl
FVP	flash vapour pyrolysis
h	hours
HIV	human immunodeficiency virus
hv	photochemical conditions
IR	infra red
LDA	lithium diisopropyl amide
Me	methyl
min.	minutes
mp	melting point
NBS	<i>N</i> -bromosuccinimide
NMR	nuclear magnetic resonance
<i>o</i> -tol	<i>ortho</i> -tolyl
Ph	phenyl
SEM	scanning electron micrograph
THF	tetrahydrofuran
Ts	tosyl (<i>para</i> -toluenesulfonyl)
X	halogen

TABLE OF CONTENTS

DECLARATION	(I)
ABSTRACT	(II)
ACKNOWLEDGEMENTS	(III)
LIST OF ABBREVIATIONS	(IV)
CHAPTER 1: INTRODUCTION	1
1.1 COMPOUNDS CONTAINING AN INDOLE CORE	1
1.2 NATURALLY OCCURRING, SYNTHETIC CARBAZOLES AND MEDICINE	3
1.3 INDOLE CONTAINING COMPOUNDS IN AGRICULTURE	5
1.4 INDOLE CONTAINING COMPOUNDS IN INDUSTRY AND TECHNOLOGY	7
1.4.1 Industrial Applications of Indoles as Dyes.....	7
1.4.2 Industrial Applications in Photographic Materials.....	8
1.5 SOME REACTIONS OF INDOLE AND ITS DERIVATIVES	9
1.5.1 Substitution at Nitrogen.....	9
1.5.2 Substitution at C2 and C3 Positions.....	10
1.6 PALLADIUM IN INDOLE CHEMISTRY	12
1.6.1 Oxidative Coupling/Cyclisation.....	13
1.6.2 Negishi Coupling.....	14
1.6.3 Stille Coupling.....	16
1.6.4 The Heck Reaction.....	18
1.6.5 Suzuki Coupling.....	19
CHAPTER 2: SYNTHETIC APPROACHES TO BENZO-FUSED CARBAZOLE	21
2.1 BENZANNULATION OF CHROMIUM-CARBENE COMPLEXES	22
2.2 IRON-MEDIATED SYNTHESIS	23
2.3 MOLYBDENUM-MEDIATED SYNTHESIS	24
2.4 PALLADIUM-MEDIATED SYNTHESIS	25
2.5 BENZANNULATION OF INDOLES	26
2.6 FISCHER INDOLISATION OF PHENYLHYDRAZONES	27
2.7 DIELS –ALDER REACTIONS	27
2.8 WITS'S NOVEL APPROACH TO BENZO-ANNELLATED CARBAZOLES	31
2.9 BACKGROUND AND AIMS	31
CHAPTER 3: EXPERIMENTAL RESULTS: THE SYNTHESIS OF BENZO[C]CARBAZOLES	37
CHAPTER 4: CONCLUSIONS AND FUTURE WORK	48
CHAPTER 5: EXPERIMENTAL PROCEDURES	51
5.1 GENERAL PROCEDURES	51
1-(Phenylsulfonyl)-1H-indole (24).....	53
5-Methoxy-1-(phenylsulfonyl)-1H-indole (138).....	54
3-Bromo-1-(phenylsulfonyl)-1H-indole (136).....	55
